In order to survive, managers and organizational leaders will have to address the need to connect to the largest possible audience without losing touch with the individual. But how does this work? How can managers look ahead? How can they imagine how their company will be doing in thirty years from now, and do so in an environment where predictions have become all but impossible, and then at the same time successfully imprint their vision into a strategy for the next three months from now? What makes today's customers tick? Why does everything have to be easy, fast, fun and simple? Why is data the new gold, and why is AI a blessing? The answer is plain. To keep evolving, leaders should be inspired by the outside world. They should have the guts to read the signals all around them. **The Day of the Triffids**-John Wyndham 2010-07-01 The classic postapocalyptic thriller with “all the reality of a vividly realized nightmare” (The Times, London). Triffids are odd, interesting little plants that grow in everyone’s garden. Triffids are no more than mere curiosities—until an event occurs that alters human life forever. What seems to be a spectacular meteor shower turns into a bizarre, green inferno that blinds everyone and renders humankind helpless. What follows is even stranger: spores from the inferno cause the triffids to suddenly take on a life of their own. They become large, crawling vegetation, with the ability to uproot and roam about the country, attacking humans and inflicting pain and agony. William Masen somehow managed to escape being blinded in the inferno, and now after leaving the hospital, he is one of the few survivors who can see. And he may be the only one who can save his species from chaos and eventual extinction . . . With more than a million copies sold, *The Day of the Triffids* is a landmark of speculative fiction, and “an outstanding and entertaining novel” (Library Journal). “A thoroughly English apocalypse, it rivals H. G. Wells in conveying how the everyday invaded by the alien would feel. No wonder Stephen King admires Wyndham so much.” —Ramsey Campbell “One of my all-time favorite novels. It’s absolutely convincing, full of little telling details, and that sweet, warm sensation of horror and mystery.” —Joe R. Lansdale

**Tomorrow Sex Will Be Good Again**-Katherine Angel 2021-03-02 A provocative, elegantly written analysis of female desire, consent, and sexuality in the age of MeToo. Women are in a bind. In the name of consent and empowerment, they must proclaim their desires clearly and confidently. Yet sex researchers suggest that women’s desire is often slow to emerge. And men are keen to insist that they know what women—and their bodies—want. Meanwhile, sexual violence abounds. How can women, in this environment, possibly know what they want? And why do we expect them to? In this elegant, searching book—spanning science and popular culture; pornography and literature; debates on Me-Too, consent and feminism—Katherine Angel challenges our assumptions about women’s desire. Why, she asks, should they be expected to know their desires? And how do we take sexual violence seriously, when not knowing what we want is key to both eroticism and personhood? In today’s crucial moment of renewed attention to violence and power, Angel urges that we remake our thinking about sex, pleasure, and autonomy without any illusions about perfect self-knowledge. Only then will we fulfil Michel Foucault’s teasing promise, in 1976, that “tomorrow sex will be good again.”

**Tomorrow They Won't Dare to Murder Us**-Joseph Andras 2021-02-23 Lyrical and radical, a debut novel that created a sensation in France. Winner of the Prix Goncourt for first novel, one of the most prestigious literary awards in France. A young revolutionary plants a bomb in a factory on the outskirts of Algiers during the Algerian War. The bomb is timed to explode after work hours, so no one will be hurt. But the authorities have been watching. He is caught, the bomb is defused, and he is tortured, tried in a day, condemned to death, and thrown into a cell to await the guillotine. A routine event, perhaps, in a brutal conflict that ended the lives of more than a million Muslim Algerians. But what if the militant is a “pied-noir”? What if his lover was a member of the French Resistance? What happens to a “European” who chooses the side of anti-colonialism? By turns lyrical, meditative, and heart-stoppingly suspenseful, this novel by Joseph Andras, based on a true story, was a literary and political sensation in France, winning the Prix Goncourt for First Novel and being acclaimed by *Le Monde* as “vibrantly lyrical and somber” and by the journal *La Croix* as a “masterpiece”.

**Affliction**-Veena Das 2015-01-01 *Affliction* inaugurates a novel way of understanding the trajectories of health and disease in the context of poverty. Focusing on low-income neighborhoods in Delhi, it stitches together three different sets of issues. First, it examines the different trajectories of illness: What are the circumstances under which illness is absorbed within the normal and when does it exceed the normal—putting resources, relationships, and even one’s world into jeopardy? A second set of issues involves how different healers understand their own practices. The astonishing range of practitioners found in the local markets in the poor neighborhoods of Delhi shows how the magical

and the technical are knotted together in the therapeutic experience of healers and patients. The book asks: What is expert knowledge? What is it that the practitioner knows and what does the patient know? How are these different forms of knowledge brought together in the clinical encounter, broadly defined? How does this event of everyday life bear the traces of larger policies at the national and global levels? Finally, the book interrogates the models of disease prevalence and global programming that emphasize surveillance over care and deflect attention away from the specificities of local worlds. Yet the analysis offered retains an openness to different ways of conceptualizing “what is happening” and stimulates a conversation between different disciplinary orientations to health, disease, and poverty. Most studies of health and disease focus on the encounter between patient and practitioner within the space of the clinic. This book instead privileges the networks of relations, institutions, and knowledge over which the experience of illness is dispersed. Instead of thinking of illness as an event set apart from everyday life, it shows the texture of everyday life, the political economy of neighborhoods, as well as the dark side of care. It helps us see how illness is bound by the contexts in which it occurs, while also showing how illness transcends these contexts to say something about the nature of everyday life and the making of subjects.

