Back to Venice-Michael Grant 2011-05-26 Imagine what it would be like to go back in time to the 15th century Venice. And imagine what it would be like to meet your lifelong hero, Michelangelo. And imagine what it would be like if, on first meeting, you spill a tray of pasta and wine on that very same hero. Well, that's what happens to serious young artist Mark Breen. As the result of a drunken bet, Mark knocks out a painting of a toilet bowl. Much to his amazement, he sells it. In short order he's hailed as the new Andy Warhol and becomes an overnight sensation-and a very wealthy man. Soon, images of his toilet bowls are on more t-shirts, mugs, and calendars than Edvard Munch's The Scream. His friend and mentor, Hugh Connelly, afraid that Mark is in danger of losing his "artistic soul," advises him to go back to Italy and acquaint himself with the "old masters." In Venice, Mark falls in love with Alexandra, a beautiful art restorer, but it's a one-sided affair. One night, hoping to win her over, he climbs up on a roof to find out who painted her favorite fresco. He falls off the roof and wakes up in 15th century Venice where he meets an innkeeper named Francesca, who looks exactly like Alexandra. And it gets curiously and curiously from there. During his stay-which is sometimes zany and sometimes frightening-he meet his hero, Michelangelo, who teaches him the true meaning of art.

Einstein Was Wrong!-Martin O. Cook 2015-07-11 [Note: The most complete version of the big picture that eluded Einstein in his attempts to unveil a unified field theory can be found in the book, The Gravity Cycle, by the same author as this book. This book, Einstein Was Wrong!, was one of many approaches to the ideas that will shake the very foundations of physical science upon which we presently stand.] Modern Physics is built on an erroneous foundation. If we are to take physics to a new level where gravity can be explained from an atomic/quantum perspective, then someone must boldly say, "Einstein was wrong, but so was Newton." Because they both started with the same wrong premise, their theories of gravity were destined to fall short in any attempt to connect them to atomic/quantum processes. And the same false premise that stifled Einstein in his ability to connect "the movement of planets and stars with the tiniest subatomic particles" prevents modern physicists from explaining the fourth and final

force from an atomic/quantum perspective. Alas, "...when one starts with a wrong premise, no amount of patching can right the problem." But all is not lost. By correcting Newton's mistake (the wrong premise), a new foundation for understanding the role of the atom in the momentum, relativity, and gravity of masses emerges in the form of two new theories: The Atomic Model of Motion (AMM) and The Galaxy Gravity Cycle (GGC). These two theories combine to paint the big picture of how atomic/quantum processes are involved in holding a galaxy together, keeping planets orbiting stars, and preventing people from floating off into space. This book is dedicated to Occam's razor.

The Fun Factory-Rob King 2008-12-10 From its founding in 1912, the short-lived Keystone Film Company—home of the frantic, bumbling Kops and Mack Sennett's Bathing Beauties—made an indelible mark on American popular culture with its high-energy comic shorts. Even as Keystone brought "lowbrow" comic traditions to the screen, the studio played a key role in reformulating those traditions for a new, cross-class audience. In The Fun Factory, Rob King explores the dimensions of that process, arguing for a new understanding of working-class cultural practices within early cinematic mass culture. He shows how Keystone fashioned a style of film comedy from the roughhouse humor of cheap theater, pioneering modes of representation that satirized film industry attempts at uplift. Interdisciplinary in its approach, The Fun Factory offers a unique studio history that views the changing politics of early film culture through the sociology of laughter.

Theory is Fun-Maureen Cox 1993

Rewriting Harry Potter-T. M. Caufield 2015-05-20 Once a child writing prodigy, Jessica finds herself all grown up and desperate to be considered one of the greatest writers of all time. So when a major Hollywood studio hires her to rewrite "Harry Potter," one of the most popular sagas of all time, she sees no better way. But first, convinced that her "abnormal" background might stand in the way of her writing something that "normal" people can relate to, Jessica quickly leaves Hollywood in a quest to immerse herself in how "the other side" lives. It doesn't take long, however, for her to realize that becoming common isn't as simple as she thought it would be. And before she can write "FADE OUT" she must decide if she is really willing to pay the price to achieve true greatness.

