A Companion to the Era of Andrew Jackson-Sean Patrick Adams 2013-01-28 A Companion to the Era of Andrew Jackson offers a wealth of new insights on the era of Andrew Jackson. This collection of essays by leading scholars and historians considers various aspects of the life, times, and legacy of the seventh president of the United States. Provides an overview of Andrew Jackson's life and legacy, grounded in the latest scholarship and including original research spread across a number of thematic areas Features 30 essays contributed by leading scholars and historians Synthesizes the most up-to-date scholarship on the political, economic, social, and cultural aspects of the Age of Andrew Jackson

Historical Ethnographies of Quilting-Teresa Christine Klassen 2007

Inventing Stonewall Jackson-Wallace Hettle 2011-05-06 Historians' attempts to understand legendary Confederate General Thomas J. "Stonewall" Jackson have proved uneven at best and often contentious. An occasionally enigmatic and eccentric college professor before the Civil War, Jackson died midway through the conflict, leaving behind no memoirs and relatively few surviving letters or documents. In *Inventing Stonewall Jackson*, Wallace Hettle offers an innovative and distinctive approach to interpreting Stonewall by examining the lives and agendas of those authors who shape our current understanding of General Jackson. Newspaper reporters, friends, relatives, and fellow soldiers first wrote about Jackson immediately following the Civil War. Most of them, according to Hettle, used portions of their own life stories to frame that of the mythic general. Hettle argues that the legend of Jackson's rise from poverty to power was likely inspired by the rags-to-riches history of his first biographer, Robert Lewis Dabney. Dabney's own successes and Presbyterian beliefs probably shaped his account of Jackson's life as much as any factual research. Many other authors inserted personal values into their stories of Stonewall, perplexing generations of historians and writers. Subsequent biographers contributed their own layers to Jackson's myth and eventually a composite history of the general came to exist in the popular imagination. Later writers, such as the liberal suffragist Mary Johnston, who wrote a novel about Jackson, and the literary critic Allen Tate, who penned a laudatory biography, further shaped Stonewall's myth. As recently as 2003, the film *Gods and Generals*, which featured Jackson as the key protagonist, affirmed the longevity and power of his image. Impeccable research and nuanced analysis enable Hettle to use American culture and memory to reframe the Stonewall Jackson narrative and provide new ways to understand the long and contended legacy of one of the Civil War's most popular Confederate heroes.

Editing Historical Documents-Michael E. Stevens 1997 This volume is aimed both at more experienced editors, who may wish to skip over the advice offered in the introduction, as well as at those who are new to the craft and want to know how to begin work on publishing historical documents of interest to them.

Forensic Mental Health Assessment-Kirk Heilbrun 2014 Forensic mental health assessment (FMHA) continues to develop and expand as a specialization. Since the publication of the First Edition of *Forensic Mental Health Assessment: A Casebook* over a decade ago, there have been a number of significant changes in the applicable law, ethics, science, and practice that have shaped the conceptual and empirical underpinnings of FMHA. The Second Edition of *Forensic Mental Health Assessment* is thoroughly updated in light of the developments and changes in the field, while still keeping the unique structure of presenting cases, detailed reports, and specific teaching points on a wide range of topics. Unlike anything else in the literature, it provides genuine (although disguised) case material, so trainees as well as legal and mental health professionals can review how high-quality forensic evaluation reports are written; it features contributions from leading experts in forensic psychology and psychiatry, providing samples of work in their particular areas of specialization; and it discusses case material in the larger context of broad foundational principles and specific teaching points, making it a valuable resource for teaching, training, and continuing education. Now featuring 50 real-world cases, this new edition covers topics including criminal responsibility, sexual offending risk evaluation, federal sentencing, capital sentencing, capacity to consent to treatment, personal injury, harassment and discrimination, guardianship, juvenile commitment, transfer and decertification, response style, expert testimony, evaluations in a military context, and many more. It will be invaluable for anyone involved in assessments for the courts, including psychologists, psychiatrists, social workers, and attorneys, as well as for FMHA courses.

