

The Dead Case Studies In Contemporary Criticism

The Dead-James Joyce 1993-12-15 Adopted at more than 1,000 colleges and universities, Bedford/St. Martin's innovative Case Studies in Contemporary Criticism series has introduced more than a quarter of a million students to literary theory and earned enthusiastic praise nationwide. Along with an authoritative text of a major literary work, each volume presents critical essays, selected or prepared especially for students, that approach the work from several contemporary critical perspectives, such as gender criticism and cultural studies. Each essay is accompanied by an introduction (with bibliography) to the history, principles, and practice of its critical perspective. Every volume also surveys the biographical, historical, and critical contexts of the literary work and concludes with a glossary of critical terms. New editions reprint cultural documents that contextualize the literary works and feature essays that show how critical perspectives can be combined.

Remembering and Disremembering the Dead-Floris Tomasini 2017-08-01 This book is open access under a CC BY 4.0 licence. This book is a multidisciplinary work that investigates the notion of posthumous harm over time. The question what is and when is death, affects how we understand the possibility of posthumous harm and redemption. Whilst it is impossible to hurt the dead, it is possible to harm the wishes, beliefs and memories of persons that once lived. In this way, this book highlights the vulnerability of the dead, and makes connections to a historical oeuvre, to add critical value to similar concepts in history that are overlooked by most philosophers. There is a long historical view of case studies that illustrate the conceptual character of posthumous punishment; that is, dissection and gibbetting of the criminal corpse after the Murder Act (1752), and those shot at dawn during the First World War. A long historical view is also taken of posthumous harm; that is, body-snatching in the late Georgian period, and organ-snatching at Alder Hey in the 1990s.

Case Studies in Jewish Business Ethics-Aaron Levine 2000 Many people think of business as a game of strategy, and argue that whatever works for business success is acceptable, even if it involves cheating, deceptions, and other improprieties. Jewish business law rejects this approach. Using specific case studies, this book analyzes the strategies that are impermissible, discussing deceptive advertising, negative advertising, pressure tactics in sales, insider trading, price matching, worker evaluations, termination policy, and many others. An excellent adult education volume.

Case Studies in Disaster Response and Emergency Management-Nicolas A. Valcik 2013-01-04 Each emergency comes with its own set of challenges, however, many emergencies of the past can be used as tools to evaluate the decisions made and apply them to similar situations. Designed to enable public officials to conduct this kind of evaluation, Case Studies in Disaster Response and Emergency Management details a selection of emergencies—more than 50—that actually occurred. The book demonstrates that often there is no wrong or right answer, just choices that will resolve a problem favorably or cause the situation to deteriorate. The book illustrates the application of public administration theories and practices to real-life disasters. Arranged chronologically, the case studies involve incidents from the U.S. and worldwide, with topics including natural disasters, industrial accidents, epidemics, and terrorist attacks. It includes a set of generic questions at different points in the case study to allow evaluation of which decisions were successful and why. The decision-making process described gives readers an applied venue to test theoretical

emergency management techniques that should work in real-world situations. The book demonstrates with the perspective of 20/20 hindsight how preventive planning measures are best practiced. It provides practical advice and guidance for public officials during emergency situations.

Case Study Research-Robert K. Yin 2009 Providing a complete portal to the world of case study research, the Fourth Edition of Robert K. Yin's bestselling text *Case Study Research* offers comprehensive coverage of the design and use of the case study method as a valid research tool. This thoroughly revised text now covers more than 50 case studies (approximately 25% new), gives fresh attention to quantitative analyses, discusses more fully the use of mixed methods research designs, and includes new methodological insights. The book's coverage of case study research and how it is applied in practice gives readers access to exemplary case studies drawn from a wide variety of academic and applied fields. Key Features of the Fourth Edition Highlights each specific research feature through 44 boxed vignettes that feature previously published case studies Provides methodological insights to show the similarities between case studies and other social science methods Suggests a three-stage approach to help readers define the initial questions they will consider in their own case study research Covers new material on human subjects protection, the role of Institutional Review Boards, and the interplay between obtaining IRB approval and the final development of the case study protocol and conduct of a pilot case Includes an overall graphic of the entire case study research process at the beginning of the book, then highlights the steps in the process through graphics that appear at the outset of all the chapters that follow Offers in-text learning aids including "tips" that pose key questions and answers at the beginning of each chapter, practical exercises, endnotes, and a new cross-referencing table *Case Study Research, Fourth Edition* is ideal for courses in departments of Education, Business and Management, Nursing and Public Health, Public Administration, Anthropology, Sociology, and Political Science.

