Stephanie Doyle How far would her competition go to win a million dollars? Lying? Cheating? Murder? That's what former Olympic diver Talia Mooney feared when the body washed up on the site of the Ultimate Endurance reality TV show. Now she was stranded on a tropical island with her fellow contestants and their nervous host. One of them had to be the killer. Was it the wannabe starlet, the underweight geek, the man having a midlife crisis? Could it be her strongest competition, the sexy smart-ass ex-cop? Talia had counted on her honed body and ferocious desire to win to pull her through. Now she must decide whom to trust -- and how to beat the killer at his own game.... Chain Lightning - Elizabeth Lowell Strangers in paradise... Damon Sutter had set out to explore the Great Barrier Reef. Instead, his dreams of adventure took an unexpected twist with Mandy Blythe's arrival. Their association was supposed to be strictly business; yet she was too smart and independent to suit him. But avoiding her was difficult, and watching her had become better than any dream. Though Mandy had been tricked into going to Australia, she'd never been fooled by Sutter. He was a womaniser who'd left a string of broken hearts across several continents, making him the last man she had expected to fall for. But the tropics created a different world, and paradise was only a heartbeat away.

The Legends of Thamaturga-H. C. Macdonald 2017-01-12 It has been three years since the war ended and Leon is getting pressure to begin the mating process. In tradition of the village, a series of challenges and obstacles will decide a worthy mate. Leon has his favorite, but Sanna has other ideas. Sanna's plan only brings more questions, and chaos. Will the right woman be the winner?

☐☐(The Contestant)-Catherine Lea 2016 "Dark, twisted and seductive?it's hard not to be drawn in by THE CONTESTANT."

?Simon Wood, author of PAYING THE PIPER Raymond is a serial killer - brilliant and resourceful. Once a respected behavioural analyst and profiler, a hit-and-run accident five years ago left him confined to a wheelchair, and now he scratches out a living with online contests using fake or stolen identities. A \$10million online treasure hunt could be his salvation. But the moment he registers for the competition, the first email arrives - someone out there knows him, knows who he is, and where the bodies are buried. Now, in Raymond's sick and twisted mind, there's only one way to find his blackmailer and put an end to the threats: play the game, follow the treasure hunt clues and find the one person who can stop him. Big Data, Data Mining, and Machine Learning-Jared Dean 2014-05-27 With big data analytics comes big insights into profitability Big data is big business. But having the data and the computational power to process it isn't nearly enough to produce meaningful results. Big Data, Data Mining, and Machine Learning: Value Creation for Business Leaders and Practitioners is a complete resource for technology and marketing executives looking to cut through the hype and produce real results that hit the bottom line. Providing an engaging, thorough overview of the current state of big data analytics and the growing trend toward high performance computing architectures, the book is a detail-driven look into how big data analytics can be leveraged to foster positive change and drive efficiency. With continued exponential

growth in data and ever more competitive markets, businesses must adapt quickly to gain every competitive advantage available. Big data analytics can serve as the linchpin for initiatives that drive business, but only if the underlying technology and analysis is fully understood and appreciated by engaged stakeholders. This book provides a view into the topic that executives, managers, and practitioners require, and includes: A complete overview of big data and its notable characteristics Details on high performance computing architectures for analytics, massively parallel processing (MPP), and in-memory databases Comprehensive coverage of data mining, text analytics, and machine learning algorithms A discussion of explanatory and predictive modeling, and how they can be applied to decision-making processes Big Data, Data Mining, and Machine Learning provides technology and marketing executives with the complete resource that has been notably absent from the veritable libraries of published books on the topic. Take control of your organization's big data analytics to produce real results with a resource that is comprehensive in scope and light on hyperbole. House Journal-New Mexico. Legislative Assembly. The History of Mathematics-Roger L. Cooke 2011-02-14 This new edition brings the fascinating and intriguing history of mathematics to life The Second Edition of this internationally acclaimed text has been thoroughly revised, updated, and reorganized to give readers a fresh perspective on the evolution of mathematics. Written by one of the world's leading experts on the history of mathematics, the book details the key historical developments in the field, providing an understanding and appreciation of how mathematics influences today's science, art, music, literature, and society. In the first edition, each chapter was devoted to a single culture. This Second Edition is organized by subject matter: a general survey of mathematics in many cultures, arithmetic, geometry, algebra, analysis, and mathematical inference. This new organization enables students to focus on one complete topic and, at the same time, compare how different cultures approached each topic. Many new photographs and diagrams have been added to this edition to enhance the presentation. The text is divided into seven parts: The World of Mathematics and the Mathematics of the World, including the origin and prehistory of mathematics, cultural surveys, and women mathematicians Numbers, including counting, calculation,

ancient number theory, and numbers and number theory in modern mathematics Color Plates, illustrating the impact of mathematics on civilizations from Egypt to Japan to Mexico to modern Europe Space, including measurement, Euclidean geometry, post-Euclidean geometry, and modern geometrics Algebra, including problems leading to algebra, equations and methods, and modern algebra Analysis, including the calculus, real, and complex analysis Mathematical Inference, including probability and statistics, and logic and set theory As readers progress through the text, they learn about the evolution of each topic, how different cultures devised their own solutions, and how these solutions enabled the cultures to develop and progress. In addition, readers will meet some of the greatest mathematicians of the ages, who helped lay the groundwork for today's science and technology. The book's lively approach makes it appropriate for anyone interested in learning how the field of mathematics came to be what it is today. It can also serve as a textbook for undergraduate or graduate-level courses. An Instructor's Manual presenting detailed solutions to all the problems in the book is available upon request from the Wiley editorial department.
