Consulting Process as Drama-Erik de Haan 2004 "Drawing comparisons between consultancy and the classical tragedy, King Lear, the author explores the core theme of responsibility. Fearless Consulting-Erik de Haan 2006-06-14 The history of consulting dates back to the original 'intervention' of the serpent in the Garden of Eden, and today's consultants have just as dubious a reputation. They are tempted by flattery and over-assessment of their abilities, and run the risks of uncertainty, responsibility without authority and loss of control. In order to steer a middle course, they must understand their own intention as consultants. Fearless Consulting clearly demonstrates that, in spite of the many risks and temptations, consultants can approach their profession and clients fearlessly, and offers a range of philosophical inspirations for readers as well as specific intervention models and practical methodologies.

The Consulting Process as Drama-Erik De Haan 2018-06-27 Drawing comparisons between consultancy and the classical tragedy King Lear, the author explores the core theme of responsibility. Arguing that King Lear is vital in gaining an understanding of consulting, leadership and management, the author explores in detail the positive lessons to be learnt from this tragedy for the manager and the management consultant. An intriguing premise that uncovers key strategies for managers. This book gives a summary of key issue in management consulting, in a step-by-step chronological way. However, it is directed mainly at those consultants who know from experience that consulting does not work as smoothly as the manuals suggest, and who have learned through trials and tribulations to take a tragic outlook on the art of consulting.

Relational Coaching-Erik de Haan 2011-03-03 Manfred Kets de Vries, Professor of Leadership Development, INSEAD: "The author takes us on an exciting journey to explain what coaching is all about, providing us with a roadmap that is second to none. Anyone interested in better understanding what coaching is all about, would do well to have a serious look at this book." David Megginson, Professor of Human Resources Development, Sheffield Hallam University: "From a vivid personal story just before the first chapter to the fascinating mass of data in the appendices, this book is a captivating read about the concrete particulars of coaching and the theoretical perspectives we can use to make sense of them. Erik de Haan makes a case for relational coaching and prescribes clearly what his research and the tradition within which it is embedded can tell practitioners in the field." Bruce E. Wampold, Professor of Counseling Psychology, University of Wisconsin: "I am thrilled that there is a coaching book that emphasizes the coachee and the relationship. In Relational Coaching, Erik de Haan places the emerging profession on a strong foundation that emphasizes the interpersonal aspects of the endeavour." Relational Coaching is a radically different way of looking at coaching that puts the relationship, from the perspective of the coachee, at the centre. Exploring both age-old tradition and reliable studies in recent decades, Relational Coaching gives the modern executive coach ten commandments to help improve his or her practice. The book demonstrates how each of these commandments is underpinned by sound quantitative research. The book begins by giving a complete overview of the profession and the latest developments in coaching. The second part of the book presents new quantitative and

qualitative research into effects and experiences of coaching. Part three contains an introduction to the activities that make a good coach and the mechanisms used to verify coaches' understanding of their profession. Other topics covered include training, accreditation, supervision and recommended literature.

Entrepreneurial Literary Theory-Alexander Search 2017-07-04 Across the world at present, researchers and teachers are being exhorted to become entrepreneurial. Universities are being restructured accordingly. The debate presented in this book considers what that involves and portends for academia. Literary studies are often regarded as the most resistant to - unfit for - entrepreneurial purposes. Literary research is therefore taken as a baseline for this debate. The uneasy place of literary research within profit-driven academia is revealing of the prevailing conditions for scholarship in all areas. Questions that are raised and discussed here include: What does doing research for the public good mean? What is the relationship between profits and benefits from research? What are applied and basic research? Are concepts of academic freedom and disinterestedness meaningful? What is the relationship between corporate and academic research? Are skills and knowledge different? Can pursuits like close reading and text interpretation be made profitable? What is literary value and how can it be measured? Can the literary system be modelled to profitable ends? Can university teaching be automatized? What are the differences between a standard publication agreement and a scholarly publication agreement? How can digital and open-access academic publication be made profitable? Does the academic monograph have a future? What sorts of knowledge and skills inform entrepreneurial leadership?