The Dead-James Joyce 1994 This edition of Joyce's classic short story from *Dubliners* presents the 1969 Viking critical edition, prepared by Robert Scholes, along with five critical essays - newly commissioned or revised for a student audience - that read "The Dead" from five contemporary critical perspectives. Each critical essay is accompanied by a succinct introduction to the history, principles, and practice of the critical perspective, and a bibliography that promotes further exploration of that approach. The text and essays are further complemented by an introduction providing biographical and historical contexts to Joyce and "The Dead," a survey of critical responses to the story since its initial publication, and a glossary of critical and theoretical terms.

Drought Assessment, Management, and Planning: Theory and Case Studies-Donald A. Wilhite 2012-12-06 Drought is an insidious hazard of nature. It originates from a deficiency of precipitation that results in a water shortage for some activity or some group. Africa has suffered the most dramatic impacts from drought during the past several decades the recent droughts in the southern and eastern portions of the continent are testimony to that fact. However, the vulnerability of all nations to extended periods of water shortage has been underscored again and again during this same time period. In the past decade alone, droughts have occurred with considerable frequency and severity in most of the developed and developing world. Significant parts of North and South America, Australia, Europe, and Asia have been plagued recently by extended periods of severe drought, often resulting in far-reaching economic, social, and environmental consequences. In the western United States, for example, vast areas are facing the prospects of a sixth or seventh consecutive year of drought in 1993. Concern by members of the scientific and policy communities about the inability of governments to respond in an effective and timely manner to drought and its associated impacts exists worldwide. Numerous "calls for action" for improved drought planning and management have been issued by national governments, professional organizations, intergovernmental organizations, nongovernmental organizations, and others. The United Nations' International Decade for Natural Disaster Reduction (IDNDR) is yet another example of an international call for action to reduce the impacts that result from drought and other natural hazards.

International Case Studies in Mental Health-Senel Poyrazli 2012-04-30 Senel Poyrazli's and Chalmer Thompson's International Case Studies in Mental Health presents a variety of global cases from both developed and developing countries, detailing descriptions of the people who are seeking help to eliminate their distress and of the exceptional practitioners who provide the help. In most of the cases, the practitioner is someone who shares a similar heritage with her or his help-seeker, and who is influenced at least partly by Western psychotherapy traditions. Each chapter also is a showcase of how scholars pair up with mental health practitioners to create a work that weaves together contextual and individual qualities to inform an understanding of the help-seeker and the intervention. This book aims to help prepare both mental health trainees and practicing professionals to be effective in the provision of healing in their work with people in different regions of the world. Consequently, the authors hope to offer practitioners a glimpse of what can be achieved in these regions by people whose reputations within the respective communities are strong.

Local case studies in African land law-

Houses of the Dead-Alistair Barclay 2020-04-30 The chronological disjuncture, LBK longhouses have widely been considered to provide ancestral influence for both rectangular and trapezoidal long barrows and cairns, but with the discovery and excavation of more houses in recent times is it possible to observe evidence of more contemporary inspiration. What do the features found beneath long mounds tell us about this and to what extent do they represent domestic structures. Indeed, how can we distinguish between domestic houses or halls and those that may have been constructed for ritual purposes or ended up beneath mounds? Do so called 'mortuary enclosures' reflect ritual or domestic architecture and did side ditches always provide material for a mound or for building construction? This collection of papers seeks to explore the interface between structures often considered to be those of the living with those for the dead.

