The Logic Pamphlets of Charles Lutwidge Dodgson and Related Pieces-Charles Lutwidge Dodgson 2010-01-01 In the history of mathematics, Charles Lutwidge Dodgson (1832-1898), better known as Lewis Carroll, stands out as the rare mathematician who also was an exceptional literary figure. In The Pamphlets of Lewis Carroll, each volume of a projected six volumes deals with a particular aspect of his work. When the series is complete, it will include all of his works that were not originally issued in hard cover with the exception of his poetry and fiction. This fourth volume focuses on his writings on logic. It includes pamphlets and sheets privately printed by Dodgson, unpublished manuscript sheets, rare previously published documents, and early versions of published works. These are collected together for the first time, organized by subject, and presented with suitable commentary so that the reader can fully appreciate Dodgson's contributions to the logic of his time and of ours. The general introduction to the book describes the importance of logic in Dodgson's life and work and provides a historical perspective on the state of logic that existed during his lifetime. The sections of the book that follow contain introductory essays that provide analyses and context both for the general reader and for the specialist, followed by the items in transcription or facsimile. The Mathematical World of Charles L. Dodgson (Lewis Carroll)-Robin Wilson 2019-02-14 Charles Lutwidge Dodgson is best known for his 'Alice' books, Alice's Adventures in Wonderland and Through the Looking-Glass, written under his pen name of Lewis Carroll. Yet, whilst lauded for his work in children's fiction and his pioneering work in the world of Victorian photography, his everyday job was a lecturer in Mathematics at Christ Church, Oxford University. The Mathematical World of Charles L. Dodgson (Lewis Carroll) explores the academic background behind this complex individual, outlining his mathematical life, describing his writings in geometry, algebra, logic, the theory of voting, and recreational mathematics, before going on to discuss his mathematical legacy. This is the first academic work that collects the research on Dodgson's wide-ranging mathematical achievements into a single practical volume. Much material appears here for the first time, such as Dodgson's personal letters and drawings, as well as the results of recent investigations into the life and work of Dodgson. Complementing this are many illustrations, both historical and explanatory, as well as a full mathematical bibliography of Dodgson's mathematical publications.

The Life of Edwin Dodgson-Edward Wakeling 2020-12-12 This is the first biographical account in book form of the Rev. Edwin Heron Dodgson (1846-1918), brother of Lewis Carroll (C. L. Dodgson). Sources include the important family archive from which much new information has been researched and incorporated. After a short time working for the General Post Office in London, Edwin Dodgson, Lewis Carroll's youngest brother, became a missionary with the Society for the Propagation of the Gospels, and after a short spell in Zanzibar, spent much of his time on the remote islands in the Atlantic Ocean, principally Tristan da Cunha. During his time there, tragedy struck the island wiping out most of the male inhabitants. Edwin, with help from his brother, set about organising an evacuation of the island which proved unsuccessful due to the reluctance of some of the remaining islanders. This book is illustrated with material in the family archive and from the photographic work of Lewis Carroll. When Edwin retired, he returned to the family home in Guildford where he died and is buried. Caroline Luke is Edwin's great great niece, and she has provided much of the material used in the preparation of this book. Edward Wakeling is a recognised scholar and expert on the life of Lewis Carroll.