Narrative and Discursive Approaches in Entrepreneurship-Chris Steyaert 2005-01-01 . . . the four books comprising the series would certainly be a valuable addition to any entrepreneurship library. However, each book also stands alone as an individual purchase. Lorraine Warren, International Journal of Entrepreneurial Behaviour and Research The book delivers what it promises: a map of the uses of narrative methods in entrepreneurship studies. It is both an interesting contribution to the

field and an important methodological handbook for all entrepreneurship researchers who are thinking of adopting qualitative methods in their inquiries. However, it may also be read with advantage by other researchers using ethnography as their main methodological approach to social studies. . . The aim of the book is to show how narratives can enrich entrepreneurship studies, a goal that in my opinion is aptly fulfilled. Monika Kostera, *Scandinavian Journal of Management* . . . the contributors in this text breathe fresh and imaginative linguistic resources and narrative/discursive frames of reference into the inquiry of entrepreneurial activities. The anecdote, the narrative, the metaphorical, the discursive and the dramaturgical are significant therefore, not only because they bring to the surface voices, emotions, processes and the relationality of (everyday) entrepreneurial activity that have possibly been previously silenced. But also, to paraphrase Steyaert, these approaches highlight the controversial and interactive aspects of the research process. . . The text is welcome because it treats narrative in a serious and scholarly way. Denise Fletcher, *International Small Business Journal* In their edited book *Narrative and Discursive Approaches in Entrepreneurship*, Daniel Hjorth and Chris Steyaert provide a fascinating glimpse into a perspective on entrepreneurship that will be enlightening for many readers. Entrepreneurship authors typically talk about theory, methods, and data as if a straight-forward linear process united them all, and making sense of entrepreneurship was simply a matter of knowing how to interpret one's findings . By contrast, the authors in this volume propose narrative and discursive approaches in which the contributing authors emphasize rich description, reflexive conceptualization, and interpretations offered as part of the story itself. They draw upon an international set of cases, including Russia, Sweden, Denmark, Norway, Venezuela, and North America. The cases themselves make for fascinating reading, quite apart from what we learn about the difficulties of imposing a particular interpretation on a given story. For example, taxi drivers in Caracas, management consultants in Denmark, and women entrepreneurs in northern Norway all make for fascinating narratives from which to understand the entrepreneurial process. Unlike many edited books which have no plot , the editors have included opening and closing sections that link the chapters, offer alternative readings of them, and propose new and expansive ways of thinking about entrepreneurship. Howard Aldrich, University of North Carolina at Chapel Hill, US Daniel Hjorth and Chris Steyaert set out to advance the study of entrepreneurship by refocusing the lens of discovery from economics, management and marketing to other paradigmatic stances in social sciences and humanities like anthropology and literary studies. The result is a provocative collection of chapters that inspire the reader to consider and explore new ideas and research practice that incorporate both the context and place of entrepreneurship. From the perceptive insights of the editors to the rigorous and provocative discourse of the chapters and thoughtful responses in the conclusion emerges a story, in the best of storytelling tradition, about how a linguistic turn can rouse new insights. The editors ask, how do these texts move you? they entice, provoke, challenge, stimulate and guide. Their implications should be far reaching and required reading for any student of t

Drama Themes, Schemes, and Dreams- This book "offers a comprehensive outline of improvisation and interpretation strategies that teachers can incorporate in classroom instruction."--P. [4] of cover. *Managing Consultants*-Clark, Timothy 1995-11-01 Managers are increasingly being convinced from all sides that traditional structures, systems and cultures are no longer appropriate to today's competitive conditions; and that organizations must change fundamentally. It is in the context of these pressures that managers feel it increasingly necessary to seek external support by turning to those who offer some solution to these dilemmas - the management consultants. This book argues that the initial selection of a management consultancy and the subsequent evaluation of the quality of service they deliver are inherently problematic. Two root causes are identified: the structure and dynamics of the management consultancy industry; and the characteristics of the management consultancy service. Timothy Clark examines how these problems are overcome by revealing the foundations of a successful and long-term client-consultant relationship. In a departure from previous analyses of management consultancy he argues that the key to understanding consultancy and its success is to appreciate that successful consultancy, in its methods at least, emphasizes the active management of the client-consultant relationship. At the core of successful consultancy is the art of impression management. A consultant seeks to create a reality which persuades the client that they have purchased a high-quality service. The work of consultants is analysed and understood in terms of the theatrical analogy or dramaturgical metaphor. A consultancy intervention is therefore conceived of as a dramatic event. This is illustrated with reference to two types of consultancy work - executive search (i.e. headhunting) and the work of management gurus.

