Improving Students' Writing in Higher Education-Abdeljalil Ohra 2020-01-14 Bachelor Thesis from the year 2019 in the subject Didactics - English - Grammar, Style, Working Technique, Sultan Moulay Sliman University, language: English, abstract: The present study generally aims to enlighten some possible ways and strategies that could help academic learners of EFL to improve their writing levels. To state these ways, the questionnaire is used to collect data, and it was distributed to participants in S2 and S6 in order to know whether there is some improvement or not. Yet, the researcher employed mixed methods since both quantitative and qualitative methods are required to collect data. The findings of this research revealed that students' writing still needs improvement. Finally, the results of this monograph may urge students to ameliorate their writing skill. Writing is a component of language skill which occurs after speaking. In addition, it provides a relatively permanent record of information, opinions, beliefs, feelings, arguments, explanations, theories, etc.. Writing also allows us to share communication not only with our contemporaries, but also with future generations as well as it permits people from the near and far distance past to speak to us. In fact, it is the official element for the development of printed documents, books and Internets. Therefore, writing is the best supportive tool for us, and it plays an important role in our life.

Changing the Conversation about Higher Education-Robert Joseph Thompson 2013 This book hopes
to change the nature of the conversation about higher education from critiques to focusing on efforts of systematic improvement in undergraduate education. Changing the Conversation about Higher Education establishes a culture of experimentation and evidence for undergraduate education through undertaking teaching and learning experiments at 13 universities. This book discusses the contributions and findings from these experiments and is intended for academic administrators, faculty, and graduate students who are interested in improving undergraduate teaching and learning. The experiments are directed at two core aims of a liberal education: critical thinking and writing. The book is structured to address the issues of vision, structure, and cultural transformation that are of specific interest to academic administrators and the promising practices and issues of identity and support that are concerns of faculty and graduate students.

Issues in English Education in the Arab World-Rahma Al-Mahrooqi 2014-11-19 Though diverse, the Arab world boasts a unique culture and native language, both of which are unlike those found in English-speaking countries. Perhaps due to the nature of these differences, Arab-Western relations have been described as existing on one of the world’s great cultural fault-lines. Debate about the potential effects, both positive and negative, of English-medium education and the learning of English in the region’s schools and universities is one expression of this. Even as debate continues, issues of politics, culture, social mobility, and identity are played out in the English language classrooms of the Arab world on a daily basis. The current volume explores some of the concerns related to the place of English and English-medium education in the Arab world. It examines issues of the relationship between English, Arabic, cultural identity and power in the region within a historical and contemporary framework; the experiences of learners from Arabic-medium secondary schools adjusting to English-medium colleges; and the challenges and potential rewards of
promoting student-centered classrooms and technology in traditionally teacher-centered environments. These issues are explored from the perspectives of teachers, students, researchers and other stakeholders in Oman, Saudi Arabia, the UAE, and Sudan.

Thesis and Dissertation Writing in a Second Language-Brian Paltridge 2007-06-11 The relationship of supervisor to student has traditionally been seen as one of apprenticeship, in which much learning is tacit, with the expectation that the student will become much like the tutor. The changing demographics of higher education in conjunction with imperatives of greater accountability and support for research students have rendered this scenario both less likely and less desirable and unfortunately many supervisors are challenged by the task of guiding non-native speaker students to completion. This handbook is the ideal guide for all supervisors working with undergraduate and postgraduate non-native speaker students writing a thesis or dissertation in English as it explicitly unpacks thesis writing, using language that is accessible to research supervisors from any discipline.

Intelligent Tutoring Systems-Stefan Trausan-Matu 2014-05-24 This book constitutes the refereed
proceedings of the 12th International Conference on Intelligent Tutoring Systems, ITS 2014, held in Honolulu, HI, USA, in June 2014. The 31 revised full papers, 45 short papers and 27 posters presented were carefully viewed and selected from 177 submissions. The specific theme of the ITS 2014 conference is "Creating fertile soil for learning interactions". Besides that, the highly interdisciplinary ITS conferences bring together researchers in computer science, learning sciences, cognitive and educational psychology, sociology, cognitive science, artificial intelligence, machine learning and linguistics. The papers are organized in topical sections on affect; multimodality and metacognition; collaborative learning; data mining and student behavior; dialogue and discourse; generating hints, scaffolds and questions; game-based learning and simulation; graphical representations and learning; student strategies and problem solving; scaling ITS and assessment.

