

The Conquest Of Water The Advent Of Health In The Industrial Age Introduction By Emmanuel Le Roy Ladurie

The Conquest of Water-Jean-Pierre Goubert 1989 Studies the social, technological, historical, and cultural conquest of water discussing the role water plays in public and private life

The Conquest Of Nature-David Blackburn 2011-11-30 The modern idea of 'mastery' over nature always had its critics, whether their motives were aesthetic, religious or environmentalist. By investigating how the most fundamental element - water - was 'conquered' by draining fens and marshes, straightening the courses of rivers, building high dams and exploiting hydro-electric power, The Conquest of Nature explores how over the last 250 years, the German people have shaped their natural environment and how the landscapes they created took a powerful hold on the German imagination. From Frederick the Great of Prussia to Johann Gottfried Tulla, 'the man who tamed the wild Rhine' in the nineteenth century to Otto Intze, 'master dambuilder' of the years around 1900, to the Nazis who set out to colonise 'living space' in the East, this groundbreaking study shows that while mastery over nature delivers undoubted benefits, it has often come at a tremendous cost to both the natural environment and human life.

The Conquest of Nature-David Blackburn 2016-08-22 The modern idea of 'mastery' over nature always had its critics, whether their motives were aesthetic, religious or environmentalist. By investigating how the most fundamental element - water - was 'conquered' by draining fens and marshes, straightening the courses of rivers, building high dams and exploiting hydro-electric power, The Conquest of Nature explores how over the last 250 years, the German people have shaped their natural environment and how the landscapes they created took a powerful hold on the German imagination. From Frederick the Great of Prussia to Johann Gottfried Tulla, 'the man who tamed the wild Rhine' in the nineteenth century to Otto Intze, 'master dambuilder' of the years around 1900, to the Nazis who set out to colonise 'living space' in the East, this groundbreaking study shows that while mastery over nature delivers undoubted benefits, it has often come at a tremendous cost to both the natural environment and human life.

Absolute Zero and the Conquest of Cold-Tom Shachtman 2000-12-12 "A lovely, fascinating book, which brings science to life." —Alan Lightman Combining science, history, and adventure, Tom Shachtman “holds the reader’s attention with the skill of a novelist” as he chronicles the story of humans’ four-centuries-long quest to master the secrets of cold (Scientific American). “A disarming portrait of an exquisite, ferocious, world-ending extreme,” Absolute Zero and the Conquest of Cold demonstrates how temperature science produced astonishing scientific insights and applications that have revolutionized civilization (Kirkus Reviews). It also illustrates how scientific advancement, fueled by fortuitous discoveries and the efforts of determined individuals, has allowed people to adapt to—and change—the environments in which they live and work, shaping man’s very understanding of, and relationship, with the world. This “truly wonderful book” was adapted into an acclaimed documentary underwritten by the National Science Foundation and the Alfred P. Sloan Foundation, directed by British Emmy Award winner David Dugan, and aired on the BBC and PBS’s Nova in 2008 (Library Journal). “An absorbing account to chill out with.” —Booklist

The Conquest of the Ocean-Brian Lavery 2013-05-01 A captivating read spanning 5,000 years of the ocean's history Conquest of the Ocean tells the 5,000 year history of the remarkable individuals who sailed seas, for trade, to conquer new lands, to explore the unknown. From the early Polynesians to the first circumnavigations by the Portuguese and the British, these are awe-inspiring tales of epic sea voyages involving great feats of seamanship, navigation, endurance, and ingenuity. Explore the lives and maritime adventures, many with first person narratives, of land seekers and globe charters such as Christopher Columbus, Captain James Cook and Vitus Bering. Brian Lavery is a well-known British naval historian, whose prestigious credits include historical consultant on the blockbuster, Master and Commander: The Far Side of the World. This narrative history is filled with paintings, logbooks, maps, sketches and diagrams that bring these events and locations to life. In this digital version cross-references are linked directly to relevant paragraphs for easy navigation within the book. Conquest of the Ocean beautifully intertwines informative images with fascinating stories of expedition and exploration in a way that has never been done before. Brian Lavery will have you engrossed in this extraordinary historic naval read.

