The Conditions of Freedom-Harry V. Jaffa 2000

Freedom and Society-Yi Deng 2021-05-03 In order to preserve and ensure the vitality of freedom and democracy in democratic societies, it is important that citizens reflect deeply on the meaning of freedom and the conditions necessary to sustain it. The idea for this volume arose from discussions at the February 2019 annual meeting of the Georgia Philosophical Society held at Mercer University on the theme of Freedom and Society, and drafts of many of the chapters were first presented there. Including contributions from both early-career and well-known scholars, the chapters are tied together by questions about the nature of political freedom and autonomy in democratic societies and about the ways in which the enactment of democratic freedom depends on awareness of and engagement with freedom's underlying conditions. These conditions include social responsibility, creative innovation, and strong democratic institutions.

Freedom of Mind and Other Essays-Stuart Hampshire 2015-03-08 Each of the fourteen essays in this volume is directed to some aspect of these two questions: What are the peculiarities of the concepts that we use to describe and to criticize the mental states and performances of human beings? What are the peculiarities of the knowledge that we may possess of our own mental states and attitudes and of the mental states and attitudes of others? Each of us is both a scientific student of others' beliefs, desires, and attitudes and the responsible author of his own beliefs and attitudes. The center of the freedom-of-mind problem, Professor Hampshire asserts, is the confusion that arises when we try to reconcile the explanations that we would give of the same mental state or process from the two different points of view. Originally published in 1971. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Sex, Economy, Freedom, & Community-Wendell Berry 2018-12-04 ""Read [him] with pencil in hand, make notes, and hope that somehow our country and the world will soon come to see the truth that is told here."" —The New York Times Book Review In this collection of essays, first published in 1993, Wendell Berry continues his work as one of America's most necessary social commentators. With wisdom and clear, ringing prose, he tackles head-on some of the most difficult problems confronting us near the end of the twentieth century—problems we still face today. Berry elucidates connections between sexual brutality and economic brutality, and the role of art and free speech. He forcefully addresses America's unabashed pursuit of self-liberation, which he says is ""still the strongest force now operating in our society."" As individuals turn away from their community, they conform to a ""rootless and placeless monoculture of commercial expectations and products,"" buying into the very economic system that is destroying the earth, our communities, and all they represent.

Law and the Conditions of Freedom in the Nineteenth-century United States-James Willard Hurst 1956 In these essays J. Willard Hurst shows the correlation between the conception of individual freedom and the application of law in the nineteenth-century United States—how individuals sought to use law to increase both their personal freedom and their opportunities for personal growth. These essays in jurisprudence and legal history are also a contribution to the study of social and intellectual history in the United States, to political science, and to economics as it concerns the role of public policy in our economy. The nonlawyer will find in them demonstration of how "technicalities" express deep issues of social values.

Agency And Responsibility-Laura Ekstrom 2018-03-08 A companion volume to Free Will: A Philosophical Study, this new anthology collects influential essays on free will, including both well-known contemporary classics and exciting recent work. Agency and Responsibility: Essays on the Metaphysics of Freedom is divided into three parts. The essays in the first section address metaphysical issues concerning free will and causal determinism. The second section groups papers presenting a positive account of the nature of free action, including competing compatibilist and incompatibilist analyses. The third section concerns free will and moral responsibility, including theories of moral responsibility and the challenge to an alternative possibilities condition posed by Frankfurt-type scenarios. Distinguished by its balance and consistently high quality, the volume presents papers selected for their significance, innovation, and clarity of expression. Contributors include Harry Frankfurt, Peter van Inwagen, David Lewis, Elizabeth Anscombe, John Martin Fischer, Michael Bratman, Roderick Chisholm, Robert Kane, Peter Strawson, and Susan Wolf. The anthology serves as an up-to-date resource for scholars as well as a useful text for courses in ethics, philosophy of religion, or metaphysics. In addition, paired with Free Will: A Philosophical Study, it would form an excellent upper-level undergraduate or graduate-level course in free will, responsibility, motivation, or action theory.

