

The Crit An Architecture Students Handbook Seriously Useful Guides

The Crit-Rosie Parnell 2007 The architectural crit, review or jury is a cornerstone of architectural education around the world. The defence of ideas, drawings, and models in an open format before staff and peers is intended to be a foreground for healthy creative debate, but many students view it as hostile confrontation - an ego trip for staff and humiliation for them. This accessible and immensely enjoyable book guides students through this academic minefield. This fully updated edition includes advice and suggestions for tutors on how to model a crit around a broad range of learning styles, as well as a new section aimed at students with learning disabilities, to ensure that the process is constructive and beneficial for all architecture and design scholars. Packed with practical tips from tutors, students and professionals, this reassuringly honest book will prepare students to build more creative relationships with clients and users across the industry. Also in the Seriously Useful Guides series: *

Practical Experience * The Dissertation * The Portfolio * Unique guide to a crucial event in every architecture student's life *

Includes additional material for tutors on alternative review formats that will suit a broad range of learning styles * Humorous and accessible advice written by students for students

Crit - An Architectural Student's Handbook-Charles Doidge

2007-08-15 The architectural crit, review or jury is a cornerstone of architectural education around the world. Students defend their ideas, drawings, and models in open forum before staff and fellow students. What academic staff see as healthy creative debate, students see as hostile confrontation, an ego-trip for staff

and humiliation for them. This accessible and readable book, written by students and illustrated by telling cartoons, guides them through this academic minefield with creative humour. It provides practical advice based on experience of many recent students and draws on recent experimentation at Sheffield University and De Montfort University Leicester. The aim is twofold: first to suggest how to get the most out of the traditional experience and second, to describe ways in which this is being developed into an experience that will be more constructive and prepare future students to build more creative relationships with clients and users, and across the industry. While much has been written about the crit, review, or jury, little has been done to prepare students for it or to develop it in the light of changing professional attitudes and relationships. This book is a timely guide to a timeless experience in a changing profession.

How to Thrive at Architecture School-Neil Spiller 2020-03-01

Studying architecture is hugely exciting and rewarding. It entails developing design skills, problem-solving abilities and tapping into creativity, as well as acquiring cultural, technical and professional knowledge. This book is the go-to guide for students throughout their architectural education. It introduces architecture students to all they need to know to get on an architecture course, thrive at school and be prepared for the realities of becoming a practising architect. Split into three main sections - Part I (BA or BSC in Architecture), Part II (Masters or Diploma) and Part III (Advanced Diploma in Professional Practice) - it offers direction on all aspects of an architectural education. These range from initial tutorials, the first crit and essay-writing through to the development of final project and thesis work. Covering all bases, it is a comprehensive guide for a student's passage from university preparation through to undergraduate and graduate study and out into the profession. It features RIBA UK architecture schools and those validated overseas, as well as a short, final chapter on architectural education elsewhere in the world.

The Portfolio-Lesley Lokko 2007-06-07 The portfolio is the single most important part of every architectural student's education. This book provides a complete guide to preparing, compiling and presenting this crucial element of the architecture course. The experienced author team gives practical advice for the creation of the portfolio covering issues of size, storage, layout and order. They go on to guide the student through the various forms a portfolio can take: the Electronic Portfolio, the Academic Portfolio and the Professional Portfolio suggesting different approaches and different media to use in order to create the strongest portfolio possible. The team also presents the best examples from international student portfolios to show the reader their recommendations in practice. The book has a companion website where full colour representations of the best examples of portfolio

work can be accessed. Also in the Seriously Useful Guides series:
* The Dissertation * The Crit * Practical Experience

Linkography-Gabriela Goldschmidt 2014-03-14 The description of a method for the notation and analysis of the creative process in design, drawing on insights from design practice and cognitive psychology. This book presents linkography, a method for the notation and analysis of the design process. Developed by Gabriela Goldschmidt in an attempt to clarify designing, linkography documents how designers think, generate ideas, put them to the test, and combine them into something meaningful. With linkography, Goldschmidt shows that there is a logic to the creative process—that it is not, as is often supposed, pure magic. Linkography draws on design practice, protocol analysis, and insights from cognitive psychology. Goldschmidt argues that the generation of ideas (and their inspection and adjustment) evolves over a large number of small steps, which she terms design moves. These combine in a network of moves, and the patterns of links in the networks manifest a “good fit,” or congruence, among the ideas. Goldschmidt explains what parts of the design process can be observed and measured in a linkograph, describing its features and notation conventions. The most significant elements in a linkograph are critical moves, which are particularly rich in links. Goldschmidt presents studies that show the importance of critical moves in design thinking; describes cases that demonstrate linkography's effectiveness in studying the creative process in design (focusing on the good fit); and offers thirteen linkographic studies conducted by other researchers that show the potential of linkography in design thinking research and beyond. Linkography is the first book-length treatment of an approach to design thinking that has already proved influential in the field.

