Theories And Causes Of War

What Causes War?-Greg Cashman 2013-07-29 Now in a thoroughly revised and updated edition, this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war. For each theory, Greg Cashman examines the arguments and counterarguments, considers the empirical evidence and counterevidence generated by social-science research, looks at historical applications of the theory, and discusses the theory’s implications for restraining international violence. Among the questions he explores are: Are humans aggressive by nature? Do individual differences among leaders matter? How might poor decision making procedures lead to war? Why do leaders engage in seemingly risky and irrational policies that end in war? Why do states with internal conflicts seem to become entangled in wars with their neighbors? What roles do nationalism and ethnicity play in international conflict? What kinds of countries are most likely to become involved in war? Why have certain pairs of countries been particularly war-prone over the centuries? Can strong states deter war? Can we find any patterns in the way that war breaks out? How do balances of power or changes in balances of power make war more likely? Do social scientists currently have an answer to the question of what causes war? Cashman examines theories of war at the individual, substate, nation-state, dyadic, and international systems level of analysis. Written in a clear and accessible style, this interdisciplinary text will be essential reading for all students of international relations.

Title: Theories of War and Peace-Michael E. Brown 1998-09-15

New approaches to understanding war and peace in the changing international system. What causes war? How can wars be prevented? Scholars and policymakers have sought the answers to these questions for centuries. Although wars continue to occur, recent scholarship has made progress toward developing more sophisticated and perhaps more useful theories on the causes and prevention of war. This volume includes essays by leading scholars on contemporary approaches to understanding war and peace. The essays include expositions, analyses, and critiques of some of the more prominent and enduring explanations of war.

Several authors discuss realist theories of war, which focus on the distribution of power and the potential for offensive war. Others examine the prominent hypothesis that the spread of democracy will usher in an era of peace. In light of the apparent increase in nationalism and ethnic conflict, several authors present hypotheses on how nationalism causes war and how such wars can be controlled. Contributors also engage in a vigorous debate on whether international institutions can promote peace. In a section on war and peace in the changing international system, several authors consider whether rising levels of international economic independence and environmental scarcity will influence the likelihood of war.

Title: The Causes of War-David Sobek 2013-04-25

Wars often spring out of nowhere with little warning. One need only look at the recent troubles at the Lebanon-Israeli border for evidence of this claim. At other points in history, such as the run-up to the Second World War, wars seem all but foretold. How does one understand a phenomenon that, at times, seems so random, while at others so predictable? Is there an underlying "cause" of war and, if so, what is it? In this book, David Sobek argues that there is no single
explanation for war: factors leading to war in one case may well lead to peace in another. Understanding the onset of war, he contends, requires a movement away from single theories towards one that embraces the multi-faceted causes of war. The characteristics of individual states, the strategic interaction of multiple states, and the broad structure of the international system all affect the risk of war. Throughout the book Sobek draws on a wide range of examples – from the rise of Japan in the 19th century to the emergence of Hamas in the 21st century – to show how both domestic and international politics push states to, or pull them from, the brink of armed conflict. While civil war and terrorism are often viewed as a form of violence distinct from interstate war, Sobek examines them as simply an extreme form of asymmetric warfare. From this perspective terrorism emerges as just another tactic used by actors engaged in armed conflict. The Causes of War will be essential reading for students of security and strategic studies as well as anyone seeking to understand the rise of violent conflict in the contemporary world.

War, Peace, and International Politics-David W. Ziegler 2000 War, Peace, and International Politics, Eighth Edition, begins by examining a unique characteristic of international relations: war. The text seeks to discover the causes of war by looking at historical cases and moves from these cases to theories about the causes of war. It then looks at a variety of proposals for eliminating war, or, if not eliminating, then reducing its incidence or ameliorating its effects. Ten different approaches to reducing conflict are assessed for weaknesses and strengths.