Case Studies in Linguistic Pragmatics-Martti Juhani Rudanko 2001 The six case studies presented here fall into three distinct groups. They examine the application of speech act theory to Shakespearean drama, consider 18th-century Congressional debates from the perspective of fallacy theory in informal logic, and focus more narrowly on applications of linguistic pragmatics. Specific topics include types and functions of unpleasant verbal behavior in Shakespeare's Coriolanus and Timon of Athens, promises and their contexts in Coriolanus, efforts to block the Bill of Rights in 1789, collocational coloring and electronic corpora, and contexts of phonologically null objects in object control structures in English and in Finnish. c. Taphonomy of Human Remains-Eline M. J. Schotsmans 2017-04-17 A truly interdisciplinary approach to this core subject within Forensic Science Combines essential theory with practical crime scene work Includes case studies Applicable to all time periods so has relevance for conventional archaeology, prehistory and anthropology Combines points of view from both established practitioners and young researchers to ensure relevance

Control of Dead-time Processes-Julio E. Normey-Rico 2007-06-14 This text introduces the fundamental techniques for controlling dead-time processes from simple monovariable to complex multivariable cases. Dead-time-process-control problems are studied using classical proportional-integral-differential (PID) control for the simpler examples and dead-time-compensator (DTC) and model predictive control (MPC) methods for progressively more complex ones. Downloadable MATLAB® code makes the examples and ideas more convenient and simpler.

Encyclopedia of Case Study Research-Albert J. Mills 2010 Case study research has a long history within the natural sciences, social sciences, and humanities, dating back to the early 1920's. At first it was a useful way for researchers to make valid inferences from events outside the laboratory in

ways consistent with the rigorous practices of investigation inside the lab. Over time, case study approaches garnered interest in multiple disciplines as scholars studied phenomena in context. Despite widespread use, case study research has received little attention among the literature on research strategies. The Encyclopedia of Case Study Research provides a compendium on the important methodological issues in conducting case study research and explores both the strengths and weaknesses of different paradigmatic approaches. These two volumes focus on the distinctive characteristics of case study research and its place within and alongside other research methodologies. Key Features Presents a definition of case study research that can be used in different fields of study Describes case study as a research strategy rather than as a single tool for decision making and inquiry Guides rather than dictates, readers' understanding and applications of case study research Includes a critical summary in each entry, which raises additional matters for reflection Makes case study relevant to researchers at various stages of their careers, across philosophic divides, and throughout diverse disciplines Key Themes Academic Disciplines Case Study Research Design Conceptual Issues Data Analysis Data Collection Methodological Approaches Theoretical Traditions Theory Development and Contributions From Case Study Research Types of Case Study Research

The Turn of the Screw-Henry James 2009-12-29 This volume presents the text of the New York Edition of James's classic 1898 short novel, along with documents that place the work in historical context and critical essays that read The Turn of the Screw from several contemporary critical perspectives. The text and essays are complemented by biographical and critical introductions, bibliographies, and a glossary of critical and theoretical terms. In this third edition, a new section details in unique depth the revisions James made from the serialized Colliers Weekly edition to the New York Edition. New documents and illustrations enhance the historical contexts section, and new psychoanalytic essay with a Lacanian perspective appears in the section of contemporary criticism.

Wealth in the Dead Sea Scrolls and in the Qumran Community-Catherine Murphy 2018-12-24 This volume explores the sectarian literature from Qumran, archaeological evidence from the site, contemporary records of commercial transactions, and secondary testimony on Essene economic practices, to establish the economic rationales and practices of the communities behind the Dead Sea Scrolls.

Toxic Torts-Carl F. Cranor 2006-09-04 The relationship between science, law and justice has become a pressing issue with US Supreme Court decisions beginning with Daubert v. Merrell-Dow Pharmaceutical. How courts review scientific testimony and its foundation before trial can substantially affect the possibility of justice for persons wrongfully injured by exposure to toxic substances. If courts do not review scientific testimony, they will deny one of the parties the possibility of justice. Even if courts review evidence well, the fact and perception of greater judicial scrutiny increases litigation costs and attorney screening of clients. Mistaken review of scientific evidence can decrease citizen access to the law, increase unfortunate incentives for firms not to test their products, lower deterrence for wrongful conduct and harmful products, and decrease the possibility of justice for citizens injured by toxic substances. This book introduces these issues, reveals the relationships that pose problems, and shows how justice can be denied.