Crit- 2004

Cedric Price: Potteries Thinkbelt-Kester Rattenbury 2020-08-14
The Supercrit series revisits some of the most influential

architectural projects of the recent past and examines their impact on the way we think and design today. Based on live studio debates between protagonists and critics, the books describe, explore and criticise these major projects. This first book in the unprecedented series examines Cedric Price's groundbreaking Potteries Thinkbelt project from the 1960s, an innovative high-tech educational facility in the North Staffordshire Potteries. Highly illustrated and with contemporary criticism, this is a book not to be missed! In Cedric Price: Potteries Thinkbelt you can hear the architect's project definition, see the drawings and join in the crit. This innovative and compelling book is an invaluable resource for any architecture student.

Crit- 1985

Dwelling with Architecture-Roderick Kemsley 2013-06-07 The dwelling is the most fundamental building type, nowhere more so than in the open landscape. This book can be read in a number of ways. It is first a book about houses and particularly the theme 'dwelling and the land'. It examines the poetic and prosaic issues inherent in claiming a piece of the landscape to live on. It could also be seen as a kind of road map, full of both warnings and encouragements for all those involved with, or just interested in, the making of houses. That the domestic realm and the landscape can be vehicles for significant architectural insights is hardly an original observation. However this book seeks to bring the two topics together in a unique way. In exploring a building type that lies on the cusp of what is commonly understood as 'building' and 'architecture', it asks fundamental questions about what the very nature of architecture is. Who indeed is the architect and what is their role in the process of creating meaningful buildings?

The Dissertation-R. M. Koster 2013-10-29 This novel posing as a dissertation on León Fuertes, the fictional president of a made-up Banana Republic is "still fresh, funny, and disturbingly relevant" (Publishers Weekly, starred review). To fulfill his PhD

requirement, Camilo Fuertes decides to write about his father León, the martyred president of Tinieblas, a small country in Latin America. As Camilo traces his family's roots, we follow León along his twisted path through delinquency, learning, lust, and bravery to his historic position of leadership. At once a powerful vision of Latin American history and a brilliant parody of the academic form—complete with endnotes—The Dissertation is the second novel in Koster's acclaimed Tinieblas trilogy, and an essential postmodern novel in the tradition of Vonnegut, Barth, and Nabokov. "One of the few books of the past 20 years that deserves to be called astonishing. It is a brilliant novel, structurally a marvel and, in all, a demonstration of élan as that quality seldom is experienced in a work of fiction." —The Des Moines Register "Longtime Panama resident Koster portrays Latin America with a comedian's sense of timing, a scholar's sense of history, and a native's fond despair." —Publishers Weekly (starred review) "Koster is that rare thing: a writer from the heart, passionate and uncompromising." —John le Carré

The Dissertation-Iain Borden 2006-08-14 The Dissertation is one of the most demanding yet potentially most stimulating components of an architectural course. Properly done, it can be a valuable contribution not only to the student's own learning development but also to the field of architecture as a whole. This book provides a complete guide to what to do, how to do it, when to do it, and the major pitfalls involved. This is a comprehensive guide to all that an architecture student might need to know about undertaking the dissertation, including new material on CD-ROM and online sources, web based research techniques, digital images, alternative imaging strategies, key architecture links, referencing and new dissertation extracts. It clearly navigates the student through the whole process of writing, preparing and submitting a dissertation, as well as suggesting what to do after the dissertation has been completed. Subjects covered include how to write a proposal, which research

methodologies and techniques to adopt, which libraries and archives to utilize (including special architectural resources on the net), as well as how to structure, reference and illustrate the final submission. The authors also take architecture students into new terrain, suggesting alternative methods of undertaking dissertations, whether as video, prose writing, multimedia or other forms of expression. Furthermore, this guide includes new examples of exemplary dissertations of all kinds, as completed by students in Europe and North America so that the reader can clearly see the kinds of work which they themselves might choose to pursue. Also in the Seriously Useful Guides Series: * The Crit * The Portfolio * Practical Experience

