2021-10-21 Toni Reed The hero of the story is a demonic lover—dark, handsome, mysterious, and dangerously seductive. The heroine—beautiful, and innocent—willingly becomes his victim and is destroyed by him. This story of demon-lover and victim, always charged with passion, has been told over and over, from Greek mythology through contemporary fiction and films. *Demon-Lovers and Their Victims in British Fiction* is the first historical and structural exploration of the demon-lover motif, with emphasis on major works of British fiction from the eighteenth, nineteenth, and twentieth centuries; it will interest those concerned with gender role conflicts in literature and with the mutual influence of oral and written texts of folklore and formal literature.

2024-02-01 Loray Daws In this volume, Loray Daws traces the life and work of Dr. James F. Masterson, with a focus on the scientific development and later expansion of the six developmental stages of the Masterson Method. Exploring more than 15 of Masterson's volumes, as well as countless articles, Daws shows how Masterson's approach to Object Relations and the developmental self can serve clinicians in both conceptualizing and treating borderline, narcissistic, and schizoid disorders of self. Considering the pioneering and innovative nature of Masterson's work, Daws looks

at how he creatively expanded on Freud's theories on repression, successfully developing therapeutically sound ways to touch and transform developmental trauma and trauma reflected in a deep abandonment depression. James F. Masterson: A Contemporary Introduction will be of interest to students in psychology, psychiatry, and psychiatric nursing, as well as psychoanalytically orientated psychotherapists, psychoanalysts, and those specializing in the ever-growing field of the treatment of the disorders of the self.

2013-11-12 Susan Kavalier-Adler Through the life stories of women such as Camille Claudel, Virginia Woolf, Katherine Mansfield, Anne Sexton, Suzanne Farrell and others and through clinical case studies, Susan Kavalier-Adler offers penetrating insights into the nature of the creative process. Kavalier-Adler contrasts unsuccessful psychological treatments with object-relations therapy that is able to resolve the pathological narcissism of creative addiction and allow the emergence of healthy modes of self-expression.

2018-05-11 Salman Akhtar Beginning with Freud's celebrated case of Little Hans, psychoanalysts and psychotherapists have been intrigued with the topic of fear. Eclipsed in theoretical writings by the term 'anxiety', fear remains a pervasive expression in day to day clinical work.

Patients constantly talk about it. One implores that we cure him of his fear of dogs. Another offers the fear of aloneness as the rationale of her staying in a bad marriage. Yet another avoids all athletic activity due to the fear of physical injury. And a fourth one lives in utter denial of passing time to avoid facing his fear of death. Despite its ubiquitous presence, fear has received little direct attention in psychoanalytic literature. This book aims to fill this lacuna. It explicates various intensities of fear, e.g. apprehension, dread, panic, and terror. It delineates the boundaries between fear and anxiety and demonstrates how phobic states constitute an admixture of these two emotions.

2013-09-24 J Alex Ficarra Here at Remington it has become clearly evident that mediocrity was not a path chosen by anyone in this book. It has also become vividly apparent that humanitarian contribution was a common theme in the lives of many of these professionals and as a company we made it our primary objective to recognize those contributions first and foremost. Although the foundation of our company is based on networking and mutual collaboration we felt it was our moral obligation to assist in any way we can the professionals who demonstrated extreme self-sacrifice and compassion for others. We would also like to mention that our staff went to great personal length to get the fine details of each and every person in this book. We pride

ourselves in offering much more than a registry and a basic summary of each professional. We encourage you the reader to immerse yourself in the lives of others. Experience the joy, pain, adversity, fear and heroism of some of the most brilliant professionals on our planet. Speaking for myself and the staff of the Remington Registry of Outstanding Professionals we hope you enjoy reading our book and it is our sincere desire that you draw inspiration from it and use it as a tool when relentlessly pursuing your dreams.