Naval Power in the Conquest of Mexico-C. Harvey Gardiner 2012-05-23 In this account of the naval aspect of Hernando Cortés’s invasion of the Aztec Empire, C. Harvey Gardiner has added another dimension to the drama of Spanish conquest of the New World and to Cortés himself as a military strategist. The use of ships, in the climactic moment of the Spanish-Aztec clash, which brought about the fall of Tenochtitlán and consequently of all of Mexico, though discussed briefly in former English-language accounts of the struggle, had never before been detailed and brought into a perspective that reveals its true significance. Gardiner, on the basis of previously unexploited sixteenth-century source materials, has written a historical revision that is as colorful as it is authoritative. Four centuries before the term was coined, Cortés, in the key years of 1520–1521, used the technique of “total war.” He was able to do so victoriously primarily because of his courage in taking a gamble and his brilliance in tactical planning, but these qualities might well have signified nothing without the fortunate presence in his forces of a master shipwright, Martín López. As the exciting story unfolds, Cortés, López, and the many other participants in the venture of creating and using a navy in the midst of the New World mountains and forests are seen as real personalities, not embalmed historical stereotypes, and the indigenous defenders are revealed as complex human beings facing huge odds. Much of the tale is told in the actual words of the protagonists; Gardiner has probed letters, court records, and other contemporary documents. He has also compared this naval feat of the Spaniards with other maritime events from ancient times to the present. Naval Power in the Conquest of Mexico as a book was itself the result of an interesting combination of circumstances. C. Harvey Gardiner, as teacher, scholar, and writer, had long been interested in Latin American history generally and Mexican history in particular. During World War II, from 1942 to 1946, he served with the U.S. Navy. As he relates: “One day in early autumn 1945, while loafing on the bow of a naval vessel knifing its way southward in the Pacific a few degrees north of the Equator, my thoughts turned to the naval side of the just-ended conflict, and in time the question emerged, ‘I wonder how the little ships and the little men will fare in the eventual record?’ Then, because I was eager to return to my civilian life of pursuit of Latin American themes, the concomitant question came: ‘I wonder what little fighting ships and minor men of early Latin America have been consigned to the oblivion of historical neglect?’ As I began later to rummage my way from Columbus toward modem times, I seized upon the Mexican Conquest as the prime period with ship dirt for the researcher in quest of the answer to that latter question.”

A New History of the Conquest of Mexico-Robert Anderson Wilson 1859

A New History of the Conquest of Mexico. In which Las Casas' Denunciations of the Popular Historians of that War are Fully Vindicated. 3rd Ed-Robert Anderson Wilson 1861

"A" Chronicle of the Conquest of Granada-Washington Irving 1850

The Works of Washington Irving ...: A chronicle of the conquest of Granada; Legends of the conquest of Spain-Washington Irving 1866

The Social Conquest of Earth-Edward O. Wilson 2012-04-09 New York Times Bestseller From the most celebrated heir to Darwin comes a groundbreaking book on evolution, the summa work of Edward O. Wilson's legendary career. Sparking vigorous debate in the sciences, The Social Conquest of Earth upends “the famous theory that evolution naturally encourages creatures to put family first” (Discover). Refashioning the story of human evolution, Wilson draws on his remarkable knowledge of biology and social behavior to demonstrate that group selection, not kin selection, is the premier driving force of human evolution. In a work that James D. Watson calls “a monumental exploration of the biological origins of the human condition,” Wilson explains how our innate drive to belong to a group is both a “great blessing and a terrible curse” (Smithsonian). Demonstrating that the sources of morality, religion, and the creative arts are fundamentally biological in nature, the renowned Harvard University biologist presents us with the clearest explanation ever produced as to the origin of the human condition and why it resulted in our domination of the Earth’s biosphere.

The True History of the Conquest of New Spain-Alfred Percival Maudslay 2010-07-28 Books V-IX (1519-20) translated into English and edited, with introduction and notes, by Alfred Percival Maudslay, M.A., Hon. Professor of Archaeology, National Museum, Mexico, concerning the march to Mexico, the stay there, the expedition against Narvaez, the flight from Mexico, and the halt at Tepeaca. Together with the text descriptive of the maps and plans of the valley and city of Mexico, originally published separately in vol. 25 Follows on from Second Series 23, and continued in 30, and 40. This is a new print-on-demand hardback edition of the volume first published in 1910.