Architecture Against the Post-Political-Nadir Lahiji 2014-05-23

Written by a team of renowned contributors and carefully edited to address the themes laid out by the editors in their introduction, the book includes theoretical issues concerning the questions of aesthetics and politics and addresses city and urban strategies within the general critique of the "post-political". By focusing on specific case studies from Warsaw, Barcelona, Dubai, Tokyo and many more the book consolidates the contributions of a diverse group of academics, architects and critics from Europe, the Middle East and America. This collection fills the gap in the existing literature on the relation between politics and aesthetics, and its implications for the theoretical discourse of architecture today. In summary, this book provides a response to the predominant de-politicization in academic discourse and is an attempt to re-claim the abandoned critical project in architecture.

Changing Architectural Education-David Nicol 2005-08-19

Architectural education is under pressure to meet the demands of an evolving construction industry and to cater to the increasingly varied career destinations of graduates. How should architectural education respond to these professional challenges? How can students be better prepared for professional practice? These questions are the focus of this book, which brings together

contributions from a wide range of authors, from both the UK and the USA, working in the fields of architectural education, architectural practice and educational research.

Bernard Tschumi: Parc de La Villette: Supercrit #4-Samantha Hardingham 2012 The Supercrit series revisits some of the most influential architectural projects of the recent past and examines their impact on the way we think and design today. Based on live studio debates between protagonists and critics, the books describe, explore and criticise these major projects. Supported by an extensive illustrated section describing the project itself and a wider selection of pictures describing the wider context of the debate, these books are aimed at both a new and an expert audience. While introducing the projects themselves to newcomers, with original descriptions and adding generous footnotes and sources to a full transcript of the debate, they are also an important contribution to the ongoing discussion which surrounds these seminal projects. **Supercrit #4: Parc de la Villette** examines the groundbreaking public space with art installations. You can hear the architect's project definition, see the drawings and join in the crit. This innovative and compelling book is an invaluable resource for any architecture student.

This Thing Called Theory-Teresa Stoppani 2016-11-10 In the age of post-digital architecture and digital materiality, **This Thing Called Theory** explores current practices of architectural theory, their critical and productive role. The book is organized in sections which explore theory as an open issue in architecture, as it relates to and borrows from other disciplines, thus opening up architecture itself and showing how architecture is inextricably connected to other social and theoretical practices. The sections move gradually from the specifics of architectural thought - its history, theory, and criticism - and their ongoing relation with philosophy, to the critical positions formulated through architecture's specific forms of expression, and onto more recent forms of architecture's engagement and self-definition. The

book's thematic sessions are concluded by and interspersed with a series of shorter critical position texts, which, together, propose a new vision of the contemporary role of theory in architecture. What emerges, overall, is a critical and productive role for theory in architecture today: theory as a proposition, theory as task and as a 'risk' of architecture.

What an Architecture Student Should Know-Jadwiga Krupinska 2014-06-05 It's not just you. Every architecture student is initially confused by architecture school - an education so different that it doesn't compare to anything else. A student's joy at being chosen in stiff competition with many other applicants can turn to doubt when he or she struggles to understand the logic of the specific teaching method. Testimony from several schools of design and architecture in different countries indicates that many students feel disoriented and uncertain. This book will help you understand and be aware of: Specific working methods at architecture schools and in the critique process, so you'll feel oriented and confident. How to cope with uncertainty in the design process. How to develop the ability to synthesize the complexity of architecture in terms of function, durability, and beauty. This book is about how architects learn to cope with uncertainty and strive to master complexity. Special attention is given to criticism, which is an essential part of the design process. The author, a recipient of several educational awards, has written this book for architecture students and teachers, to describe how each student can adopt the architect's working method. Key concepts are defined throughout and references at the end of each chapter will point you to further reading so you can delve into topics you find particularly interesting. Jadwiga Krupinska is professor emerita at the School of Architecture of the Royal Institute of Technology (KTH) in Stockholm, Sweden.