2013-11-12 Susan Kavalier-Adler Through the life stories of women such as Camille Claudel, Virginia Woolf, Katherine Mansfield, Anne Sexton, Suzanne Farrell and others and through clinical case studies, Susan Kavalier-Adler offers penetrating insights into the nature of the creative process. Kavalier-Adler contrasts unsuccessful psychological treatments with object-relations therapy that is able to resolve the pathological narcissism of creative addiction and allow the emergence of healthy modes of self-expression.

2018-05-08 Salman Akhtar This book is devoted to the developmental substrate of regret and of its vicissitudes over the life span. It deals with fiction, poetry, and movies pertaining to regret. The book elucidates the psychopathological dimension of ego restriction associated with regret.

2018-05-01 Susan Kavalier-Adler The Klein-Winnicott Dialectic: Transformative New Metapsychology and Interactive Clinical Theory brings together the theories of Melanie Klein and Donald W. Winnicott, two giants and geniuses of the British school of object relations clinical and developmental theory and psychoanalytic technique. In this book, The author attempts to integrate the theories of Klein and Winnicott, rather than polarising them, as has been done often in the past. This book takes the best of Klein and Winnicott for use by clinicians on an everyday basis, without having the disputes between their followers interfere with the full and rich platter of theoretical offerings they each of them provided. In addition, this book looks at the biographies of Klein and Winnicott, to show how their theories were inspired by their contrasting lives and contrasting parenting and developmental dynamics. By examining their theories in relation to their biographies, one can see why their dialectical theoretical focuses emerged, highly contrasted in their major emphasis, and yet highly complementary when applied together to clinical work.

2018-03-29 Graciela Abelin-Sas Rose In this book a group of contemporary psychoanalytic authors dedicated to studies on women and the feminine have been assembled with the objective of displaying points of concordance and discordance in relation to Freudian

proposals. Discourse on women has changed greatly since Freud's time. It coincides with deep changes experienced by women and the feminine position, at least in most of the Western world. It is common knowledge that contraceptives, assisted fertilization, advances in women's rights, growingly evident sublimational capacities and demonstrations of professional success have definitely changed ideas regarding an eternal and immutable feminine nature. The authors are interested in illuminating ways in which these changes have or have not influenced psychoanalytic debate in relation to the feminine. This implies renewing the question of what is authentically feminine and whether there is any essential truth concerning the feminine.

2019-09-13 Hada Soria Escalante Rethinking the Relation between Women and Psychoanalysis interrogates core psychoanalytical theoretical concepts concerning loss and femininity. Contributors apply different psychoanalytic perspectives to loss and femininity, focusing on the intersection of psychoanalysis, culture, and clinical work.

2007 Rafael A. Javier 'Handbook of Adoption' addresses topics in adoption that reflect the many dimensions of theory, research, development, race adjustment and clinical practice which can affect adoption triad members.

1984 Victoria Holt No two

people are less alike than the imperious Baron and the willful, young and uncomplicated English woman he desires to conquer in the mid-1800s.

2018-05-01 Harry Karnac 'Did Melanie Klein ever think that 50 years after her death her ideas would be spreading world-wide in such a fruitful and productive way? In one sense she would be surprised, but in another, I think she might have regarded it as just to be expected. She had a very high regard for her own work, and enormous confidence that she was on to something new. At the same time she was fatefully resigned to being misunderstood and rejected - just as Freud had been, of course. But now, here is the evidence of her success: two thousand plus references, and climbing. Klein's ideas are truly international now, and perhaps wherever Freud is there Klein shall be, to adapt a well-known phrase. Of course this is in the context of other schools which also spread slipperily across the globe, thanks now to the web. But the author's bibliography is a proper published document, and is of immense potential use for clinicians, students, and researchers.