An Introduction to the Causes of War-Greg Cashman 2007 Explains the causes of war through a sustained combination of theoretical insights and detailed case studies. This work through the examples of World War I, World War II in the Pacific, the Indo-Pakistani War of 1971, and others, uncovers the complex multi-level processes by which disputes between countries evolve into bloody conflicts.
"Instead of proposing another theory of war, their goal is a more modest one of raising the theoretical consciousness of historians. Specifically, they argue that '1) ideology does influence theory, 2) historians do have ideologies as well as theories . . . about which they are not always conscious or consistent, and 3) we can better understand, compare, and evaluate what historians are saying when we comprehend their ideological and theoretical perspectives.' They attempt then, to classify historical interpretations of war according to their ideological/ theoretical orientations, however covert." --Perspective "Nelson and Olin . . . are concerned with enhancing history's social utility by advancing its capacity to produce generalizations that can explain or predict events and are subject to empirical testing. Their exploration of historical generalization focuses on an issue itself of the highest importance, the causes of war; but their aim is also to create a model for historical generalization applicable to other issues. They argue that to understand generalizations in history, one must recognize their roots in theory, and that historians' theories in turn proceed from their own ideologies. To demonstrate, they survey theories about the causes of war that have come out of conservative, liberal, and radical ideologies. . . . any historian will profit from this rigorous approach to the problem." --Choice
"Learned and suggestive, this book clarifies much of what is already known, and points toward new ways of understanding."--Library Journal

Analyzing the Causes of War-Assistant Professor of Government
Jack S Levy 2016-06-30 This volume is a collection of some of the
most influential essays by Jack Levy on the causes of interstate
war. These studies focus on the role of power in the international
system, the domestic sources of security policy and war, and the
psychology of decision-making. Among the themes uniting all of
these studies is that there are patterns in the processes leading to
interstate wars, that these patterns are complex, and that an
understanding of war requires rigorous theory and that a key
prerequisite of theory is conceptual clarity. The focus is on
theoretical essays on war and on decision-making in security
policy. These essays involve the critique and reconceptualization
of major theories of war. For each theory, the author engages in
the conceptual clarification of key variables, the identification of
the varied causal paths through which each shapes decisions for
war and peace, the analytical limitations of the theory, and the
methodological hurdles confronting valid empirical tests of the
theory. The volume begins with a substantial introductory
chapter. Each subsequent chapter begins with a brief
introduction, and ends with an annotated bibliographic note that
identifies important subsequent work on the topic, and includes a
complete set of references. The chapters are organized by a
levels-of-analysis framework. It begins with four chapters
focusing on power dynamics at the systemic or dyadic levels,
including balance of power theory, power transition theory,
theories of preventive war, and offense-defense theory. It then
turns to the diversionary theory of war, a leading societal-level
theory focusing on domestic incentives for adventurous foreign
policies. Next are three studies focusing on individual-level,
psychological sources of security policy, including misperception,
learning, and risk propensity (in the form of prospect theory). The
concluding chapter attempts to survey the current state of the art
in the study of the causes of interstate war, and identifies some of
the major unanswered questions and suggests a number of fruitful paths for future research. This book will be of much interest to students of the causes of war, quantitative methods, war and conflict studies, international relations and security studies.

Effects of War on Society-Giorgio Ausenda 2002 The conference 'Effects of War on Society' was the first in a series aimed at placing in perspective the sociocultural variables that make outbreaks of war probable, and identifying for policy-makers steps that can be taken to control these variables. The papers focus on analysis of historical thinking on war, anthropological analysis of the effects of war on societies at different levels of sociocultural integration, the expansion and decline of multi-ethnic states, and the wider effects of war -- political, economic and moral. Inequality and Identity-Göran Holmqvist 2012-02 In this paper, four theories on the causes of civil war are reviewed. One theory, associated with Paul Collier, emphasises feasibility over factors related to grievance. A second theory, espoused by Frances Stewart, focuses on the role of horizontal inequalities. The third theory, identified with William Zartman, highlights the different roles "need, creed and greed" factors play in various phases of a conflict. And the fourth theory, associated with the World Bank/World Development Report 2011, points out "commitment" problems leading to institutional failures as a crucial factor. Each of the theories leads to quite different policy conclusions. Their strengths and weaknesses, and their claimed empirical support,
are discussed. In addition, some of the mechanisms underpinning the theories are highlighted on the basis of empirical data. In particular, the central role of horizontal inequalities between social groups is discussed.