The DUH! Book of Management and Supervision-Gerri King 2014 "Managerial styles are influenced by habit, familiarity, and workplace culture. It's no wonder that well-intentioned professionals doing their best to be good organizational leaders often repeat unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the DUH! Book of Management and Supervision, the author disagrees with many accepted leadership principles (unabashedly referring to them as myths) and makes new and different approaches easier to imagine. Her challenging and controversial concepts illustrated with poignant stories suggest common-sense and immediately applicable alternatives more suitable in today's workplace"--Back cover.

Love Objects-Anna Moran 2014-08-28 How are love and emotion embodied in material form? Love Objects explores the emotional potency of things, addressing how objects can function as fetishes, symbols and representations, active participants in and mediators of our relationships, as well as tokens of affection, symbols of virility, triggers of nostalgia, replacements for lost loved ones, and symbols of lost places and times. Addressing both designed 'things with attitude' and the 'wild things' of material culture, Love Objects explores a wide range of objects, from 19th-century American portraits displaying men's passionate friendships to the devotional and political meanings of religious statues in 1920s Ireland.

The Foster Factory-David Learmont 2015-02-10 The Foster Factory deals with the experiences of David Learmont and his wife Marsha once they

retired and started working again as Foster Carers. David claims that if he had written this book as a novel, the characters in it would have been considered 'too outlandish to be credible.' How the elderly couple dealt with egomaniacs, kleptomaniacs, tractor-maniacs, and children who stabbed him and burned down their house are just some of the tales that David recounts with 'what is left' of his sense of humour and his 'diminishing stock' of faith in mankind. Read it and weep. Or laugh. Possibly both.

Pixar and the Aesthetic Imagination-Eric Herhuth 2017-01-24 In Pixar and the Aesthetic Imagination, Eric Herhuth draws upon film theory, animation theory, and philosophy to examine how animated films address aesthetic experience within contexts of technological, environmental, and sociocultural change. Since producing the first fully computer-animated feature film, Pixar Animation Studios has been a creative force in digital culture and popular entertainment. But, more specifically, its depictions of uncanny toys, technologically sublime worlds, fantastic characters, and meaningful sensations explore aesthetic experience and its relation to developments in global media, creative capitalism, and consumer culture. This investigation finds in Pixar's artificial worlds and transformational stories opportunities for thinking through aesthetics as a contested domain committed to newness and innovation as well as to criticism and pluralistic thought.

Electric Dreamland-Lauren Rabinovitz 2012 More than two thousand amusement parks dotted the American landscape in the early twentieth century, thrilling the general public with the latest in entertainment and motion picture technology. Amusement parks were the playgrounds of the working class, combining numerous, mechanically-based spectacles into one unique, modern cultural phenomenon. Lauren Rabinovitz describes the urban modernity engendered by these parks and their media, encouraging ordinary individuals to sense, interpret, and embody a burgeoning national identity. As industrialization, urbanization, and immigration upended society before World War I, amusement parks tempered the shocks of racial, ethnic, and cultural conflict while shrinking the distinctions between gender and class. As she follows the rise of American parks from 1896 to 1918, Rabinovitz seizes on a simultaneous increase in cinema and spectacle audiences and connects both to the success of leisure activities in stabilizing society.

Clarinet and Saxophone- 1996

The Darker Side of Travel-Richard Sharpley 2009 The Darker Side of Travel is a contemporary and comprehensive analysis of dark tourism. Drawing on existing literature, numerous examples and introducing new conceptual perspectives, it develops a theoretically informed foundation for examining the demand for and supply of dark tourism experiences. It also explores issues relevant to the development, management and interpretation of visitor sites and attractions associated with death, disaster and suffering.