EBOOK: Supervision in Action: A Relational Approach to Coaching and Consulting Supervision-Erik de Haan 2012-02-16 "The book is pragmatic and honest, offering rich vignettes to demonstrate application of both simple and complex concepts to the supervision process. This is likely to be a useful read for coaches and consultants alike. De Haan's relational model brings a fresh focus and adds further depth to existing supervision frameworks. The indepth exploration and exposition of this framework is refreshing and informative. With contributions from leaders in the field, the book is further enhanced by a clear positioning of the benefits of supervision process for organisational consultants. De Haan explicitly recognises the complexity of working with people in organisations, working with what is emerging, and positions learning as an ongoing enquiry." Dr Alison Whybrow, i-coach academy Ltd "The distinct contribution of de Haan's book to the coaching profession lies in the focus on the psychodynamic relationship in supervision. The detailed explanation and exploration

of the phenomena of transference and parallel process through numerous case examples, provides a rich source of learning and growth for both Supervisor and Supervisee. Especially valuable for a Supervisee as it offers a sound and deep understanding of what can be gained from the supervision relationship and the resulting impact on the coaching/consulting relationship." John Leary-Joyce, CEO Academy of Executive Coaching, EMCC UK President "De Haan offers a fresh pair of lenses to consider supervision as a tool for coach development. This excellent title, which combines theory with practical case studies, is recommended reading for those interested in supervision and reflective practice." What Lies Beneath-Trevor Hough 2021-06-01 This book looks beyond the public face and below the surface of organisations. Using a deceptively easy-to-read and accessible narrative concerning eight international organisations, it covers many fields: real estate, banking, finance, retail, market research, wildlife reserve, fashion, and IT. Each case presents a particular situation or event ranging from dealing with conflict to working with culture and team dynamics. Opened by an incisive foreword from Vega Zagier Roberts, there comes a clear introduction of the authors' journey so far within the field of organisation development. Each compelling story demonstrates the complexity of working with organisational problems. The supervision conversations captured within clearly show how consultants can get caught up in and derailed by the dynamics of the organisational system. This book is written for those who work in and with organisations - for founders and executives, for leaders and managers, and especially for other organisational consultants and those who work with or are considering working with them. Through these accounts, the authors encourage interest and curiosity in a way of working with what lies beneath the surface.

Distracted Subjects-Carol Thomas Neely 2018-08-06 In the first book to provide a feminist analysis of early modern madness, Carol Thomas Neely reveals the mobility and heterogeneity of discourses of "distraction," the most common term for the condition in late-sixteenth- and early seventeenth-century England. Distracted Subjects shows how changing ideas of madness that circulated through medical, dramatic, and political texts transformed and gendered subjectivities. Supernatural causation is denied, new diagnoses appear, and stage representations proliferate. Drama sometimes leads and sometimes follows other cultural discourses—or forges its own prophetic figures of distraction. The Spanish Tragedy first links madness to masculine tragic self-representation, and Hamlet invents a language to dramatize feminine somatic illness. Innovative women's melancholy is theorized in medical and witchcraft treatises and then elaborated in the extended portrait of the Jailer's Daughter's distraction in *The Two Noble Kinsmen*. Lovesickness, newly diagnosed in women, demands novel cures, and allows expressions of transgressive sexual desire in treatises and in plays such as *As You Like It*. The rituals of possession and exorcism, intensely debated off stage, are mocked and exploited on stage in reiterated comic scenes of confinement that madden men to enhance women's power. Neely's final chapter provides a startling challenge to the critically alluring analogy between Bedlam and the early modern stage by documenting that Bethlem hospital offered care, not spectacle, whereas stage Bedlamites served metatheatrical and prophylactic, not mimetic, ends. An epilogue places this particular historical moment within the longer history of madness and shows how our own attitudes toward distraction are haunted by those earlier debates and representations.
