Theories of Personality-Duane P. Schultz 2016-01-01 Filled with updated research and findings, Schultz and Schultz's THEORIES OF PERSONALITY, 11th Edition gives students a clear and cogent introduction to this dynamic field. Organized by theory, this popular text discusses major theorists who represent psychoanalytic, neopsychoanalytic, lifespan, trait, humanistic, cognitive, behavioral, and social-learning approaches, while demonstrating the influence of events in theorists' personal and professional lives on the development of their theories. The text reviews current work on selected facets of personality including locus of control, sensation seeking, learned helplessness, optimism-pessimism, and positive psychology. The authors also explore the ways in which race, gender, and cultural issues play a part in the study of personality and in personality assessment. The final chapter, Personality in Perspective, integrates topics explored in previous chapters and suggests conclusions that can be drawn from the many theorists' work. Personality-Howard S. Friedman 2006 This successful text puts "personality" back into the personality course. Integrating the classic insights of personality theorists with the modern research of investigators in the field, "Personality" will fascinate students and encourage deeper thought. This text explores classic theory from a perspective that encourages critical thinking and fosters intellectual insight with respect to human nature. For example, it shows the relevance of classic theory to topics of personality and culture, evolution, ego, gender, and person-situation interactionism. Employing the highest scientific standards, "Personality" also uses a wide range of unique and provocative pedagogical devices that have been shown to motivate students. Hailed as the best-written, most relevant personality textbook on the market, Friedman and Schustack's third edition brings the field of personality to today's diverse student body. New and Enduring Features New "Sharpen Your Thinking" boxes underscore for students how the assumptions of specific personality approaches affect life and society. New material on biological, trait, and evolutionary aspects of personality is integrated throughout the text, with an emphasis on critical discussion of strengths, weaknesses, and misuses of these approaches. Updated discussions of happiness, hate, and culture help students understand the timely topics of terror/conflict and self-
actualization/healing. Increased coverage of cross-cultural and gender issues brings these topics to the forefront of students learning. Timelines of developments within the field help students understand the intellectual progression of ideas and the connections between science and society. Theories of Personality by Jess and Gregory Feist presents 23 leading theories of personality in a thorough, interesting and logical manner. The book begins with an introductory chapter designed to acquaint students with the meaning of personality and provide them with a solid foundation for understanding the nature of personality and its crucial contributions to science. The next seventeen chapters present twenty three major theories with a fresh approach and a more complete view encompassing, a biographical sketch of each theorist, related research and applications to real life. When appropriate, the authors point out ways in which the theorists life experiences may have helped shape her or his theory. Feist & Feist's Theories of Personality organizes personality theories into four major approaches. First it presents the psychodynamic theories of Sigmund Freud, Carl Jung, Alfred Adler, Melanie Klein, Margaret Mahler, Otto Kernberg, Heinz Kohut, John Bowlby, Karen Horney, Erich Fromm, Harry Stack Sullivan and Erik Erikson. Next, it discusses the learning theories of B.F. Skinner, Albert Bandura, Walter Mischel, and Julian Rotter. The third major approach includes the dispositional theories of Raymond B. Cattell, Hans Eysenck, and Gordon Allport. The next section includes the humanistic/existential theories of George Kelly, Carl Rogers, Abraham H. Maslow, and Rollo May. The book concludes with a final word on theorists of personality, a summary of their concepts of humanity and an overall evaluation of their theories.

Mental Health Nursing by Gylo (Julie) Hercelinskyj 2019-07-30 Mental Health Nursing: Applying Theory to Practice is a new Australian text combining a theoretical approach to mental health nursing with clinical reasoning and a practical framework for real-life nursing situations. Ideal for both clinical and theory mental health course units, the text was developed with input from consumers and clinicians, and includes the clinical manifestations, impacts, treatment and management of persons suffering from mental illness. Chapters on suicide and self-harm, and Mental Health First Aid provide detailed coverage of these contemporary mental health issues, while a chapter on mental state examination (MSE) comprehensively explores MSE in a style similar to a traditional psychiatry text and in the context of many different mental health conditions, giving students multiple perspectives of presentations. Critical thinking and review questions challenge students to apply theory to practice, and pharmacology is discussed in each disorder-chapter, helping students to contextualise their learning. With coverage of the Mental Health Act (2014), and criteria from the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5) integrated throughout, the text equips students with a working understanding of major mental health disorders, and the ability to work practically when engaging with persons suffering from
mental illness. New, print versions of this book come with bonus online study tools on the CourseMate Express and Search Me! Nursing platforms.

Mission Mastery-Brian Dive 2016-01-22 This book reveals the story of how the first large learning organization was formed. Emerging around 1870, it involved an organizational transformation that followed a disaster some 60 years earlier. The great success of this process was the introduction of a totally new approach to leadership – a competitive edge that would go undetected for another 100 years. The original development involved the Prussian/German Army under a great leader, Helmut von Moltke. NATO countries finally discovered this “secret weapon,” which they have since implemented in their mission command centers, in the 1980s. The book distills five underlying features or pillars of the transformed organization, and describes how they can be applied in civilian organizations to attain a state of Mission Mastery. Never before published, these ideas are
supplemented by numerous references and practical examples to illustrate the persuasive power of the case made – namely that most civilian organizations are weak in terms of the five key ingredients needed for Mission Mastery. “This book is a must-read for all charged with developing tomorrow’s leaders.” Sir Michael Perry, GBE – previously Chairman and Chief Executive Officer at Unilever, Chairman of Centrica, Chairman of the Senior Salaries Review Body, Independent Director at Singapore Technologies Telemedia Pte. Ltd and Chairman of the Faculty Board at the Said Business School, Oxford University. “Mission Mastery is a masterwork.” Professor Stephen J. Perkins, DPhil (Oxon) Dean Guildhall Faculty of Business & Law, London Metropolitan University, UK “No other book on organizational leadership is as relevant today as Mission Mastery”. Gerald A. Arbuckle, Organizational Anthropologist, and author of Humanizing Healthcare Reforms