Politics and the English Language-George Orwell 2021-01-01 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. On Freedom-Maggie Nelson 2021-09-09 \*\*A NEW YORK TIMES NOTABLE BOOK OF 2021\*\* \*A GUARDIAN AND TLS 'BOOKS OF 2021' PICK\* 'One of the most electrifying writers at work in America today, among the sharpest and most supple thinkers of her generation' - Olivia Laing So often deployed as a jingoistic, even menacing rallying cry, or limited by a focus on passing moments of liberation, the rhetoric of freedom both rouses and repels. Does it remain key to our autonomy, justice, and well-being, or is freedom's long star turn coming to a close? Does a continued obsession with the term enliven and emancipate, or reflect a deepening nihilism (or both)? On Freedom examines such questions by tracing the concept's complexities in four distinct realms: art, sex, drugs, and climate. Drawing on a vast range of material, from critical theory to pop culture to the intimacies and plain exchanges of daily life, Nelson explores how we might think, experience, or talk about freedom in ways responsive to the conditions of our day. Her abiding interest lies in ongoing "practices of freedom" by which we negotiate our interrelation with-indeed, our inseparability from-others, with all the care and constraint that relation entails, while accepting difference and conflict as integral to our communion. For Nelson, thinking publicly through the knots in our culture-from recent art world debates to the turbulent legacies of sexual liberation, from the painful paradoxes of addiction to the lure of despair in the face of the climate crisis-is itself a practice of freedom, a means of forging fortitude, courage, and company. On Freedom is an invigorating, essential book for challenging times.

The Prevention of Literature-George Orwell 2021-01-01 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In The Prevention of Literature, the third in the Orwell's Essays series, Orwell considers the freedom of thought and expression. He discusses the effect of the ownership of the press on the accuracy of reports of events, and takes aim at political language, which 'consists almost entirely of prefabricated phrases bolted together.' The Prevention of Literature is a stirring cry for freedom from censorship, which Orwell says must start with the writer themselves: 'To write in plain vigorous language one has to think fearlessly.' 'A writer who can - and must - be rediscovered with every age.' — Irish Times

Freedom, Authority and Economics-R. T. Allen 2019 This edited volume of original contributions deals with the economic and political thought of Michael Polanyi. Requiring little prior knowledge of Polanyi, this volume further develops a somewhat neglected side of Polanyi's work. In particular it examines the 'tacit integration', of subsidiary details into focal objects or actions as central to all knowing and action. It traces ontological counterparts in the structures of comprehensive entities and complex actions, and a multi-level universe in which lower levels have their boundary conditions, the extents to which they apply, determined by those of the next higher level, whilst each possessing its own laws or operative principles. This schema of 'dual control' preserves the reality and relative autonomy of each level, and its interactions with others, against the various reductions. The essays in this volume also employ and develop important additional concepts and distinctions such as: 'corporate' and 'spontaneous' order; 'public' and 'private' liberties; 'general' and 'specific authority'; and 'moral inversion'; which, as the essays show, are necessary for understanding and maintaining a free society and the freedom of institutions within it. Among the topics treated with them are: more of the prerequisites of freedom in public liberties dedicated to principles and transcendent values; totalitarianism and society as spontaneous order; the balance of general and specific authority in society and particular institutions; reductionism, totalitarianism and consumption in consumer societies, as moral inversions; the mutual interactions of economics and politics as distinct and autonomous but interacting levels; the sociological aspects of economics; and Polanyi's own contributions to sociology. Although, as indicated, Polanyi has his special terms, the essays in this volume, like his works, give them meaning with concrete examples and so avoid merely shuffling a mass of abstractions. Together the essays show that his work is a rich seam of ideas and inspiration for yet further extension and application--Publisher.