Hard Evidence-Dawnie Wolfe Steadman 2015-08-07 An essential supplement to a forensic anthropology text, this reader provides case studies that demonstrate innovative approaches and practical experiences in the field. The book provides both introductory and advanced students with a strong sense of the cases that forensic anthropologists become involved, along with their professional and ethical responsibilities, the scientific rigor required, and the multidisciplinary nature of the science. For courses in Forensic Anthropology and Forensic Science.

Death, The Dead and Popular Culture-Ruth Penfold-Mounce 2018-06-01 Portrayals of death and the dead are everywhere within popular culture revealing much about contemporary society's engagement with mortality. Drawing upon celebrity posthumous careers, organ transplantation

mythology and the fictional dead, this book considers how representations of the dead in popular culture exert powerful agency.

Joyce and the City-Michael Begnal 2002-06-01 This collection of essays is the first work to focus entirely on the concept of space and its ramifications in the works of Joyce.

Necrophilia-Mitsuko Nighswander 2021-05-24 Necrophilia is a pathological fascination with dead bodies, which often takes the form of a desire to engage with them in sexual activities, such as intercourse. People with this sexual preference, or necrophiliacs, have admitted that the absence of emotion or social expectation, or the ability to exert absolute control over a corpse has made sexual relations more satisfying. Other necrophiliacs have admitted to many other reasons why they prefer to engage in sexual acts with the dead. This book explores this paraphilia in detail. It includes the categories of necrophilia, motivations for this deviant sexual behavior, and several true accounts of individuals who are infamous necrophiliacs. This book takes a fearless look at a most disturbing topic. It will be of interest to those in criminal psychology, sexual deviance, and forensic psychology.

Re-Covered Rose-Marco Sonzogni 2011 When a reader picks up a book, the essence of the text has been translated into the visual space of the cover. Using Umberto Eco's bestseller *The Name of the Rose* as a case study, this is the first study of book cover design as a form of intersemiotic translation based on the purposeful selection of visual signs to represent verbal signs. As an act of translation, the cover of a book ought to be an 'equivalent representation' of the text. But in the absence of any established interpretive criteria, how can equivalence between the visual and the verbal be determined and interpreted? *Re-Covered Rose* tackles this question in an original and creative way, laying the foundation for a new research trend in Translation Studies. Marco Sonzogni is Senior Lecturer in Italian, School of Languages and Cultures, Victoria University of Wellington, New Zealand. A widely published academic and an award-winning editor, poet and literary translator, he is the Director of the New Zealand Centre for Literary Translation/Te Tumu Whakawhiti Tuhinga.

Northern Lights on the Dead Sea Scrolls-Anders Kloostergaard Petersen 2009-03-25 This book originates from a series of conferences held by the Nordic Qumran Network, established 2003. The volume includes some of the best contributions presented at the four symposia held in Helsinki 2003, Oslo 2004, Jerusalem 2005, and Copenhagen 2006.

Case Study Designs in Music Therapy-David Aldridge 2005 This book shows, for the first time, how research and clinical work can creatively complement one another, proving beneficial to both disciplines. Each chapter is written by a leading researcher and practitioner in the field, and the book covers a wide spectrum of approaches within different settings.

Archaeologists and the Dead-Howard Williams 2016-06-09 This volume addresses the relationship between archaeologists and the dead, through the many dimensions of their relationships: in the field (through practical and legal issues), in the lab (through their analysis and interpretation), and in their written, visual and exhibitionary practice--disseminated to a variety of academic and public audiences. Written from a variety of perspectives, its authors address the experience, effect, ethical considerations, and cultural politics of working with mortuary archaeology. Whilst some papers reflect institutional or organizational approaches, others are more personal in their view: creating exciting and frank insights into contemporary issues that have hitherto often remained "unspoken" among the discipline. Reframing funerary archaeologists as "death-workers" of a kind, the contributors reflect on their own experience to provide both guidance and inspiration to future practitioners, arguing strongly that we have a central role to play in engaging the public with themes of mortality and commemoration, through the lens of the past. Spurred by the recent debates in the UK, papers from Scandinavia, Austria, Italy, the US, and the mid-Atlantic, frame these issues within a much wider international context that highlights the importance of cultural and historical context in which this work takes place.