Lilith's Dream-Whitley Strieber 2002-10-15 An ancient vampire, beautiful beyond words, a vulnerable young man drawn to her by a power beyond his understanding, two desperate parents searching across the world for the son they love -- these are the riveting, unexpected elements of Whitley Strieber's extraordinary new novel. Lilith, the ages-old mother of the dying race of vampires, has been forced to come out of her cave deep in the Egyptian desert in search of food -- human blood. But she knows nothing about the modern world. She can't drive a car, rent a room, turn on a TV. She struggles to New York, penniless, vulnerable, and starving, protected only by her beauty and her power to capture men with desire...especially certain very special men. The instant she sees young Ian Ward, she knows that he is part vampire himself. She knows that Ian, if he ever tastes human blood, will belong to her forever. And she needs him desperately, to help her survive and live in this harsh new world of jets and credit cards and guns. She sets out on a campaign of seduction -- as sensuous as it is terrifying -- to touch human blood to Ian's lips, which will then become for him a drug a thousand times more addictive than heroin. Ian's father, Paul Ward, part vampire turned expert and obsessive hunter of vampires, knows that if the blood transforms Ian, Paul will have to kill his own son. The titanic conflict between father and son and seductress, hunter and hunted and huntress, comes to its surprise conclusion in the secret chambers beneath the great pyramids, where the hidden truths of all human history are stored. From its beginning in the dark back alleys of Cairo to its totally unexpected ending, Lilith's Dream draws the reader down seductive new paths of discovery, into places where no novel has ever before. With Lilith's Dream Whitley Strieber has created a vampire so original and a story so new that he has virtually invented a new genre.

The Infatuations-Javier Marías 2013-03-07 The Infatuations is a metaphysical murder mystery and a stunningly original literary achievement by Javier Marías, the internationally acclaimed author of *A Heart So White* and *Your Face Tomorrow*. Every day, María Dolz stops for breakfast at the same café. And every day she enjoys watching a handsome couple who follow the same routine. Then one day they aren't there, and she feels obscurely bereft. It is only later, when she comes across a newspaper photograph of the man, lying stabbed in the street, his shirt half off, that she discovers who the couple are. Some time afterwards, when the woman returns to the café with her children, who are then collected by a different man, and Maria approaches her to offer her condolences, an entanglement begins which sheds new light on this apparently random, pointless death. With *The Infatuations*, Javier Marías brilliantly reimagines the murder novel as a metaphysical enquiry, addressing existential questions of life, death, love and morality. *The Infatuations* is an extraordinary, immersive book about the terrible force of events and their consequences. 'I am greatly impressed by the quality of Marías's writing . . . he uses language like an anatomist uses the scalpel to cut away the layers of the flesh in order to lay bare the innermost secrets of that strangest of species, the human being' W. G. Sebald 'Years ago, I said that Marías was Spain's best living writer . . . Nothing, afterwards, has made me alter that opinion' Eduardo Mendoza, *El País* '[I am] enthralled by his strange mix of made-up memories, lost experiences and real-life fantasies' Marina Warner, *Guardian* 'Stylish, cerebral . . . Marías is a startling talent' *The New York Times* Javier Marías was born in Madrid in 1951. He has published ten novels, two collections of short stories and several volumes of essays. His work has been translated into thirty-two languages and won a dazzling array of international literary awards, including the prestigious Dublin IMPAC award for *A Heart So White*. He is also a highly practised translator into Spanish of English authors, including Joseph Conrad, Robert Louis Stevenson, Sir Thomas Browne and Laurence Sterne. He has held academic posts in Spain, the United States and in Britain, as Lecturer in Spanish Literature at Oxford University. Margaret Jull Costa has been a literary translator for over twenty-five years and has translated many novels and short stories by Portuguese, Spanish and Latin American writers, including Javier Marías, Fernando Pessoa, José Saramago, Bernardo Atxaga and Ramón del Valle-Inclán. She has won various prizes for her work, including, in 2008, the PEN Book-of-the-Month Translation Award and the Oxford Weidenfeld Translation Prize for her version of Eça de Queiroz's masterpiece *The Maias*, and, most recently, the 2011 Oxford Weidenfeld Translation Prize for *The Elephant's Journey* by José Saramago.

Sixth Column-Robert A. Heinlein 2012-01-01 After the U.S. is conquered, an enclave of brilliant misfits leads a rebellion against near-impossible odds. The totalitarian East has triumphed in a massive invasion and the United States has fallen to a dictatorial superpower bent on total domination. That power is consolidating its grip via concentration camps, police state tactics, and a total monopoly upon the very thoughts of the conquered populace. A tiny enclave of scientists and soldiers survives, unbeknownst to America's new rulers. It's six against six million<sup>3/4</sup>but those six happen to include a scientific genius, a master of subterfuge and disguise who learned his trade as a lawyer-turned-hobo, and a tough-minded commander who knows how to get the best out of his rag-tag assortment of American discontents, wily operators, and geniuses. It's going to take technological savvy and a propaganda campaign that would leave Madison Avenue aghast, but the U.S. will rise again. The counterinsurgency for freedom is on, and defeat is not an option. At the

publisher's request, this title is sold without DRM (Digital Rights Management).