Isaiah Berlin and the Politics of Freedom-Bruce Baum 2013-03-05 Since his death in 1997, Isaiah Berlin's writings have generated continual interest among scholars and educated readers, especially in regard to his ideas about liberalism, value pluralism, and "positive" and "negative" liberty. Most books on Berlin have examined his general political theory, but this volume uses a contemporary perspective to focus specifically on his ideas about freedom and liberty. Isaiah Berlin and the Politics of Freedom brings together an integrated collection of essays by noted and emerging political theorists that commemorate in a critical spirit the recent 50th anniversary of Isaiah Berlin's famous lecture and essay, "Two Concepts of Liberty." The contributors use Berlin's essay as an occasion to rethink the larger politics of freedom from a twenty-first century standpoint, bringing Berlin's ideas into conversation with current political problems and perspectives rooted in postcolonial theory, feminist theory, democratic theory, and critical social theory. The editors begin by surveying the influence of Berlin's essay and the range of debates about freedom that it has inspired. Contributors' chapters then offer various analyses such as competing ways to contextualize Berlin's essay, how to reconsider Berlin's ideas in light of struggles over national self-determination, European colonialism, and racism, and how to view Berlin's controversial distinction between so-called "negative liberty" and "positive liberty." By relating Berlin's thinking about freedom to competing contemporary views of the politics of freedom, this book will be significant for both scholars of Berlin as well as people who are interested in larger debates about the meaning and conditions of freedom.

Liberty, Equality, and the Market-Борис Николаевич Чичерин 1998-01-01 This volume brings the remarkable writings of Russian liberal thinker Boris Nikolaevich Chicherin (1828-1904) to English-language readers for the first time. The collection includes key essays in which Chicherin addresses the central political and social problems that confronted Russia from 1855 to the opening years of the twentieth century. Chicherin's ideological alternatives to the Bolshevik plan for revolutionary transformation of Russia not only provide valuable historical insights, but also are highly relevant to current political discussion of liberalism in Russia and in the West. In a comprehensive introduction to the book, G. M. Hamburg discusses the development of Chicherin's thought and places it in historical context. Chicherin, Hamburg says, was a powerful and sophisticated but often misunderstood defender of civil and political rights. Like his fellow liberals in Russia, Chicherin was heavily influenced by German idealism and particularly by Hegel. He departed from many, however, in favoring a market economy and advocating that reform efforts be tailored to local conditions and traditions. In this collection Chicherin explores such contemporary issues as the abolition of serfdom, Russian education, and the need for a constitution. He also tackles broad philosophical problems--the nature of liberty and equality, styles of political discourse--and comments on such philosophers as Plato, Aristotle, More, Machiavelli, Montesquieu, Hegel, and Marx.

Essays and dissertations-Benjamin Jowett 1894

Roads to Freedom-Erich Streissler 2013-11-05 The articles in this volume were written in honour of F. A. Hayek and cover the whole scope of his thought. Many of the essays take as a starting point Hayek's own writings. The list of distinguished contributors include: Jacques Rueff, George Halm, Michael Polyani, Gordon Tullock, Günter Schmölders, Friedrich Lutz, Gottfried von Haberler, Frank Paish, Ludwig Lachmann, Peter Bauer, James Buchanan, Fritz Machlup and Karl Popper.

On the Currency of Egalitarian Justice, and Other Essays in Political Philosophy-G. A. Cohen 2011-01-03 G. A. Cohen was one of the most gifted, influential, and progressive voices in contemporary political philosophy. At the time of his death in 2009, he had plans to bring together a number of his most significant papers. This is the first of three volumes to realize those plans. Drawing on three decades of work, it contains previously uncollected articles that have shaped many of the central debates in political philosophy, as well as papers published here for the first time. In these pieces, Cohen asks what egalitarians have most reason to equalize, he considers the relationship between freedom and property, and he reflects upon ideal theory and political practice. Included here are classic essays such as "Equality of What?" and "Capitalism, Freedom, and the Proletariat," along with more recent contributions such as "Fairness and Legitimacy in Justice," "Freedom and Money," and the previously unpublished "How to Do Political Philosophy." On ample display throughout are the clarity, rigor, conviction, and wit for which Cohen was renowned. Together, these essays demonstrate how his work provides a powerful account of liberty and equality to the left of Ronald Dworkin, John Rawls, Amartya Sen, and Isaiah Berlin.