Live Streaming with the Dead - when Ancestors Visit-Helen Neila Green 2014-09-19 The story element of Live Streaming with the Dead: When Ancestors Visit is constructed using factual information. The pictorial evidence presented of ancestral communication is real. All the characters are real people, and the scenarios are based on actual occurrences. Ancestral communication has taken place while this book was being written, and in a manner of speaking, such a phenomenon can perhaps be viewed as a form of “live-streaming with the dead.” Music forms an essential part of what is termed the spiritual investigation process discussed throughout this book. Each song or piece of music—or, in a number of cases, the lyrics, which are filled with messages—that has been quoted is relevant to the story with respect to the band or to the artist. The music also encourages the reader to tune in to the mental power of sound, thus demonstrating that the power of sound, although not expressed out loud as such, enables an additional medium to be utilized so that we may explore an added dimension, as it were, in awakening the reader’s “mental audio” faculties.

Frontiers of Governance-L. Pal 2012-02-07 The first detailed analysis of the Organisation for Economic Co-operation and Development's (OECD) influence on global public sector reform. Based on extensive interviews and internal documents, this book explores the evolution of the OECD's approach to governance issues over the last 50 years and what its future agenda should be.

Baptism on Account of the Dead (1 Cor 15:29)-Michael F. Hull 2005 This volume reviews and critiques the over forty different interpretations of 1 Cor 15: 29, then examines the verse anew in terms of its literary, historical, and theological contexts within the writings of Paul.

The Dead Sea Scrolls and Contemporary Culture-Adolfo D. Roitman 2011-03-21 This volume contains the proceedings of the international conference held at the Israel Museum in Jerusalem in July 2008 in honor of the 60th anniversary of the discovery of the Dead Sea Scrolls.

The Presence of the Dead in Our Lives-Nate Hinerman 2012-10 This volume offers a selection of articles from authors representing a wide array of disciplines, all of whom explore the following central theme: how can the presence of the dead take life in the hearts of the living? Although individuals die, they can i.

Living with the Dead-James L. Fitzsimmons 2011-05-15 Scholars have recently achieved new insights into the many ways in which the dead and the living interacted from the Late Preclassic to the Conquest in Mesoamerica. The eight essays in this useful volume were written by well-known scholars who offer cross-disciplinary and synergistic insights into the varied articulations between the dead and those who survived them. From physically opening the tomb of their ancestors and carrying out ancestral heirlooms to periodic feasts, sacrifices, and other lavish ceremonies, heirs revisited death on a regular basis. The activities attributable to the dead, moreover, range from passively defining territorial boundaries to more active exploits, such as dancing at weddings and witnessing royal accessions. The dead were and continued to be a vital part of everyday life in Mesoamerican cultures. This book results from a symposium organized by the editors for an annual meeting of the Society for American Archaeology. The contributors employ historical sources, comparative art history, anthropology, and sociology, as well as archaeology and anthropology, to uncover surprising commonalities across cultures, including the manner in which the dead were politicized, the perceptions of reciprocity between the dead and the living, and the ways that the dead were used by the living to create, define, and renew social as well as family ties. In exploring larger issues of a good death and the transition from death to ancestry, the contributors demonstrate that across Mesoamerica death was almost never accompanied by the extinction of a persona; it was more often the beginning of a social process than a conclusion.

The Art of Feature Engineering-Pablo Duboue 2020-05-31 A practical guide for data scientists who want to improve the performance of any machine

learning solution with feature engineering.

Counting the Dead-Winifred Tate 2007-10-09 At a time when a global consensus on human rights standards seems to be emerging, this rich study steps back to explore how the idea of human rights is actually employed by activists and human rights professionals. Winifred Tate, an anthropologist and activist with extensive experience in Colombia, finds that radically different ideas about human rights have shaped three groups of human rights professionals working there--nongovernmental activists, state representatives, and military officers. Drawing from the life stories of high-profile activists, pioneering interviews with military officials, and research at the United Nations Human Rights Commission in Geneva, Counting the Dead underscores the importance of analyzing and understanding human rights discourses, methodologies, and institutions within the context of broader cultural and political debates.

The Living and the Dead-Liz Wilson 2003-09-11 Explores the social treatment of death in South Asian religions, including Hinduism, Buddhism, Islam, and other traditions. Includes material on women and marginalized groups.