Critical Practices in Architecture-Jonathan Bean 2020-01-06 This book embraces the idea that in today's complex world, multiple, emerging perspectives are critical to the design fields, the

environment, and society. It also brings authors into conversation to focus on the built environment from the perspective of critical practice. The authors take as a starting point Jane Rendell's ground-breaking work, which defines critical spatial practice as "self-reflective modes of thought that seek to change the world." In opposition to conventional conceptions of architectural education and work, this book reflects how socially engaged architects, landscape architects, designers, urbanists, and artists take up critical spatial practice. Bridging ideas from multiple countries and approaches to design scholarship, each chapter seeks to find places of convergence for the multiple strands that form around themes of practice, equality, methods, theory, ethics, pedagogy, and representation. Rendell's foreword and postscript provide context for these themes and suggest a way forward in today's challenging, changing times.

Architectural Drawing-Rendow Yee 2012-07-31 The classic architectural drawing compendium— now in a richly updated edition Today's most comprehensive compendium of architectural drawing types and methods, both hand drawn and computer generated, *Architectural Drawing: A Visual Compendium of Types and Methods* remains a one-of-a-kind visual reference and an outstanding source of guidance and inspiration for students and professionals at every level. This Fourth Edition has been thoroughly updated to reflect the growing influence of digital drawing. Features include: More than 1,500 drawings and photographs that demonstrate the various principles, methods, and types of architectural drawing Examples by an impressive array of notable architects and firms, including Tadao Ando, Asymptote, Santiago Calatrava, Coop Himmelb(l)au, Norman Foster, Frank Gehry, Zaha Hadid, Steven Holl, Arata Isozaki, Toyo Ito, Gudmundur Jonsson, Kohn Pedersen Fox, Ricardo Legorreta, Morphosis, Patkau Architects, Pei Partnership Architects LLP, Renzo Piano, Antoine Predock, SANAA, David Serero, Studio Daniel Libeskind, Studio Gang, Bing Thom, Tod

Williams and Billie Tsien, and UN Studio A brand new chapter, "Introduction to the Digital-Manual Interface" which covers how digital and traditional drawing techniques can be used in conjunction with each other A new chapter on guidelines for portfolio building Content organized in a streamlined, easy-to-use fashion Supplementary online instructor resources, including PowerPoint slides tied to the book "This volume reveals how architects approach drawing as a process wherein ideas are given form. As a tool for teaching, these examples become important in students' understanding of the formal and technical aspects of design thought. In an age of digital technologies, this work emphasizes the intimate relationship that exists between the drawing and its maker, the process between paper, hand, and mind." —LaRaine Papa Montgomery, Professor of Architecture/Graphics Coordinator, Savannah College of Art and Design "This book contains a wealth of information on architectural graphic communication. My students have found this to be an invaluable resource for graphic presentation techniques ranging from traditional hand drawing to advanced computer graphics. It features an amazingly wide range of examples including both student work and professional work by renowned architects. With the addition of a new chapter on portfolio design, this new edition illustrates the full gamut of graphic communication skills from the conceptual sketch through the documentation of the final portfolio." —Mark A. Pearson, AIA, LEED AP, Associate Professor of Architecture, College of DuPage "This book should be in the library of all architecture and design students as well as practicing professionals. The richness and variety of hand-drawn and digital illustrations by students and architects offers deep insight into the many drawing types and methods used today. The section on portfolios is a helpful and timely addition." —Professor Michael Hagge, Chair, Department of Architecture, The University of Memphis

306090 07: Landscape Within Architecture-Emily Abruzzo

2004-09-30 This new journal, fast becoming a staple in the architectural community, aims to revitalize, reform, and rebuild the profession by showcasing the work of promising students, young designers, and innovative educational institutions. Each volume addresses a pressing architectural issue and offers diverse, cross-disciplinary solutions in the form of projects, ideas, buildings, and other media. 306090 07: Landscape within Architecture, edited by David L. Hays, is intended as a foray into landscape architecture and a catalyst for exchange between students, faculty, and administrators interested in understanding and expanding the presence of landscape within the pedagogy and practice of architecture. This volume includes essays by Frederick Steiner, Alessandra Ponte, James Wines, Kimberly Hill, and others, as well as student projects by Kristin Akkerman Schuster, Elena Wiersma, and Hillary Sample.