Economic Theories of Peace and War-Fanny Coulomb 2004-07-29

War often comes down to one thing: money. The role of economics in the study of both peace and war is arguably then the most important single factor when it comes to the study of defence. This excellent new book from Fanny Coulomb will be of interest not only to those involved in the burgeoning field of defence economics - it will also be of vital interest to students and academics from international relations, defence studies, philosophy and political science backgrounds.

Power and the Pursuit of Peace: Theory and Practice in the History of Relations Between States-F. H. Hinsley 1967-10

In the last years of the nineteenth century peace proposals were first stimulated by fear of the danger of war rather than in consequence of its outbreak. In this study of the nature and history of international relations Mr Hinsley presents his conclusions about the causes of war and the development of men's efforts to avoid it. In the first part he examines international theories from the end of the middle ages to the establishment of the League of Nations in their historical setting. This enables him to show how far modern peace proposals are merely copies or elaborations of earlier schemes. He believes there has been a marked reluctance to test these theories not only against the formidable criticisms of men like Rousseau, Kant and Bentham, but also against what we have learned about the nature of international relations and the history of the practice of states. This leads him to the second part of his study - an analysis of the origins of the modern states' system and of its evolution between the eighteenth century and the First World War.

Power and interdependence: World politics in transition  
Theories of Imperialism (Routledge Revivals)-Norman Etherington 2014-07-11 First published in 1984, this study examines closely the shifting attitudes towards, and theories concerning, imperialism, from the colonial wars of the late nineteenth century to America’s involvement in Vietnam. This lucid investigation encompasses the World Wars, the disintegration of the Colonies and the Cold War. It also gives fascinating insight into the theories of imperialism advocated by such diverse writers as Hobson, Wilshire, Angell, Brailsford, Luxemberg and Lenin. Throughout, the author objectively evaluates the theory that capitalism is a cause of aggression – a fundamental tenet of anti-imperialist writers. It is Norman Etherington’s contention that further investigations into the sources, causes and effects of imperialism can only take place if the various theories concerning it are analysed. A fascinating and detailed study, this reissue will be of particular value to students interested in the theories and history of imperialism.
Causes of War-Thomas Lindemann 2011-09-01 Theories on the origins of war are often based on the premise that the rational actor is in pursuit of material satisfaction, such as the quest for power or for wealth. These perspectives disregard the need for homo symbolicus – meaning the preservation of a positive self-image for both emotional and instrumental reasons. A good reputation ensures authority and material resources. Non-recognition can be as much as an explanation of war as that of other explicative ‘variables’. Two empirical studies examining the role of non-recognition in great power conflicts and in international crises will demonstrate the value of this symbolic approach.

War in Economic Theories over Time - Renata Allio 2020-03-21
This book offers the first systematic analysis of economic thought concerning war. It retracts debates on war from the formation of European states, the rise of Mercantilism, to Colonialism, Imperialism, the World Wars and the Cold War. Allio shows different economic perspectives from which it is possible to study war as a tool to achieve economic ends: causes, consequences, costs, funding methods, and effects on the economic status of the state and on the well-being of citizens. Examining interpretations from Smith, Hobson, Keynes, Kalecki, Stiglitz and many more, this important volume addresses the economic implications of war from the perspectives of many who bore the costs of wars in reality.

China’s Use of Military Force in Foreign Affairs-Markus B. Liegl
2017-03-16 This book explains why China has resorted to the use
of large-scale military force in foreign affairs. How will China use
its growing military might in coming crisis and existing conflicts?
This book contributes to the current debate on the future of the
Asia-Pacific region by examining why China has resorted to using
military force in the past. Utilizing fresh theoretical insights on
the causes of interstate war and employing a sophisticated
methodological framework, the book provides detailed analyses of
China’s intervention in the Korean War, the Sino-Indian War,
China’s border clashes with the Soviet Union and the Sino-
Vietnamese War. It argues that China did not employ military
force in these wars for the sake of national security or because of
material issues under contestation, as frequently claimed. Rather,
the book’s findings strongly suggest that considerations about
China’s international status and relative standing are the
principal reasons for China’s decision to engage in military force
in these instances. When reflecting the study’s central insight
back onto China’s contemporary territorial conflicts and
problematic bilateral relationships, it is argued that the People’s
Republic is still a status-seeking and thus highly status-sensitive
actor. As a result, China’s status ambitions should be very
carefully observed and well taken into account when interacting
with the PRC. This book will be of much interest to students of Chinese foreign policy, Asian politics, military and strategic studies and IR in general.