Handbook of Classroom Management-Carolyn M. Evertson 2013-10-31 Classroom management is a topic of enduring concern for teachers, administrators, and the public. It consistently ranks as the first or second most serious educational problem in the eyes of the general public, and beginning teachers consistently rank it as their most pressing concern during their early teaching years. Management problems continue to be a major cause of teacher burnout and job dissatisfaction. Strangely, despite this enduring concern on the part of educators and the public, few researchers have chosen to focus on classroom management or to identify themselves with this critical field. The Handbook of Classroom Management has four primary goals: 1) to clarify the term classroom management; 2) to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers’ managerial tasks; 3) to bring together disparate lines of research and encourage conversations across different areas of inquiry; and 4) to promote a vigorous agenda for future research in this area. To this end, 47 chapters have been organized into...
10 sections, each chapter written by a recognized expert in that area. Cutting across the sections and chapters are the following themes: *First, positive teacher-student relationships are seen as the very core of effective classroom management. *Second, classroom management is viewed as a social and moral curriculum. *Third, external reward and punishment strategies are not seen as optimal for promoting academic and social-emotional growth and self-regulated behavior. *Fourth, to create orderly, productive environments teachers must take into account student characteristics such as age, developmental level, race, ethnicity, cultural background, socioeconomic status, and ableness. Like other research handbooks, the Handbook of Classroom Management provides an indispensable reference volume for scholars, teacher educators, in-service practitioners, and the academic libraries serving these audiences. It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management.

7th International Conference on University Learning and Teaching (InCULT 2014) Proceedings-Chan Yuen Fook 2015-12-30 The book comprises papers presented at the 7th International Conference on University Learning and Teaching (InCULT) 2014, which was hosted by the Asian Centre for Research on University Learning and Teaching (ACRULET) located at the Faculty of Education, Universiti Teknologi MARA, Shah Alam, Malaysia. It was co-hosted by the University of Hertfordshire, UK; the University of South Australia; the University of Ohio, USA; Taylor’s University, Malaysia and the Training Academy for Higher Education (AKEPT), Ministry of Education, Malaysia. A total of 165 papers were presented by speakers from around the world based on the theme “Educate to Innovate in the 21st Century.” The papers in this timely book cover the latest developments, issues and concerns in the field of teaching and learning and provide a valuable reference resource on university teaching and learning for lecturers, educators, researchers and
Building Student Resilience Through the Use of Managed Writing Portfolios-Jason DiSalle 2018 This research study examined whether non-cognitive skills, namely grit and resilience, could be enhanced in relation to the writing skills in a grade-eight ELA classroom. Since there were typically a large number of middle-school students who suffered from weak writing skills, and since many students tended to repeat their mistakes in a cycle that constrained their potential, this study sought to find a way to improve not only the writing skills of the students, but also their ability to persevere through writing tasks and their sense of confidence in their ability to improve. ... The study found that the use of managed writing portfolios and the success trackers did help the students to become more skilled at self-reflection and more aware of their strengths and weaknesses as writers. They also had an improved optimism and confidence about their writing lives. ...

Writing Clearly-Dawn Sova 2004-04-28 Improve your writing skills at your own pace How do you target a specific audience in writing? What makes up a strong thesis statement? Is there a trick to maintaining clear communication in cyberspace? How do you achieve unity and coherence in a final draft? With Writing Clearly: A Self-Teaching Guide, you'll discover the answers to these questions and many more about the basics of communicating effectively through the written word. Each chapter in this hands-on guide focuses on key steps in the writing process, identifying the shared and differing skills demanded by each type of writing, be it a persuasive essay, a business letter, or a scientific report. The straightforward, structured format of Writing Clearly makes it fully accessible, providing an easy-to-understand, comprehensive overview for everyone—from students
beginning to build skills, to adults looking to improve their writing, to the experienced writer hoping to further hone skills in a certain area. Like all Self-Teaching Guides, Writing Clearly allows you to build gradually on what you have learned—at your own pace. Questions and self-tests reinforce the information in each chapter and allow you to skip ahead or focus on specific areas of concern. Packed with useful, up-to-date information, this clear, concise volume is a valuable learning tool and reference source for anyone who wants to develop or improve his or her basic writing skills.

