The Art of Arranging Flowers-Shozo Sato 1966 "The growing appreciation of Japanese Art and architecture in the West has extended to the Japanese way with flowers. This book is intended as a complete introduction to Ikebana, the Japanese art of flower arrangement. Beginning with the history and development of the art, and its place in Japanese culture, we introduce the reader to the eleven basic styles. Next comes a large section devoted to vases, materials, tools, and methods. Text and pictures explain how to keep flowers fresh, how to select and prepare both fresh and dried materials, and how to make the most effective use of them. Twelve lessons in creating arrangements in the moibana style follow. I have tried to make this the most carefully detailed and profusely illustrated guide of its kind, enabling the reader to create many beautiful arrangements while learning all the necessary techniques of the art. Finally, there is a section devoted to advanced techniques and designs, both classic and modern, and to the setting of mood. Appedixes suggest ways to keep cut flowers fresh, tell how to make effective arrangements from one's own garden flowers and what plant materials to combine, and describe the symbolism of plants and their enhancement. I hope the reader will find this book enjoyable to read, easy to understand, and fun to follow."--Preface.

Coloured, boxed keys to plants in complex or difficult groups are provided to assist identification. Apartment Gardening for Beginners-Emily Davids Rnd 2021-04-28 Gardening can be considered both as a craftsmanship, concerned with arranging plants harmoniously in their surroundings, and as a science, encompassing the principles and procedures of plant development. Because plants are often filled in conditions markedly diverse from those of their natural climate, it is necessary to apply to their cultivation strategies derived from plant physiology, science, and botany, modified by the experience of the planter. The basic principles involved in developing plants are the same in all parts of the world, yet the practice naturally needs much adaptation to neighborhood conditions. Cultivating in its ornamental sense needs a specific level of civilization before it can flourish. Wherever that level has been attained