Political Violence, Crises, and Revolutions-Ekkart Zimmermann 1983
Blood of the Beloved-Mary Coleman 2007-08 Will it ever be possible to stop war, or is war an intractable problem? Combining the disciplines of history, psychiatry and neurology, the author probes this question in the tradition of C.P. Snow. Archeologists of the future reveal how purity is tied to violence, the existence of shame societies and guilt societies, bloody sacrificial rituals and why many women support war. Horrified by the death toll, the suicide bombers and the use of diabolic weapons of our times, they discuss how our society eventually abandoned war.

The Strategy of Denial-Elbridge A. Colby 2021 Why and how America’s defense strategy must change in light of China’s power and ambition—A Wall Street Journal best book of 2021 “This is a realist’s book, laser-focused on China’s bid for mastery in Asia as the 21st century’s most important threat.”—Ross Douthat, New York Times “Colby’s well-crafted and insightful Strategy of Denial provides a superb and, one suspects, essential departure point for an urgent and much-needed debate over U.S. defense strategy.”—Andrew F. Krepinevich, Jr., Foreign Affairs Elbridge A. Colby was the lead architect of the 2018 National Defense Strategy, the most significant revision of U.S. defense strategy in a generation. Here he lays out how America's defense must change to address China's growing power and ambition. Based firmly in the realist tradition but deeply engaged in current policy, this book offers a clear framework for what America's goals in confronting China must be, how its military strategy must change, and how it must prioritize these goals over its lesser interests. The most informed and in-depth reappraisal of
America's defense strategy in decades, this book outlines a rigorous but practical approach, showing how the United States can prepare to win a war with China that we cannot afford to lose—precisely in order to deter that war from happening. Contending Theories of International Relations-James E. Dougherty 1981 Dougherty, James, Pfaltzgraff, Jr., Robert L., Contending Theories of International Relations: A Comprehensive Survey, 5th Edition* The most comprehensive and inclusive survey and synthesis available on the subject, this book makes the rich, ever-evolving complexity of IR theories accessible and fascinating for readers. Widely acclaimed for its vast scope, engaging writing style, and abundant citation of reference sources, the Fifth Edition has been thoroughly revised and updated to reflect the various paradigmatic and theoretical debates that have emerged since the end of the Cold War. The book incorporates the most significant current writings on all areas of theory from neorealism, neoliberal theory, postmodernism, and constructivism to globalization, ethnic conflict, international terrorism, and new approaches to deterrence amidst proliferation of Weapons of Mass Destruction technologies. History Capitalism-1999 War Crimes-Matthew Talbert 2018-11 In 2005, US Marines killed 24 unarmed Iraqi civilians in the town of Haditha, including several children. How should we assess the perpetrators of this
and other war crimes? Is it unfair to blame the Marines because they were subject to situational pressures such as combat stress (and had lost one of their own in combat)? Or should they be held responsible for their actions, since they intentionally chose to kill civilians? In this book, Matthew Talbert and Jessica Wolfendale take up these moral questions and propose an original theory of the causes of war crimes and the responsibility of war crimes perpetrators. In the first half of the book, they challenge accounts that explain war crimes by reference to the situational pressures endured by military personnel, including peer pressure, combat stress, and propaganda. The authors propose an alternative theory that explains how military personnel make sense of their participation in war crimes through their self-conceptions, goals, and values. In the second half of the book, the authors consider and reject theories of responsibility that excuse perpetrators on the grounds that situational pressures often encourage them to believe that their behavior is permissible. Such theories of responsibility are unacceptably exculpatory, implying it is unreasonable for victims of war crimes to blame their attackers. By contrast, Talbert and Wolfendale argue that perpetrators of war crimes may be blameworthy if their actions express objectionable attitudes towards their victims, even if they sincerely believe that what they are doing is right.