Classroom-Based Evaluation in Second Language Education-Fred Genesee 1996-08-13 Classroom-based Evaluation in Second Language Education has been written to help foreign and second language educators in planning and carrying out effective and comprehensive evaluations in their classrooms. The book emphasizes the value of classroom-based assessment as a tool for improving both teaching and learning. The presentation is non-technical and does not require a specialized background in psychometrics, statistics, or research. The suggested assessment procedures are useful for a broad range of proficiency levels, teaching situations, and instructional approaches. Preview questions and follow-up activities assist the reader in applying the material discussed in each chapter.

The Idea and Practice of Reading-R. Joseph Ponniah 2018-05-08 This book addresses basic issues in language education and explores how reading, with a focus on meaning, contributes to the development of all aspects of language including vocabulary, spelling, grammar, and syntax. It departs from traditional methods and practices in language learning to investigate the potency of reading in improving language acquisition. The traditional practice in language classes to teach language skills explicitly through acquiring forms and structures of language is often less than successful, and teachers are gradually incorporating reading materials and practices into the
This book provides important inputs to language teachers and educators on the need to include reading as an idea and as a practice into the curriculum. Among other things, it explores the benefits of incidental learning of language properties such as vocabulary, syntax and grammar and gives adequate exposure to different types of reading strategies to promote reading among learners. It also exploits the possible transfer of L1 reading strategies and capabilities to L2 reading for language acquisition. In so doing, this book hopes to promote autonomous learning among L2 learners and guide readers in alternative strategies to solve comprehension problems.

Artificial Animals for Computer Animation-Xiaoyuan Tu 2003-06-26 After nearly half a century of research, the Holy Grail of the field of artificial intelligence (AI) remains a comprehensive computational model capable of emulating the marvelous abilities of animals, including locomotion, perception, behavior, manipulation, learning, and cognition. The comprehensive modeling of higher animals—humans and other primates—remains elusive; However, the research documented in this
monograph achieves nothing less than a functional computer model of certain species of lower animals that are by no means trivial in their complexity. Reported herein is the 1996 ACM Doctoral Dissertation Award winning work of Xiaoyuan Tu, which she carried out in the Department of Computer Science at the University of Toronto. Tu presents “arti?cial ?shes”, a remarkable computational model of familiar marine animals in their natural habitat. Originally conceived in the context of computer graphics, Tu’s is to date the only PhD dissertation from this major sub?eld of computer science (and the only thesis from a Canadian university) to win the coveted ACM award.

Privacy-Preserving Machine Learning for Speech Processing-Manas A. Pathak 2012-10-26 This thesis discusses the privacy issues in speech-based applications such as biometric authentication, surveillance, and external speech processing services. Author Manas A. Pathak presents solutions for privacy-preserving speech processing applications such as speaker verification, speaker identification and speech recognition. The author also introduces some of the tools from cryptography and machine learning and current techniques for improving the efficiency and scalability of the presented solutions. Experiments with prototype implementations of the solutions for execution time and accuracy on standardized speech datasets are also included in the text. Using the framework proposed may now make it possible for a surveillance agency to listen for a known terrorist without being able to hear conversation from non-targeted, innocent civilians.

Images of Intellectual Capital-Jan Fazlagić 2017-01-06 Intellectual capital (IC) became a hot topic in economic discussion at the turn of this century, believed to offer new principles which could help build the new intangible economy after the collapse of the Soviet Union and the Internet revolution. The early enthusiasm of the 2000s has slightly subsided today, however, though many of the underlying assumptions relating to the importance of intangible assets are still valid. As such, it is much more appropriate today to discuss issues related to IC as ‘images of intellectual capital’ rather than ‘rules’. Intellectual capital explains a plethora of phenomena in today’s business organisations, and this book takes a post-modern approach to the issue of IC and offers a selection of different perspectives. They include analyses of intellectual capital in education, business, and in the public sector. The chapters collected here are authored by university professors, business practitioners and students, and investigate such issues as the relative importance of intellectual capital components to tangible components of a company’s value, the impact of ICT on IC, the measurement methods for IC, and different forms of communication for the disclosure of IC.

Improving Writing Skills-Arthur Asa Berger 1993-09-02 This brief, practical guide illustrates the most common kinds of business correspondence that a university professor is required to produce and offers useful advice to make these communications as effective as possible. The author also offers general suggestions on effective writing, including brainstorming and collaborating, persuasion, outlining and revising, and designing documents.

Drawing in the English Classroom-Jodi J. Davis 2001 This thesis tests the hypothesis that high school students who use drawing in their English classes will improve their reading and writing skills more
than high school students who do not. While the resulting data showed no significant differences in reading and writing ability over the nine-week period, the literature and classroom experience support this integrated approach.