The Conquest of Mexico-Hernán Cortés 1760

History of the Conquest of Mexico-Prescott 1847

History of the Conquest of Mexico-William Hickling Prescott 1845

History of the Conquest of Mexico with a Preliminary View of the Ancient Mexican Civilization and the Life of the Conqueror Hernando Cortés-William Hicking Prescott 1844

Disease and Empire-Philip D. Curtin 1998-05-28 Before the nineteenth century, European soldiers serving in the tropics died from disease at a rate several times higher than that of soldiers serving at home. Then, from about 1815 to 1914, the death rates of European soliders, both those serving at home and abroad, dropped by nearly 90%. But this drop applied mainly to soliders in barracks. Soldiers on campaign, especially in the tropics, continued to die from disease at rates as high as ever, in sharp contrast to the drop in barracks death rates. This book, first published in 1998, examines the practice of military medicine during the conquest of Africa, especially in the 1880s and 1890s. Curtin examines what was done, what was not done, and the impact of doctors' successes and failures on the willingness of Europeans to embark on imperial adventures.

The Conquest of Canada-George Warburton 1850

The Conquest of India by the Church-Sendal Barnes Munger 1845

Kropotkin: 'The Conqast of Bread' and Other Writings-Pierre Kropotkine 1995-08-10 An edition of Kropotkin's major work plus several of his shorter writings.

The Conquest of the Reich-Robin Neillands 1997-03-01 Chronicling the last five months of Hitler's Thousand Year Reich from the viewpoints of those who were there, a detailed narrative draws on interviews, letters, and eyewitness accounts of Allied and Axis soldiers and citizens

Water Communication-Celine Herve-Bazin 2014-04-14 Water Communication aims at setting a first general outlook at what communication on water means, who communicates and on what topics. Through different examples and based on different research and contributions, this book presents an original first overview of “water communication”. It sets its academic value as one distinct scientific domain and provides tips and practical tools to professionals. The book contributes to avoid mixing messages, targets and discourses when setting communication related to water issues. The book facilitates coordination within the water sector and its organizations as water is a wide field of applications where inadequate words and language understanding between its stakeholders is one of the main obstacles today. Water Communication provides and describes: a general outlook and retrospective of the history of the water sector in terms of communication the landscape of organizations communicating on water and classification of topics the differences between communication, information, mediation, raising awareness examples of communication campaigns on water Water Communication is a vital resource for communication managers, utility managers, policy makers involved in water management and students in water sciences and environment. Colour figures from the book are available to view on the WaterWiki at: http://www.iwaterwiki.org/xwiki/bin/view/Articles/WaterCommunicationAnalysisofStrategiesandCampaignsfromtheWaterSector Editor: Celine Herve-Bazin, Celsa - Sorbonne University, Paris, France

The Conquest of New Eden/Sins of the Father-Larry W. Miller 2005-10 The Conquest of New Eden: A lonely scientist, working for the old NASA, finds a possible solution to the overcrowding of Earth. Can Alexander, and his companion, Morton convince the authorities that his invention will work? If not, then someone else will claim the colony planet while the rest of humanity starves to death. Sins of the Father: The son of a powerful world leader, Magnus Alexis, has stolen incriminating evidence from his father's office. Now he must run for his life or face the wrath of the most powerful man in the sector. Could the information he stole save his life?

Conquest of the Useless-Werner Herzog 2010-07-27 "Hypnotic....It is ever tempting to try to fathom his restless spirit and his determination to challenge fate." —Janet Maslin, New York Times Werner Herzog (Grizzly Man) is one of the most revered and enigmatic filmmakers of our time, and Fitzcarraldo is one of his most honored and admired films. More than just Herzog’s journal of the making of the monumental, problematical motion picture, which involved, among other things, major cast changes and reshoots, and the hauling (without the use of special effects) of a 360-ton steamship over a mountain , Conquest of the Useless is a work of art unto itself, an Amazonian fever dream that emerged from the delirium of the jungle. With fascinating observations about crew and players—including Herzog’s lead, the somewhat demented internationally renowned star Klaus Kinski—and breathtaking insights into the filmmaking process that are uniquely Werner Herzog, Conquest of the Useless is an eye-opening look into the mind of a cinematic master.

