Bone and Dream-Lake Sagaris 2000 Although the mysterious, beautiful Atacama rises out of the Pacific, it is the driest place on earth, with powers of preservation so strong it still holds many of its earliest inhabitants in thrall, mummified by nature. As Lake Sagaris journeys into Atacama, where foreign mining companies, including Canadian, plunder the desert for treasures left by volcanic eruptions of the past, she interweaves the story of La Tirana who created her own community in fierce resistance to the Spanish invaders and died at the hands of her people moments before her marriage to a Christian captive. Bone and Dream, brilliantly fusing fiction and non-fiction, is a tribute to those who ventured into the desert over thousands of years and melded into its surface of rock and bone.

Egypt’s Desert Dreams-David Sims 2015-03-27 Egypt has placed its hopes on developing its vast and empty deserts as the ultimate solution to the country’s problems. New cities, new farms, new industrial zones, new tourism resorts, and new development corridors, all have been promoted for over half a century to create a modern Egypt and to pull tens of millions of people away from the increasingly crowded Nile Valley into the desert hinterland. The results, in spite of colossal expenditures and ever-grander government pronouncements, have been meager at best, and today Egypt’s desert is littered with stalled schemes, abandoned projects, and forlorn dreams. It also remains stubbornly uninhabited. Egypt’s Desert Dreams is the first attempt of its kind to look at Egypt’s desert development in its entirety. It recounts the failures of governmental schemes, analyzes why they have failed, and exposes the main winners of Egypt’s desert projects, as well as the underlying narratives and political necessities behind it, even in the post-revolutionary era. It also shows that all is not lost, and that there are alternative paths that Egypt could take.

The Glass Castle-Jeanette Walls 2006-01-02 Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children’s imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn’t stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

Scenario Based Strategy-Paul de Ruijter 2016-04-01 We need strategy. The world is changing, the future uncertain. What is required is vision: What might the future bring? Where is our business going? What are our fundamental business values? This book is a manual for all those who want to apply strategy in organisations. It is intended for everyone who wants to put the future on the agenda, to look beyond the short term and beyond mere profit. It describes in practical terms the eight questions we must continually discuss in order to pursue a future-proof strategy in a dynamic and uncertain world: mission, trends, scenarios, options, vision, roadmap, action and monitoring. If you are dissatisfied with an approach to strategy based on simple backward looking analysis, management controls and problems solving after the fact, but would like to make a positive contribution to thinking about the future, Scenario-based Strategy offers the instruments to turn your intention into practice. The text provides examples from commercial to government and trade organizations; showing how others have undertaken future explorations and how they used these explorations to create a dynamic strategy. Paul de Ruijter has a deep insight into the theory, alongside practical experience working with some of the most highly regarded and resilient organizations. The result is a rich combination of methodology and practical, engaging examples that shows you how to go about creating an agenda for the future.

Dreaming in Byzantium and Beyond-George T. Calofonos 2016-05-13 Although the actual dreaming experience of the Byzantines lies beyond our reach, the remarkable number of dream narratives in the surviving sources of the period attests to the cardinal function of dreams as vehicles of meaning, and thus affords modern scholars access to the wider cultural fabric of symbolic representations of the Byzantine world. Whether recounting real or invented dreams, the narratives serve various purposes, such as political and religious agendas, personal aspirations or simply an author’s display of literary skill. It is only in recent years that Byzantine dreaming has attracted scholarly attention, and important publications have suggested the way in which Byzantines reshaped ancient interpretative models and applied new perceptions to the functions of dreams. This book - the first collection of studies on Byzantine dreams to be published - aims to demonstrate further the importance of closely examining dreams in Byzantium in their wider historical and cultural, as well as narrative, context. Linked by this common thread, the essays offer insights into the function of dreams in hagiography, historiography, rhetoric, epistolography, and romance. They explore gender and erotic aspects of dreams; they examine cross-cultural facets of dreaming, provide new readings, and contextualize specific cases; they also look at the Greco-Roman background and Islamic influences of Byzantine dreams and their Christianization. The volume provides a broad variety of perspectives, including those of psychoanalysis and anthropology.

Desert Dreamers-Barbara Glowczewski 2016-03-01 In the heart of Australia, on the cracked red earth, among wild vegetation, weathered bush, and dried-up creeks, hundreds of invisible pathways exist that become entangled on the earth’s surface, underground, and in the sky, clouds, and wind. The Aboriginal people call them Jukurrpa: “the Dreamings.” This web is the Warlpiri land. Practicing the Dreaming, by ritual art, is for the Warlpiri a way to reactivate their ancestral traditions to connect with the cosmos and respond to current social and political issues. In 1979, anthropologist Barbara Glowczewski embarked on a journey to study the Warlpiri in the Australian outback. Struggling at once to maintain their traditions and cultural heritage as well as adapting to the continuing secularization and techno-progress of their European Australian counterparts, she takes us into the landscape, artistic rituals, and turmoil of the Warlpiri over three decades. Becoming accepted among Aboriginal families as a translator, and at the same time a negotiator of two vastly different visions of the earth, contemporary Western culture and the ancient indigenous dreaming culture, Glowczewski created a singular document of ethnological fieldwork and of self-transformation and discovery.

When The Emperor Was Divine-Julie Otsuka 2012-04-05 Longlisted for the Orange Prize for Fiction It is four months after Pearl Harbour and overnight signs appear all over the United States instructing Japanese Americans to report to internment camps for the duration of the war. For one family it proves to be a nightmare of oppression and alienation. Explored from varying points of view - the mother receiving the order to evacuate; the daughter on the long train journey; the son in the desert encampment; the family’s return home; and the bitter release of their father after four years in captivity - it tells of an incarceration that will alter their lives for ever. Based on a true story, Julie Otsuka’s powerful, deeply humane novel tells of an unjustly forgotten episode in America’s wartime history.

Energy from the Desert: Practical Proposals for Very Large Scale Photovoltaic Systems-Kosuke Kurokawa 2012-05-04 The world’s deserts are sufficiently large that, in theory, covering a fraction of their landmass with PV systems could generate many times the current primary global energy supply. In three parts, this study details the background and concept of VLS-PV, maps out a development path towards the realization of VLS-PV systems and provides firm recommendations to achieve long-term targets. This represents the first study to provide a concrete set of answers to the questions that must be addressed in order to secure and exploit the potential for VLS-PV technology and its global benefits.