From Philosophy to Economics: Early Essays-Neil Shandalow 2012-12-29 Diverse, introductory, and interesting essays on Descartes, Schopenhauer, Marx, Bergson, Adam Smith, David Ricardo, Thomas Kuhn, Hecksher, Ohlin. Topics include: certainty, conditions for knowledge, empirical and a priori knowledge, ego, duration, consciousness, free-will, alienation, naturalism, scientific revolutions, profits, rents, classical and marginalist economics, foreign trade theory. These essays were written when I was a graduate student in philosophy in the late 1960s at New York University and then a decade later as a graduate student in economics at the Graduate Faculty, The New School for Social Research. After reading and digesting these essays the reader will be able to converse with philosophers and economists on these topics at dinner parties and other social gatherings, as long as the reader keeps the conversation on a superficial level.

Freedom and Resentment and Other Essays-P.F. Strawson 2008-08-28 By the time of his death in 2006, Sir Peter Strawson was regarded as one of the world's most distinguished philosophers. First published thirty years ago but long since unavailable, Freedom and Resentment collects some of Strawson's most important work and is an ideal introduction to his thinking on such topics as the philosophy of language, metaphysics, epistemology and aesthetics. Beginning with the title essay Freedom and Resentment, this invaluable collection is testament to the astonishing range of Strawson's thought as he discusses free will, ethics and morality, logic, the mind-body problem and aesthetics. The book is perhaps best-known for its three interrelated chapters on perception and the imagination, subjects now at the very forefront of philosophical research. This reissue includes a substantial new foreword by Paul Snowdon and a fascinating intellectual autobiography by Strawson.

Leo Strauss and Anglo-American Democracy-Grant Havers 2013-10-15 "Interprets Leo Strauss's political philosophy from a conservative standpoint and argues that Strauss was a Cold War liberal. Suggests inattention to Christianity is crucial to the Straussian portrayal of Anglo-American democracy as a universal regime whose eternal ideals of liberty and constitutional government accord with the teachings of Plato and Aristotle, rather than the Gospels"--

Festival of Freedom-Joseph Dov Soloveitchik 2006 Festival of Freedom, the sixth volume in the series MeOtzar HoRav, consists of ten essays on Passover and the Haggadah drawn from the treasure trove left by the late Rabbi Joseph B. Soloveitchik, widely known as "the Rav." For Rabbi Soloveitchik, the Passover Seder is not simply a formal ritual or ceremonial catechism. Rather, the Seder night is "endowed with a unique and fascinating quality, exalted in its holiness and shining with a dazzling beauty." It possesses profound experiential and intellectual dimensions, both of them woven into the fabric of halakhic performance. Its central mitzvah, sippur yetzi'at Mitzrayim, recounting the exodus, is extraordinarily multifaceted, entailing study and teaching, storytelling and symbolic performance, thanksgiving and praise.

The Historical Essays-Augustin Thierry 1845

Discourses on the "Essays and Reviews" ... Reprinted from the Brighton Observer-Robert AINSLIE (Independent Minister.) 1861

Essays on the Condition of Inwardness-Frederic Will 2016-09-23 Inwardness is the condition of being inside. However, this can mean many things: one can be inside himself - dealing with his emotions, his projections, his fantasies - or with other people who become part of him as he deals with himself. One can be inside his social environment, letting himself be part of the tissue of values, reciprocations, and personal interventions that compose one's social existence. These are two quite different kinds of being inside, both of them different from being in a box or being in a prison cell, and yet each of them, in a recognizable sense, inside something. This book is concerned with inwardness in two different senses, the first as being in the center of existence, and the second as being a quest for the meaning of the center of one's existence, that is two different kinds of profoundly 'within' states. The book culminates with tales of searching for the meaning of interiority, as it self-characterizes in the inner brain of a lizard, or in the mineral constitution of the earth from which we take our lives.