The Genre and the Genre Expectations of Crit Sessions of Architecture Students in Universiti Teknologi Malaysia-Siti Nur Farahin Hamdan 2011

Excellence in University Assessment-David Carless 2015-04-24
Assessment in higher education is an area of intense current interest, not least due to its central role in student learning processes. Excellence in University Assessment is a pioneering text which contributes to the theory and practice of assessment through detailed discussion and analysis of award-winning teaching across multiple disciplines. It provides inspiration and strategies for higher education practitioners to improve their understanding and practice of assessment. The book uses an innovative model of learning-oriented assessment to analyze the practice of university teachers who have been recipients of teaching awards for excellence. It critically scrutinizes their methods in context in order to develop key insights into effective teaching, learning and assessment processes. Pivotal topics include: Competing priorities in assessment and ways of tackling them; The nature of quality assessment task design; The student

experience of assessment; Promoting student engagement with feedback. An indispensable contribution to assessment in higher education, Excellence in University Assessment is a valuable guide for university leaders, middle managers, staff developers, teachers and researchers interested in the crucial topic of assessment.

Robert Venturi and Denise Scott Brown-Kester Rattenbury 2007
Robert Venturi and Denise Scott Brown revisit their 'infamous' book which overturned the barriers separating high architecture from the commercial architecture of the Strip. You can get involved, hear the couple's project description, see the drawings and join in the crit.

What an Architecture Student Should Know-Jadwiga Krupinska 2014-06-05
It's not just you. Every architecture student is initially confused by architecture school - an education so different that it doesn't compare to anything else. A student's joy at being chosen in stiff competition with many other applicants can turn to doubt when he or she struggles to understand the logic of the specific teaching method. Testimony from several schools of design and architecture in different countries indicates that many students feel disoriented and uncertain. This book will help you understand and be aware of: Specific working methods at architecture schools and in the critique process, so you'll feel oriented and confident. How to cope with uncertainty in the design process. How to develop the ability to synthesize the complexity of architecture in terms of function, durability, and beauty. This book is about how architects learn to cope with uncertainty and strive to master complexity. Special attention is given to criticism, which is an essential part of the design process. The author, a recipient of several educational awards, has written this book for architecture students and teachers, to describe how each student can adopt the architect's working method. Key concepts are defined throughout and references at the end of each chapter will point you to further reading so you can delve into topics you find

particularly interesting. Jadwiga Krupinska is professor emerita at the School of Architecture of the Royal Institute of Technology (KTH) in Stockholm, Sweden.

Architecture-Dana Cuff 1992 Dana Cuff delves into the architect's everyday world in "Architecture" to uncover an intricate social art of design, resulting in a new portrait of the profession that sheds light on what it means to become an architect.

Architects-Thomas Yarrow 2019-07-15 What is creativity? What is the relationship between work life and personal life? How is it possible to live truthfully in a world of contradiction and compromise? These deep and deeply personal questions spring to the fore in Thomas Yarrow's vivid exploration of the life of architects. Yarrow takes us inside the world of architects, showing us the anxiety, exhilaration, hope, idealism, friendship, conflict, and the personal commitments that feed these acts of creativity. Architects rethinks "creativity," demonstrating how it happens in everyday practice. It highlights how the pursuit of good architecture, relates to the pursuit of a good life in intimate and individually specific ways. And it reveals the surprising and routine social negotiations through which designs and buildings are actually made.

Developing Your Design Process-Albert C. Smith 2014-09-04

Developing Your Design Process is your primary source for acquiring knowledge of how and why you design. It will help you understand how architects think as well as learn why you should educate yourself about design culture. You'll explore the spark of imagination that leads to a strong concept, realize the importance of sketching and rough drafts, focus your original concept to make your abstract idea visible, and finally step away for a moment to critically question your concept by identifying its strengths and weaknesses. You'll also be introduced to the language of design, architectural terminology, historic precedents, and designers, in addition to the why, what, and how of the design process. The book is illustrated throughout with

international examples of work by professionals and students in the discipline of architecture, and other related design professions.

Resisting Postmodern Architecture-Stylianos Giamarelos

2022-01-10 Since its first appearance in 1981, critical regionalism has enjoyed a celebrated worldwide reception. The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation. Today, its main principles (such as acknowledging the climate, history, materials, culture and topography of a specific place) are integrated in architects' education across the globe. But at the same time, the richer cross-cultural history of critical regionalism has been reduced to schematic juxtapositions of 'the global' with 'the local'. Retrieving both the globalising branches and the overlooked cross-cultural roots of critical regionalism, Resisting Postmodern Architecture resituates critical regionalism within the wider framework of debates around postmodern architecture, the diverse contexts from which it emerged, and the cultural media complex that conditioned its reception. In so doing, it explores the intersection of three areas of growing historical and theoretical interest: postmodernism, critical regionalism and globalisation. Based on more than 50 interviews and previously unpublished archival material from six countries, the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship. In so doing, it shows how the 'periphery' was not just a passive recipient, but also an active generator of architectural theory and practice. Stylianos Giamarelos challenges long-held 'central' notions of supposedly 'international' discourses of the recent past, and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory, history and historiography.