1993 Susan Kavalier-Adler

2010-07-28 J. F. Pagel The Limits of Dream focuses on what we currently know of the human central nervous system (CNS), examining the basic sciences of neurochemistry, neuroanatomy, and CNS

electrophysiology as these sciences apply to dream, then reaching beyond basic science to examine the cognitive science of dreaming including the processes of memory, the perceptual interface, and visual imagery. Building on what is known of intrapersonal CNS processing, the book steps outside the physical body to explore artificially created dreams and their use in filmmaking, art and story, as well as the role of dreaming in creative process and creative "madness. The limits of our scientific knowledge of dream frame this window that can be used to explore the border between body and mind. What is known scientifically of the cognitive process of dreaming will lead the neuroscientist, the student of cognitive science, and the general reader down different paths than expected into an exploration of the fuzzy and complex horizon between mind and brain. * The clearest presentation of research and philosophy currently available relating to the mind/brain interface * Discusses the cognitive processes of dreaming utilized in film and artificial intelligence * Describes the functioning of dream in the creative process

2012-02-01 Paula M. Salvio The poet's life as a teacher.

2013-07-01 Susan Kavalier-Adler The Compulsion to Create: Women Writers and Their Demon Lovers is a fascinating and informative psychological survey of women and the literature they create, especially as reflected by the

lives and work of such luminaries as Charlotte Bronte, Emily Bronte, Emily Dickinson, Anais Nin, Sylvia Plath, and Edith Sitwell. The reader is treated to such issues as compulsion versus reparation, developmental mourning and creative-process reparation, creative women and the "internal father," and the "demon-lover" theme as literary myth and psychodynamic complex. A highly recommended addition to women's studies, literary studies, and psychological studies supplemental reading lists, "The Compulsion to Create" is original, revealing, insightful, challenging, at times iconoclastic, and always entertaining.

2014-02-05 J. F. Pagel Dreaming is the cognitive state uniquely experienced by humans and integral to our creativity, the survival characteristic that allows for the rapid change and innovation that defines our species and provides the basis for our art, philosophy, science, and humanity. Yet there is little empiric or scientific evidence supporting the generally accepted dream-based theories of neuroconsciousness. Dream Science examines the cognitive science of dreaming and offers an evidence-based view of the phenomenon. Today, such evidence-based breakthroughs in the field of dream science are altering our understanding of consciousness. Different forms of dreaming consciousness occur throughout sleep, and dreamlike states extend into

wake. Each dream state is developed on a framework of memories, emotions, representational images, and electrophysiology, amenable to studies utilizing emerging and evolving technology. Dream Science discusses basic insights into the scientific study of dreaming, including the limits to traditional Freudian-based dream theory and the more modern evidence-based science. It also includes coverage of the processes of memory and parasomnias, the sleep-disturbance diagnoses related to dreaming. This comprehensive book is a scientific exploration of the mind-brain interface and a look into the future of dream science. Provides a more evidence-based approach than any other work on the market. Single source of integrated information on all aspects of dream science makes this a critical time-saving reference for researchers and clinicians. Authored by one of the leaders in the field of dream research

2017-02-03 Ellen L.K. Toronto Gender and body-based distinctions continue to be a defining component of women's identities, both in psychoanalytic treatment and in life. In this book, a distinguished group of contributors explore the ways in which women's sexual and reproductive capabilities, and their bodies, are regarded as societal and patriarchal property, and how as the "other", they can be the focus of mistreatment such as rape, sexual slavery, restriction of reproduction rights, and

ongoing societal repression. They also explore the cultural definitions of motherhood, and how these set narrow definitions for the acceptable face of motherhood and for being a woman generally

2015-01-30 Wendy Lipton-Dibner Make a list of 16 challenges to success in business and in life. The list will likely include everything from losing weight to increasing business revenues. Now try to find one expert who can provide concrete, practical, proven solutions to break through all 16 barriers and you'll soon discover there is no all-knowing guru or credentialed expert with the necessary skills and experience. That's why 16 leading experts came together to create "The Expert Success Solution" Volume 2, the second in the series of collaborative 5-star success buffets with concrete solutions for the most critical personal and professional challenges encountered by men and women around the globe. "The Expert Success Solution", Volume 2 picks up where the #1 International Bestselling Volume 1 left off, providing all-new, practical, step-by-step strategies in a fast-reading, entertaining, inspirational, hit-you-between-the-eyes, how-to manual. Filled with thought-provoking questions and real-life stories, the tools provided here will solve existing problems and help you avoid life's greatest speed bumps. This is the juncture where motivation meets information and where the biggest decision

you'll have to make is whether to grab a tissue or a highlighter. What do you want to be different in your business life and in your personal life?