Power, Nature, and the City-Erik Swyngedouw 1997

Journal of the Polynesian Society- 1894

Our Conquest-Gert Hofmann 1991

Sociological Studies in Roman History-Keith Hopkins 2017-10-31 Collected essays by Cambridge sociologist Keith Hopkins - one of the most radical, innovative and influential Roman historians of his generation.

Conquest-John Connolly 2014-02-11 Depicts a world where humanity has been conquered by oppressive alien forces and where a group of increasingly powerful young rebels is assisted by an alien ruler's daughter, who risks her life after falling in love with a human.

History of Germany 1780-1918-David Blackburn 2002-10-11 This history offers a powerful and original account of Germany from the eve of the French Revolution to the end of World War One. Written by a leading German historian who has transformed the historiography of modern Germany over the past two decades. Covers the whole of the long nineteenth century and emphasizes continuities through this period. Brings together political, social and cultural history. Combines a comprehensive account with a feel for the human dimension and the history of everyday life. Accessible to non-specialists, thought-provoking and entertaining. The updated second edition includes a revised bibliography.

A Short History of the English People-John Richard Green 1889

Provocation-R K Knightly 2020-09-21 Love and hate. There's a fine line between them, and Nate and Leila have tested it for far too long. Nate has always tried to mask the depth of his feelings for Leila for one reason-she's his little sister's best friend and a royal pain in his ass. Leila always looked up to Nate until he became someone she wanted nothing to do with-the rich, entitled elite. If they only knew their love-hate relationship was just the beginnings of their problems. "Says the Whore of Babylon." Nate ground out. "I'm not a whore." Leila spat. "I'm...relationship challenged." "Meaning?" "Meaning that I don't waste my time on one man if I know off the bat that he and I won't work." Leila drawled, irritated. "Maybe if you gave them more than one night you'd find you were acting too hastily. Or possibly date them before f***ing them. How novel an idea that is, eh?" "Why does my sex life interest you so much?" Leila asked. "Is yours so dull that you have to snoop around mine to live vicariously through me, or do you simply enjoy demeaning women for sport? Perhaps that's why all your ex-girlfriends left you. Or maybe because your d**k's minuscule compared to your inflated ego." "At least I'm not a gaping crevasse threatening to suck in the population of the Bay Area with the gravitational pull your cavernous p***y maintains. I'm a bit concerned at my proximity to it, to be honest." "I'm done with this bulls**." Leila slammed her drink down on the nearest flat surface before heading toward the door of the sitting room.

The Death of Aztec Tenochtitlan, the Life of Mexico City-Barbara E. Mundy 2015-07-15 "In 1325, the Aztecs founded their capital city Tenochtitlan, which grew to be one of the world’s largest cities before it was violently destroyed in 1521 by conquistadors from Spain and their indigenous allies. Re-christened and reoccupied by the Spanish conquerors as Mexico City, it became the pivot of global trade linking Europe and Asia in the 17th century, and one of the modern world’s most populous metropolitan areas. However, the Aztec city of Tenochtitlan and its people did not entirely disappear when the Spanish conquistadors destroyed it. By reorienting Mexico City-Tenochtitlan as a colonial capital and indigenous city, Mundy demonstrates its continuity across time. Using maps, manuscripts, and artworks, she draws out two themes: the struggle for power by indigenous city rulers and the management and manipulation of local ecology, especially water, that was necessary to maintain the city's sacred character. What emerges is the story of a city-within-a city that continues to this day"--

Monuments of Progress-Claudia Agostoni 2003 In this groundbreaking book, Claudia Agostoni examines modernization in Mexico City during the era of Porfirio Díaz. She outlines the relationship of "enlightened" ideals of orderliness and hygiene to Mexican initiatives in public health. The implementation of new health policies and programs - such as the construction of a drainage system for the Valley of Mexico - were of utmost importance for the symbolic legitimization of Porfirio Díaz's durable regime (1876-1910), which emphasized modernization over individual rights and liberties. Thus, projects involving drastic engineering measures, authoritarian sanitary administration, and urban improvements were paramount in transforming the city into a healthy environment. Providing detailed analyses of the objectives and activities of the Superior Sanitation Council and, in particular, the work of the sanitary inspectors, Monuments of Progress provides a fresh take on the history of medicine and public health, shifting the emphasis away from the history of epidemic disease and the heroes of medicine to public health in a broader social framework. Agostoni's unique study builds on a small but fast-growing body of literature on the history of public health in Latin America, and it will appeal to scholars with an interest in medical history, urban history, and the history of nineteenth-century Mexico. Born in Mexico City, Claudia Agostoni earned her Ph.D. in Latin American cultural studies from King's College London, University of London. She is currently a full-time researcher at the Instituto de Investigaciones Históricas at Universidad Nacional Autónoma de México and lectures in Latin American colonial history.