Essays in the History of Mainstream Political Economy-Warren J. Samuels 2016-07-27 This book is a collection of articles on schools, individuals and topics within the mainstream of the history of economic thought. The principal schools are the Physiocrats and the English Classical Economists. The principal individuals are Francois Quesnay, Adam Smith, Thomas Malthus, Francis Y. Edgeworth, Friedrich von Wieser, Frank W. Taussig, and William H. Hutt. The principal topics include the economic role of government, power, the psychology of economics, and the early history of macroeconomics.

Essays on Kant's Political Philosophy-Howard L. Williams 1992 A collection of essays by thirteen distinguished contributors casting light on important aspects of Kant's liberal thinking.

Freedom and History and Other Essays-Richard P. McKeon 1990 This volume of essays is an important introduction to the thought of one of the twentieth century's most significant yet underappreciated philosophers, Richard McKeon. The originator of philosophical pluralism, McKeon made extraordinary contributions to philosophy, to international relations, and to theory-formation in the communication arts, aesthetics, the organization of knowledge, and the practical sciences. This collection, which includes a philosophical autobiography as well as the out-of-print title essay "Freedom and History" and a previously unpublished essay on "Philosophic Semantics and Philosophic Inquiry," is a testimony to the range and systematic power of McKeon's thinking for the social sciences and the humanities.

Equity in English Renaissance Literature-Andrew Majeske 2013-10-18 This book accounts for the previously inadequately explained transformation in the meaning of equity in sixteenth century England, a transformation which, intriguingly, first comes to light in literary texts rather than political or legal treatises. The book address the two principal literary works in which the transformation becomes apparent, Thomas More's Utopia and Edmund Spenser's Faerie Queene, and sketches the history of equity to its roots in the Greek concept of *epieikeia*, uncovering along the way both previously unexplained distinctions, and a long-obscured esoteric meaning. These rediscoveries, when brought to bear upon the Utopia and Faerie Queene, illuminate critical though relatively neglected textual passages that have long puzzled scholars.

Two Concepts of Liberty-Isaiah Berlin 1959

Essays in the History of Canadian Law: In honour of R.C.B. Risk-Philip Girard 1981-01-01 The collected essays in this volume represent the highlights of legal historical scholarship in Canada today. All of the essays refer back in some form to Risk's own work in the field.

A Social Theory of Freedom-Mariam Thalos 2016-03-17 In A Social Theory of Freedom, Mariam Thalos argues that the theory of human freedom should be a broadly social and political theory, rather than a theory that places itself in opposition to the issue of determinism. Thalos rejects the premise that a theory of freedom is fundamentally a theory of the metaphysics of constraint and, instead, lays out a political conception of freedom that is closely aligned with questions of social identity, self-development in contexts of intimate relationships, and social solidarity. Thalos argues that whether a person is free (in any context) depends upon a certain relationship of fit between that agent's conception of themselves (both present and future), on the one hand, and the facts of their circumstances, on the other. Since relationships of fit are broadly logical, freedom is a logic—it is the logic of fit between one's aspirations and one's circumstances, what Thalos calls the logic of agency. The logic of agency, once fleshed out, becomes a broadly social and political theory that encompasses one's self-conceptions as well as how these self-conceptions are generated, together with how they fit with the circumstances of one's life. The theory of freedom proposed in this volume is fundamentally a political one.

