2003 Never in history have 1,322 words held out such extraordinary determination to be free as those found in the Declaration of Independence. In 1787, "We the people" were the three words that not only engendered a new and cohesive nation; they went on to change the face of the world as well. In 1791, the first ten Amendments to the Constitution of the United States of America, known to us as the Bill of Rights introduced the world to the concept of those singular rights that ought to belong to every free individual. In one compact volume, the full texts of both the Declaration of Independence and the Constitution of the United States of America with all ratified twenty-seven Amendments to the Constitution are side-by-side--along with another of America's seminal documents, Thomas Jefferson's Virginia Statute for Religious Freedom, an additional world-changing statement that codified for the first time that one cannot be required by law to support or prefer any belief or be punished for those one does profess--and the basis for what we have come to know as the "wall of separation" between church and state. Who we are and what we are free to be as citizens of the United States of America is contained between these covers. Cass R. Sunstein prefaces the volume with a succinct history and interpretation of the place and meaning of both the Declaration and the Constitution in American life. Enhanced by an index and suggestions for further reading, this volume, small in size but overwhelming in the impact of its contents, belongs in the home of every citizen of the United States.

2012-10-22 Jack N. Rakove Here in a newly annotated edition are the two founding documents of the United States of America: the Declaration of Independence (1776), our great revolutionary manifesto, and the Constitution (1787-88), in which "We the People" forged a new nation and built the framework for our federal republic. Together with the Bill of Rights and the Civil War amendments, these documents constitute what James Madison called our "political scriptures" and have come to define us as a people. Now a Pulitzer Prize-winning historian serves as a guide to these texts, providing historical contexts and offering interpretive commentary. In an introductory essay written for the general reader, Jack N. Rakove provides a narrative political account of how these documents came to be written. In his commentary on the Declaration of Independence, Rakove sets the historical context for a fuller appreciation of the important preamble and the list of charges leveled against the Crown. When he glosses the Constitution, the Bill of Rights, and the subsequent amendments, Rakove once again provides helpful historical background, targets language that has proven particularly difficult or controversial, and cites leading Supreme Court cases. A chronology of events provides a framework for understanding the road to Philadelphia. The general reader will not find a better, more helpful guide to our founding documents than Jack N. Rakove.

1976 United States

2010-12-01 Presented here for the first time in one volume are the three founding documents of the United States and another that altered and divided the Union for a brief moment in history. Declaration of Independence: Adopted by the Second Continental Congress on July 4, 1776, this may be the most famous angry letter in history. Written by Thomas Jefferson and addressed to King George III of England, it lays out the grievances of the king's 13 colonies in North America, and announces that those colonies were now free of English rule. By 1783, after a long, bloody, and expensive war, that freedom became a reality. Articles of Confederation: Soon after independence from England was declared, the Second Continental Congress instituted this first organizing document of the new United States, which was ratified in March 1781. A compromise between those

delegates who wanted a strong central government and those who demanded that the states be sovereign, its shortcomings became obvious during the war--such as the fact that the central government had no power to collect taxes or even to enforce requests for funds from the states, which led to a perpetually underfunded revolution against England. United States Constitution: This document replaced the Articles of Confederation on June 21, 1788. One of the most influential works of political philosophy and practicality ever written, it is the oldest national constitution still in use today, and continues to inspire freedom-loving peoples around the world. Its three-pronged system of government--balancing power among legislative, judicial, and executive branches--was groundbreaking. But it failed to address one issue, slavery, that would come to a head a century later. Constitution of the Confederate States: This 1861 document organized the new nation created by the seceding slave states. While quite similar in many ways to the U.S. Constitution, it includes more references to God and religion and more emphasis on state sovereignty, offers specific clauses that seek to limit the influence of big business on politics, and codifies the right to own "negro slaves." Together, these four documents offer a firsthand perspective on the political history of the United States.

1925 U.S. Declaration of independence

2006 United States

1998-07-01 Together in one book, the two most important documents in United States history form the enduring legacy of America's Founding Fathers including Thomas Jefferson, James Madison, and Alexander Hamilton. The Declaration of Independence was the promise of a representative government; the Constitution was the fulfillment of that promise. On July 4, 1776, the Second Continental Congress issued a unanimous declaration: the thirteen North American colonies would be the thirteen United States of America, free and independent of Great Britain. Drafted by Thomas Jefferson,

the Declaration set forth the terms of a new form of government with the following words: "We hold these Truths to be self-evident, that all men are created equal, that they are endowed with certain unalienable Rights, that among these are Life, Liberty, and the Pursuit of Happiness." Framed in 1787 and in effect since March 1789, the Constitution of the United States of America fulfilled the promise of the Declaration by establishing a republican form of government with separate executive, legislative, and judicial branches. The first ten amendments, known as the Bill of Rights, became part of the Constitution on December 15, 1791. Among the rights guaranteed by these amendments are freedom of speech, freedom of the press, freedom of religion, and the right to trial by jury. Written so that it could be adapted to endure for years to come, the Constitution has been amended only seventeen times since 1791 and has lasted longer than any other written form of government.