The Dissertation-Iain Borden 2014-05-09 The Dissertation is one of the most demanding yet potentially most stimulating

components of an architectural course. This classic text provides a complete guide to what to do, how to do it, when to do it, and what the major pitfalls are. This is a comprehensive guide to all that an architecture student might need to know about undertaking the dissertation. The book provides a plain guide through the whole process of starting, writing, preparing and submitting a dissertation with minimum stress and frustration. The third edition has been revised throughout to bring the text completely up-to-date for a new generation of students. Crucially, five new and complete dissertations demonstrate and exemplify all the advice and issues raised in the main text. These dissertations are on subjects from the UK, USA, Europe and Asia and offer remarkable insights into how to get it just right.

Practical Experience-Jane Tankard 2012-05-23 The year out, or internship, in a professional practice can be the most rewarding experience in an architectural student's education. It can also be a shock to the system to find that architectural working practices are very different to architectural study. This book provides a beginner's guide to professional practice and a step-by-step guide on how to find the placement that best suits your goals. It is the fourth title in the successful 'Seriously Useful Guides...' series. In order to give you a real insight into professional experience, this guide includes real life case studies from students who have been through the experience and from practices that have taken them on. It guides you through the steps of finding a placement, outlines the norms and expectations for internship in different countries, and discusses codes of office behavior and professional ethics. Contemporary architectural practices are becoming increasingly diverse and this guide outlines some Practical experience/Internship choices, providing cases studies of award winning firms that offer practical experience. These case studies range from conventional practices based on the art of building, to practices based on digital media or contemporary urbanism. Finally, the term 'critical practice' is becoming increasingly

important, and the book provides some definitions and examples of critically based architectural practices. Also in the Seriously Useful Guides Series: * The Crit * The The Portfolio * The Dissertation

Interpretation in Architecture-Adrian Snodgrass 2013-05-13
Drawing on cultural theory, phenomenology and concepts from Asian art and philosophy, this book reflects on the role of interpretation in the act of architectural creation, bringing an intellectual and scholarly dimension to real-world architectural design practice. For practising architects as well as academic researchers, these essays consider interpretation from three theoretical standpoints or themes: play, edification and otherness. Focusing on these, the book draws together strands of thought informed by the diverse reflections of hermeneutical scholarship, the uses of digital media and studio teaching and practice.

Design For How People Learn-Julie Dirksen 2011-11-07 Products, technologies, and workplaces change so quickly today that everyone is continually learning. Many of us are also teaching, even when it's not in our job descriptions. Whether it's giving a presentation, writing documentation, or creating a website or blog, we need and want to share our knowledge with other people. But if you've ever fallen asleep over a boring textbook, or fast-forwarded through a tedious e-learning exercise, you know that creating a great learning experience is harder than it seems. In Design For How People Learn, you'll discover how to use the key principles behind learning, memory, and attention to create materials that enable your audience to both gain and retain the knowledge and skills you're sharing. Using accessible visual metaphors and concrete methods and examples, Design For How People Learn will teach you how to leverage the fundamental concepts of instructional design both to improve your own learning and to engage your audience.

Building the Architect's Character-Kendra Schank Smith 2017-12-22 An understanding of architects' character traits can

offer important insights into how they design buildings. These traits include leadership skills necessary to coordinate a team, honest and ethical behavior, being well educated and possessing a life-long love of learning, flexibility, resourcefulness, and visionary and strategic thinking. Characteristics such as these describe a successful person. Architects also possess these traits, but they have additional skills specifically valuable for the profession. These will include the ability to question the use of digital media, new materials, processes, and methods to convey meaning in architectural form. Although not exhaustive, a discussion of such subjects as defining, imaging, persuading, and fabricating will reveal representational meaning useful for the development of an understanding of architects' character. Through the analogies and metaphors found in Greek myth, the book describes the elusive, hard-to-define characteristics of architects to engage the dilemmas of a changing architectural landscape. *Building the Architect's Character: Explorations in Traits* examines traditional and archetypal characteristics of the successful architect to ask if they remain relevant today.