2004-06-02 Susan Kavalier-Adler In her earlier books, Susan Kavalier-Adler identified healthy mourning for traumas and life changes as an essential aspect of successful analysis, and drew the distinction between a healthy acceptance of mourning as part of development and pathological mourning, which 'fixes' a patient at an unhealthy stage of development. This new book brings such distinctions into the consulting room, exploring how a successful analyst can help patients to utilise mourning for past troubles to move them forward to a lasting change for the better, emotionally, psychically and erotically. The author also tackles the controversial issue of spirituality in psychoanalysis, and explores how psychoanalysis can help patients come to terms with difficult issues in a time of great psychic and spiritual disturbance. These themes are brought to life via two richly detailed case studies.

2018-04-17 Susan Kavalier-Adler Anatomy of Regret has a highly clinical focus, with cases that illustrate how critical psychic change can emerge from the mourning of the grief of "psychic regret". This book highlights the developmental achievement of owning the guilt of aggression, and of tolerating insight into the losses one had produced. The

author uses the term "psychic regret" to capture the essence of the process of facing regret consciously. This is in contrast to the split-off and persecutory dynamics of unconscious guilt. Unconscious guilt exposes itself through visceral and cognitive impingements, which are related to internal world enactments, and it relies on unconscious avoidance of the pain and loss involved in facing psychic regret. The author's theory of "developmental mourning" is illustrated in this book through in-depth lively clinical processes (cases and vignettes).

2012-11-12 Gail M. Boldt The idea that teachers love children is often taken for granted in education. Rarely is the idea of love itself examined. Bringing together the work of educators, curriculum theorists and clinical psychoanalysts, and drawing upon autobiographical and narrative case studies, this groundbreaking collection examines the collision of love and learning, including the ways in which such intersections are provoked, repressed and denied. Contributors turn to psychoanalysis to explore questions of love in all of its varying permutations - ambivalence, sexuality, hatred, desire, projection, and loss - in order to demonstrate how the social ramifications of such work is critical to the ways teachers are currently being prepared for life in the classroom.

2000-07

2022 Salman Akhtar Psihologii au studiat și catalogat meticolos multiplele forme ale anxietății, iar literatura de specialitate pe această temă este vastă. Cu toate acestea, rar se întâmplă ca oamenii să folosească acest construct teoretic, separat de experiență. Vorbesc, în schimb, despre frică. Le face sângele să înghețe, genunchii să li se taie, îi ține treji noaptea. În cartea de față sunt aduse în discuție șase mari frici din viață: frica de prăbușire psihică, frica de singurătate, frica de intimitate, frica de vătămare, frica de succes și frica de moarte, care sunt examinate din diferite perspective. Avem astfel acces la un tablou de profunzime al aspectelor aflate în spatele fricilor care ne ajută să înțelegem să ne simțim mai aproape de experiențele celor din jur, să îi înțelegem mai bine și să fim mai pregătiți să-i ajutăm să-și gestioneze propriile frici. Salman Akhtar este profesor de psihiatrie la Jefferson Medical College și psihanalist-formator în cadrul Centrului Psihanalitic din Philadelphia. La Editura Trei au apărut Sursele suferinței, Sursele bucuriei și Intervenții neobișnuite. Modificări ale cadrului, metodei și relației în psihanaliză și psihoterapie.