America's National Monuments-Hal Rothman 1989 Rothman traces the evolution of federal preservation. He shows how laws, policies, personalities, personal and bureaucratic rivalries, and a changing cultural climate affected preservation efforts. He illustrates how the national park system has functioned and changed over the years as public officials have tried to implement federal policy at the grassroots level.

Trouble in Goshen-Fred C. Smith 2014-02-19 The Great Depression emboldened Americans to tolerate radical experimentation in search of solutions to seemingly overwhelming economic problems. Amongst the thorniest of those was rural southern poverty. In *Trouble in Goshen*, Fred C. Smith focuses on three communities designed and implemented to meet that challenge. This book examines the economic and social theories—and their histories—that resulted in the creation and operation of the most aggressive and radical experiments in the United States. *Trouble in Goshen* chronicles three communitarian experiments, both the administrative details and the struggles and reactions of the clients. Smith covers the Tupelo

Homesteads in Mississippi, the Dyess Colony in Arkansas, and the Delta Cooperative Farm, also in Mississippi. The Tupelo Homesteads were created under the aegis of the tiny Division of Subsistence Homesteads, a short-lived, "first New Deal" agency. Dyess Colony was the largest of the Resettlement Administration's efforts to transform failed farmers into Jeffersonian yeoman farmers. The third community, the Delta Cooperative Farm, a product of the active cooperation between the Socialist Party of America and a cadre of liberal churchmen led by Reinhold Niebuhr, attempted to meld the pieties, passions, propaganda, and theories of Jesus and Marx. The equipment, facilities, and management styles of the projects reveal a clearly delineated class order among the poor. Trouble in Goshen demonstrates the class conscious angst that enveloped three distinct levels of poverty and the struggles of plain folk to preserve their tenuous status and avoid overt peasantry.

The Early History Settlement and Growth of Jackson, Michigan- 1965

The Crabb Family-Richard Dwight Prall 1997 The first Crabbs from England crossed the Atlantic in small wooden ships in the 17th century and settled in Massachusetts, Virginia, and Maryland. This book presents American Crabbs from the Colonial Age to the present; the first chapter discusses Crabbs in England, Scotland, Ireland, and Canada. Ralph Crab (1690-1734) married Priscilla Sprigg (1699-1763) in 1716 and lived in Maryland with a family of 9 children. Includes the families of Smith, Threlkeld, Coons, Greenfield, Krebs and others.

The Northumbrians-Dan Jackson 2019 Why is the North East the most distinctive region of England? Where do the stereotypes about North Easterners come from, and why are they so often misunderstood? In this wideranging new history of the people of North East England, Dan Jackson explores the deep roots of Northumbrian culture--hard work and heavy drinking, sociability and sentimentality, militarism and masculinity--in centuries of border warfare and dangerous and demanding work in industry, at sea and underground. He explains how the landscape and architecture of the North East explains so much about the people who have lived there, and how a 'Northumbrian Enlightenment' emerged from this most literate part of England, leading to a catalogue of inventions that changed the world, from the locomotive to the lightbulb. Jackson's Northumbrian journey reaches right to the present day, as this remarkable region finds itself caught between an indifferent south and a newly assertive Scotland. Covering everything from the Venerable Bede and the prince-bishops of Durham to Viz and Geordie Shore, this vital new history makes sense of a part of England facing an uncertain future, but whose people remain as distinctive as ever.

Survival Math-Mitchell Jackson 2020-02-04 "A vibrant memoir of race, violence, family, and manhood...a virtuosic wail of a book" (The Boston Globe), Survival Math calculates how award-winning author Mitchell S. Jackson survived the Portland, Oregon, of his youth. This "spellbinding" (NPR) book explores gangs and guns, near-death experiences, sex work, masculinity, composite fathers, the concept of "hustle," and the destructive power of addiction—all framed within the story of Mitchell Jackson, his family, and his community. Lauded for its breathtaking pace, its tender portrayals, its stark candor, and its luminous style, Survival Math reveals on every page the searching intellect and originality of its author. The primary narrative, focused on understanding the antecedents of Jackson's family's experience, is complemented by survivor files, which feature photographs and riveting short narratives of several of Jackson's male relatives. "A vulnerable, sobering look at Jackson's life and beyond, in all its tragedies, burdens, and faults" (San Francisco Chronicle), the sum of Survival Math's parts is a highly original whole, one that reflects on the exigencies—over generations—that have shaped the lives of so many disenfranchised Americans. "Both poetic and brutally honest" (Salon), Mitchell S. Jackson's nonfiction debut is as essential as it is beautiful, as real as it is artful, a singular achievement, not to be missed.