Journal of Ethnographic and Qualitative Research- 2007

The Routledge Companion to Criticality in Art, Architecture, and Design-Chris Brisbin 2018-10-03 *The Routledge Companion to Criticality in Art, Architecture, and Design* presents an in-depth exploration of criticism and criticality in theory and practice across the disciplines of art, architecture, and design.

Professional criticism is a vital part of understanding the cultural significance of designed objects and environments that we engage with on a daily basis, yet there is evidence to show that this practice is changing. This edited volume investigates how practitioners, researchers, educators, and professionals engage with, think about, and value the practice of critique. With contributions from a multi-disciplinary authorship from nine countries - the UK, USA, Australia, India, Netherlands, Switzerland, South Africa, Belgium, and Denmark - this

companion provides a wide range of leading perspectives evaluating the landscape of criticality and how it is being shaped by technological and social advances. Illustrated with over 60 black and white images and structured into five sections, *The Routledge Companion to Criticality in Art, Architecture, and Design* is a comprehensive volume for researchers, educators, and students exploring the changing role of criticism through interdisciplinary perspectives.

Sketching User Experiences: The Workbook-Saul Greenberg 2011-11-14 *Sketching Working Experience: The Workbook* provides information about the step-by-step process of the different sketching techniques. It offers methods called design thinking, as a way to think as a user, and sketching, a way to think as a designer. User-experience designers are designers who sketch based on their actions, interactions, and experiences. The book discusses the differences between the normal ways to sketch and sketching used by user-experience designers. It also describes some motivation on why a person should sketch and introduces the sketchbook. The book reviews the different sketching methods and the modules that contain a particular sketching method. It also explains how the sketching methods are used. Readers who are interested in learning, understanding, practicing, and teaching experience design, information design, interface design, and information architecture will find this book relevant. Features standalone modules detailing methods and exercises for practitioners who want to learn and develop their sketching skills Extremely practical, with illustrated examples detailing all steps on how to do a method Excellent for individual learning, for classrooms, and for a team that wants to develop a culture of design practice Perfect complement to Buxton's *Sketching User Experience* or any UX text Author-maintained companion website at

<http://grouplab.cpsc.ucalgary.ca/sketchbook/>

E-crit-Marcel O'Gorman 2006 In *E-Crit*, Marcel O'Gorman takes

an ambitious and provocative look at how university scholarship, pedagogy, and curricula might be transformed to suit a digital culture. Arguing that universities were founded on the logic of print culture, O'Gorman sets out to reinvent the academic apparatus, constructing a hybrid methodology that draws on avant-garde art, deconstructive theory, cognitive science, and the work of painter and poet William Blake. O'Gorman explores the ways in which digital media might help to restore the critical, intellectual purpose of higher education, which has been repressed by the technocratic structures that dominate the modern university. He argues that the revolutionary, socio-critical impetus that spurred deconstructive theory and transformed the humanities was lost in the initial attempts to digitize the literary canon and demonstrate the convergence of critical theory and hypertext. Humanities disciplines, he argues, must reposition themselves through the invention of humanities-based interdisciplinary programs capable of adapting to the post-print vicissitudes of a digital culture. E-Crit is thus essential reading for anyone concerned with the practice - and future - of the humanities in higher education.

Building Evolutionary Architectures-Neal Ford 2017-09-18 The software development ecosystem is constantly changing, providing a constant stream of new tools, frameworks, techniques, and paradigms. Over the past few years, incremental developments in core engineering practices for software development have created the foundations for rethinking how architecture changes over time, along with ways to protect important architectural characteristics as it evolves. This practical guide ties those parts together with a new way to think about architecture and time.

CRITS-Terry Barrett 2018-10-04 CRITS: A Student Manual is a practical guide to help art and design students obtain maximum benefits from the most common method of teaching these subjects in college: the studio critique. CRITS positions studio

critiques as positive, productive, and inspirational means to foster development - not occasions to be feared. It explains the requisite skills, knowledge, and attitudes for meaningful and motivational participation in critiques. CRITS teaches students the hows and whys of critiques so that they can gain enriching benefits from their instructors and peers during and after critiques. Renowned author Terry Barrett informs, guides, and reassures students on the potential value of studio critiques. Filled with real-life examples of what works well, and what doesn't, Barrett provides readers with the tools to see crits as opportunities to participate, observe, reflect, and develop - improving art and design engagement at all levels.

[Book] The Crit An Architecture Students Handbook Seriously Useful Guides