2021-09-16 Arthur Asa Berger This fascinating and highly readable book, illustrated with many drawings by the author, uses semiotics, psychoanalytic theory, Marxist theory, and sociological theory to analyze creativity. It also includes short "inserts" by a communications scholar, a psychiatrist, a

psychoanalyst, a semiotician, a humor scholar, and a media scholar offering their perspectives on the subject. The book relates creativity to humor, deals with the way Freud's and Marx's ideas can be applied to humor, and discusses many aspects of everyday life such as smart speakers, TikTok, hairstyles, bagels, and personal taste. It argues that creativity is not limited to a small number of people in the arts, but that everyone is, to varying degrees, creative. An unusual feature of the book is that it offers notes from the author's journal to show his thinking processes in writing the book.

2016-10-04 Sharon Klayman Farber Why would someone decide to become a psychotherapist? It is well-known within the field that psychoanalysts and psychotherapists are often drawn to their future professions as a result of early traumatic experiences and being helped by their own psychoanalytic treatment. While dedicating their lives to relieving emotional suffering without being judgmental, they fear compromising their reputations if they publicly acknowledge such suffering in themselves. This phenomenon is nearly universal among those in the helping professions, yet there are few books dedicated to the issue. In this innovative book, Farber and a distinguished range of contributors examine how the role of the 'wounded healer' was instrumental in the formulation of psychoanalysis,

and how using their own woundedness can help clinicians work more effectively with their patients, and advance theory in a more informed manner. Celebrating the Wounded Healer Psychotherapist will be of interest to psychoanalysts and psychoanalytic psychotherapists, graduate students in clinical disciplines including psychology, social work, ministry/chaplaincy and nursing, as well as the general public.

2001 Susie Orbach This is Susie Orbach's classic text on anorexia, where for the first time the myths and misconceptions of an emerging cultural epidemic were dispelled. Since its initial publication in 1986, *Hunger Strike* has been at the center of the debate over anorexia. This beautifully repackaged edition includes Susie Orbach's 1993 introduction, which discusses more recent attitudes toward eating problems and how they have changed over the last several years, and a revised final chapter, in which she proposes an innovative approach to residential treatment that utilizes the

meanings of anorexia to the sufferer as a basis for therapy.

2012 Sharon Klayman Farber *Hungry for Ecstasy: Trauma, The Brain, and the Influence of the Sixties* by Sharon Klayman Farber explores the hunger for ecstatic experience that can lead people down the road to self-destruction. In an attempt to help mental health professionals and concerned individuals understand and identify the phenomenon and ultimately intervene with patients, friends, and loved ones, Farber speaks both personally and professionally to the reader. She discusses the different paths taken on the road to ecstatic states. There are religious ecstasies, ecstasies of pain and near-death experiences, cult-induced ecstasies, creative ecstasies, and ecstasies from hell. *Hungry for Ecstasy* explores not only the neuroscientific processes involved but also the influence of the sixties in driving people to seek these states. Finally, Farber draws from her own personal and professional experience to advise others how to intervene on behalf of the person whose behavior puts

his or her life at risk.

2020-07-24 Mary Kay O'Neil Jealousy is a human feeling experienced by everyone in varying intensities, at different times and phases of growth. Frequently confused, jealousy and envy are often intertwined. Even within the psychoanalytic literature confusion persists and much less has been written about jealousy than envy. However, unlike envy, jealousy involves three entities and affects all people involved. It can be painful as other difficult-to-bear feelings (e.g. shame, guilt, anger, hatred) underlie jealousy. Yet, total absence of jealousy renders a person less human, less relational. In analytic terms jealousy is a defense against emotional anguish. This book begins with an extensive overview of the nature, developmental origins and poignant cultural (especially poetic) allusions to jealousy, emphasizing that it is through artistic expression that a true understanding of this frequently deeply disturbing feeling is achieved. It closes with a thoughtful summary, synthesis and critique of the chapters by 12 distinguished analysts.