Yucatan Before and After the Conquest-Diego de Landa 2012-05-23 Describes geography and natural history of the peninsula, gives brief history of Mayan life, discusses Spanish conquest, and provides a long summary of Maya civilization. 4 maps, and over 120 illustrations.

A Short History of the English People-John Richard Green 1907

Frank Merton's Conquest- 187?

Water-Giulio Boccaletti 2021-09-14 Spanning millennia and continents, here is a stunningly revealing history of how the distribution of water has shaped human civilization. Boccaletti, of The Nature Conservancy, “tackles the most important story of our time: our relationship with water in a world of looming scarcity” (Kelly McEvers, NPR Host). Writing with authority and brio, Giulio Boccaletti—honorary research associate at the Smith School of Enterprise and the Environment, University of Oxford—shrewdly combines environmental and social history, beginning with the earliest civilizations of sedentary farmers on the banks of the Nile, the Tigris, and the Euphrates Rivers. Even as he describes how these societies were made possible by sea-level changes from the last glacial melt, he incisively examines how this type of farming led to irrigation and multiple cropping, which, in turn, led to a population explosion and labor specialization. We see with clarity how irrigation’s structure informed social structure (inventions such as the calendar sprung from agricultural necessity); how in ancient Greece, the communal ownership of wells laid the groundwork for democracy; how the Greek and Roman experiences with water security resulted in systems of taxation; and how the modern world as we know it began with a legal framework for the development of water infrastructure. Extraordinary for its monumental scope and piercing insightfulness, Water: A Biography richly enlarges our understanding of our relationship to—and fundamental reliance on—the most elemental substance on earth.

International Organizations in Global Social Governance-Kerstin Martens 2021-04-06 International Organizations (IOs) are important actors within global social governance. They provide forums for exchange, contention and cooperation about social policies. Our knowledge about the involvement of IOs varies significantly by policy fields, and we know comparatively little about the specific roles of IOs in social policies. This volume enhances and systematizes our understanding of IOs in global social governance. It provides studies on a variety of social policy fields in which different, but also the same, IOs operate. The chapters shed light on IO involvement in a particular social policy field by describing the population of participating IOs; exploring how a particular global social policy field is constituted as a whole, and which dominant IOs set the trends. The contributors also examine the discourse within, and between, these IOs on the respective social policies. As such, this first-of-its kind book contributes to research on social policy and international relations, both in terms of theoretical substantiation and empirical scope.

The Chaos of Empire-Jon Wilson 2016-10-25 The popular image of the British Raj-an era of efficient but officious governors, sycophantic local functionaries, doting amahs, blisteringly hot days and torrid nights-chronicled by Forster and Kipling is a glamorous, nostalgic, but entirely fictitious. In this dramatic revisionist history, Jon Wilson upends the carefully sanitized image of unity, order, and success to reveal an empire rooted far more in violence than in virtue, far more in chaos than in control. Through the lives of administrators, soldiers, and subjects-both British and Indian-The Chaos of Empire traces Britain's imperial rule from the East India Company's first transactions in the 1600s to Indian Independence in 1947. The Raj was the most public demonstration of a state's ability to project power far from home, and its perceived success was used to justify interventions around the world in the years that followed. But the Raj's institutions-from law courts to railway lines-were designed to protect British power without benefiting the people they ruled. This self-serving and careless governance resulted in an impoverished people and a stifled society, not a glorious Indian empire. Jon Wilson's new portrait of a much-mythologized era finally and convincingly proves that the story of benign British triumph was a carefully concocted fiction, here thoroughly and totally debunked.