Slave Country-Adam ROTHMAN 2009-06-30 Slave Country tells the tragic story of the expansion of slavery in the new United States. In the wake of the American Revolution, slavery gradually disappeared from the northern states and the importation of captive Africans was prohibited. Yet, at the same time, the country's slave population grew, new plantation crops appeared, and several new slave states joined the Union. Adam Rothman explores how slavery flourished in a new nation dedicated to the principle of equality among free men, and reveals the enormous consequences of U.S. expansion into the region that became the Deep South. Rothman maps the combination of transatlantic capitalism and American nationalism that provoked a massive forced migration of slaves into Louisiana, Alabama, and Mississippi. He tells the fascinating story of collaboration and conflict among the diverse European, African, and indigenous peoples who inhabited the Deep South during the Jeffersonian era, and who turned the region into the most dynamic slave system of the Atlantic world. Paying close attention to dramatic episodes of resistance, rebellion, and war, Rothman exposes the terrible violence that haunted the Jeffersonian vision of republican expansion across the American continent. Slave Country combines political, economic, military, and social history in an elegant narrative that illuminates the perilous relation between freedom and slavery in the early United States. This book is essential reading for anyone interested in an honest look at America's troubled past.

Deconstructing History-Alun Munslow 1997 In "Deconstructing History," Alan Munslow examines history in the postmodern age, providing an introduction to the topics and debates inherent in a postmodern approach to history. Detailing both empiricist and deconstruction issues and considering the arguments of both schools, Munslow debates the position that not only is history defined as the textual product of historians but also that narrative may provide the textual model for the past itself. An examination of the character of historical evidence and an exploration of the role of historians as well as a discussion of the failure of traditional historical models is included. Munslow maps the controversies involved in and assesses the merits of the deconstructionist position, arguing that instead of beginning with past events themselves, history begins with representations of the past.

Thomas Jefferson's Image of New England-Arthur Scherr 2016-10-07 Writers often depict Thomas Jefferson as a narrow-minded defender of states' rights and Virginia's interests, despite his authorship of the Declaration of Independence and vigorous defense of the young republic's sovereignty. Some historians claim he was particularly hostile to the New England states, whose Federalist electorate he regarded as enemies of his Democratic-Republican Party. This study of Jefferson's lifelong relationship with New England reveals him to be a consistent nationalist and friend of the region, from his first visit to Boston in 1784 to his recruiting of Massachusetts scholars to teach at the University of Virginia. His nationalist point of view is most evident where some historians claim to see it least: in his opinions of the people and politics of New England. He admired New Englanders' Revolutionary patriotism, especially that of his friend John Adams, and considered their direct democracy and town-meeting traditions a model for the rest of the Union.

Historical Environmental Variation in Conservation and Natural Resource Management-John A. Wiens 2012-09-04 In North America, concepts of Historical Range of Variability are being employed in land-management planning for properties of private organizations and multiple government agencies. The National Park Service, U.S. Fish & Wildlife Service, Bureau of Land Management, U.S. Forest Service, and The Nature Conservancy all include elements of historical ecology in their planning processes. Similar approaches are part of land management and conservation in Europe and Australia. Each of these user groups must struggle with the added complication of rapid climate change, rapid land-use change, and technical issues in order to employ historical ecology effectively. Historical Environmental Variation in Conservation and Natural Resource Management explores the utility of historical ecology in a management and conservation context and the development of concepts related to understanding future ranges of variability. It provides guidance and insights to all those entrusted with managing and conserving natural resources: land-use planners, ecologists, fire scientists, natural resource policy makers, conservation biologists, refuge and preserve managers, and field practitioners. The book will be

particularly timely as science-based management is once again emphasized in United States federal land management and as an understanding of the potential effects of climate change becomes more widespread among resource managers. Additional resources for this book can be found at: www.wiley.com/go/wiens/historicalenvironmentalvariation.