Freedom, Authority and Economics-Klaus Allerbeck 2017-03-01 The essays in this volume deal with the economic and political thought of Michael Polanyi. Requiring little prior knowledge of Polanyi, the essays in this volume further develop a somewhat neglected side of Polanyi's work. In particular it examines the 'tacit integration', of subsidiary details into focal objects or actions as central to all knowing and action. The essays in this volume trace ontological counterparts in the structures of comprehensive entities and complex actions, and a multi-level universe in which lower levels have their boundary conditions, the extents to which they apply, determined by those of the next higher level, whilst each possessing its own laws or operative principles. Private Agriculture in Armenia-Zvi Lerman 2001 This book details and analyzes an extensive farm survey of Armenian land reform. Zvi Lerman and Astghik Mirzakhanian, two principal contributors to the design of the study, present their invaluable insight into the rapid land reform strategy implemented in Armenia. Unique among the former Soviet Republics, the entire agricultural sector of this country shifted from collective, large-scale, farm enterprises to individual production in 1992. The authors pay special attention to the commercialization of private farms and their access to supply and marketing channels outside the old state-controlled system. Family incomes from farming and off-farm sources are discussed, as well as problems of rural social services and social infrastructure. The authors demonstrate how official statistical measures and record keeping practices in Armenia do not adequately account for this dramatic transition.

The Poetry and Poetics of Olga Sedakova-Stephanie Sandler 2019-02-12 Olga Sedakova stands out among contemporary Russian poets for the integrity, erudition, intellectual force, and moral courage of her writing.

After years of flourishing quietly in the late Soviet underground, she has increasingly brought her considered voice into public debates to speak out for freedom of belief and for those who have been treated unjustly.

This volume, the first collection of scholarly essays to treat her work in English, assesses her contributions as a poet and as a thinker, presenting far-reaching accounts of broad themes and patterns of thought across her writings as well as close readings of individual texts. Essayists from Russia, Ukraine, Germany, Italy, and the United States show how Sedakova has contributed to ongoing aesthetic and cultural debates. Like Sedakova's own work, the volume affirms the capacity of words to convey meaning and to change our understanding of life itself. The volume also includes dozens of elegant new translations of Sedakova's poems.

The Western Ideology and Other Essays-Andrew Gamble 2021-04-28 The Western Ideology brings together for the first time Andrew Gamble's writings on political ideas and ideologies, which illustrate the main themes of his writing in intellectual history and the history of ideas, including economic liberalism and neoliberalism, and critiques from both social democratic and conservative perspectives.

The Right and Wrong of Compulsion by the State, and Other Essays-Auberon Herbert 1978 Auberon Herbert (1838-1906) is an eloquent, forceful, and uncompromising defender of liberty—indeed, in the judgment of Richard M. Ebeling he is "one of the most important and articulate advocates of liberty in the last two hundred years." Herbert was a major participant in the profound and wide-ranging intellectual ferment of the late Victorian age. He formulated a system of "thorough" individualism that he described as "voluntaryism." To Herbert, "you will not make people wiser and better by taking liberty of action from them. A man can learn only when he is free to act." As Eric Mack writes, "Carrying natural rights theory to its logical limits, Herbert demanded complete social and economic freedom for all noncoercive individuals and the radical restriction of the use of force to the role of protecting those freedoms—including the freedom of peaceful persons to withhold support from any or all state activities." There are ten essays.

On Liberty-John Stuart Mill 2016-08-05 In his much quoted, seminal work, On Liberty, John Stuart Mill attempts to establish standards for the relationship between authority and liberty. He emphasizes the importance of individuality which he conceived as a prerequisite to the higher pleasures—the summum bonum of Utilitarianism. Published in 1859, On Liberty presents one of the most eloquent defenses of individual freedom and is perhaps the most widely-read liberal argument in support of the value of liberty.

A History of American Political Theories-Charles Edward Merriam 1928 A History of American Political Theory is a comprehensive attempt to understand the full sweep of American political thought since the founding.

Working within the liberal-progressive tradition, Merriam reviewed American political history in its entirety, from the founding down to his own day. He was not out to reduce political thought to a single element such as economics alone; his aim was to encompass the whole of modern social science. The political science of the liberal-progressive tradition has roots and assumptions that were born in this period and nurtured by scholars such as Merriam. The progressive tradition in general and Merriam in particular interpreted the rise of a new science of politics that would be required for the liberal-progressive world view he represented.

His work stands at a momentous fork in the road; two great traditions of how American democracy should be understood, interpreted, and analyzed parted company and afterward each went their separate ways. These traditions are represented, respectively, by the founders and the liberal-progressives. There was much at stake in these academic debates, though the consequences were not entirely foreseen at the time. An overview of the authors, works, and general source material covered in History of American Political Theories is impressive. Merriam viewed the study of American democracy as an eclectic activity embracing the broadest definition of the social sciences, with particular emphasis on psychology. Such a transformation required that the social sciences be grouped as a whole rather than fragmented into separate and distinct academic departments. Charles Merriam (1874-1953) was professor of political science at the University of Chicago. He served on the Research Committee on Social Trends under President Hebert Hoover and on the National Resources Planning Board under President Franklin D. Roosevelt. He is known as the father of the behavioral movement in political science and believed that theories of political process needed to be linked to practical political activity. Sidney A. Pearson, Jr. is professor emeritus of political science at Radford University. He is the series editor of Library of Liberal Thought at Transaction Publishers. In addition, he also wrote new introductions for Presidential Leadership, The New Democracy, and Party Government, all available from Transaction.

We-Yevgeny Zamyatin 2013-01-15 Yevgeny Zamyatin's We is set in an urban glass city called OneState, regulated by spies and secret police. Citizens of the tyrannical OneState wear identical clothing and are

distinguished only by the number assigned to them at birth. The story follows a man called D-503, who dangerously begins to veer from the 'norms' of society after meeting I-330, a woman who defies the rules. D-503

soon finds himself caught up in a secret plan to destroy OneState and liberate the city. The failed utopia of We has been compared to the works of H.G. Wells, George Orwell, and Aldous Huxley. It was the first novel

banned by the Soviets in 1921, and was finally published in its home country over a half-century later. We is a part of Momentum's Classic Science Fiction series. "The best single work of science fiction yet written." —

Non-Plan: Essays on Freedom, Participation and Change in Modern Architecture and Urbanism-Jonathan Hughes 2013-01-11 Non-Plan explores ways of involving people in the design of their environments - a goal which transgresses political categories of 'right' and 'left'. Attempts to circumvent planning bureaucracy and architectural inertia have ranged from free-market enterprise zones, to self-build housing, and from squatting to sophisticated technologies of prefabrication. Yet all have shared in a desire to let people shape the built environment they want to live and work in. How can buildings better reflect the needs of their inhabitants? How can cities better facilitate the work and recreation of their many populaces? Modernism had promised a functionalist approach to resolving the architectural needs of the twentieth-century, yet the design of cities and buildings often appears to confound the needs of those who use them - their design and layout being highly regulated by restrictive legislation, planning controls and bureaucracy. Non-Plan considers the theoretical and conceptual frameworks within which architecture and urbanism have sought to challenge entrenched boundaries of control, focusing on the architectural history of the post-war period to the present day. This provocative book will be of interest to architects, planners and students of architecture, design, town-planning and architectural history. Its contributors include architects, critics and historians, including many whose work helped shape the Non-Plan debate during the period. List of contributors: Cedric Price, Benjamin Franks, Elizabeth Lebas, Eleonore Kofman, Ben Highmore, Yona Friedman, Paul Barker, Clara Greed, Barry Curtis, Colin Ward, Ian Horton, John Beck, Chinedu Umenyilora and Malcolm Miles.
