Thomas Sankara, often called the African Che Guevara, was president of Burkina Faso, one of the poorest countries in Africa, until his assassination during the military coup that brought down his government. Although his tenure in office was relatively short, Sankara left an indelible mark on his country’s history and development. An avowed Marxist, he outspokenly asserted his country’s independence from France and other Western powers while at the same time seeking to build a genuine pan-African unity. Ernest Harsch traces Sankara’s life from his student days to his recruitment into the mil.

homophobia, the book asks why empiricists liberalise African orifices rather than attending to African demands for restitution, restoration and reparations. Noting that empire opposes African sovereignty, autonomy, and centralisation of power while paradoxically promoting transnational corporations' centralisation of power over African economies, the book challenges contemporary discourses about shared sovereignty, distributed governance, heterarchy, heteronomy and ontology. Arguing that colonialists similarly denied Africans of their human essence, the tome problematises queer sexualities, homosexuality, ecosexuality, cybersexuality and humanoid robotic sexuality all of which complicate supposedly fundamental distinctions between human beings and animals and machines. Provocatively questioning queer sexuality and liberalised orifices that serve to divert African attention from the more serious unfinished business of repossessing material resources, the book insightfully compares Robert Gabriel Mugabe, Thomas Sankara and Julius Kambarage Nyerere who emphasised the imperatives of African autonomy, control and sovereignty over natural resources. Observing Africans' interest in repossessing ownership and control over their resources, the book wonders why so much, queer, international attention is focused on foisting queer sexuality while downplaying more burning issues of resource repossesion, human dignity, equality and equity craved by Africans for whom life is not confined to sexuality. With insights for scholars in sociology, development studies, law, politics, African studies, anthropology, transformation, decolonisation and decoloniality, the book argues that liberal democracy is a façade in a world that is actually ruled through criminocracy.

Soldiers in Revolt-Maggie Dwyer 2018-02 Soldiers in Revolt examines the understudied phenomenon of military mutinies in Africa. Through interviews with former mutineers in Sierra Leone, Burkina Faso, and The Gambia, the book provides a unique and intimate perspective on those who tactically consider the military as a place of opportunity. This allows the book to transcend the internecine struggles that can threaten a military's ability to function effectively. Maggie Dwyer's detailed accounts of specific revolts are complemented by an original dataset of West African mutinies covering more than fifty years, allowing for the identification of trends. Her book shows the complex ways mutineers often formulate and interpret their grievances against a backdrop of domestic and global politics. Just as mutineers have been influenced by the political landscape, so too have they shaped it. Mutinies have challenged political and military leaders, spurred social unrest, led to civilian casualties, threatened peacekeeping efforts and, in extreme cases, resulted in international interventions. Soldiers in Revolt offers a better understanding of West African mutinies and mutinies in general, valuable not only for military studies but for anyone interested in the complex dynamics of African states.

refusal to celebrate victimhood. The book also situates women as central actors in the Pan-African project, which is often presented as an exclusively masculine endeavour. It introduces a balanced gender approach and diagnosis of the Women actors of Pan-Africanism which was very much lacking. The problem of balkanisation of Africa on post-colonial affiliations and colonial linguistic lines has taken its toll on Africa’s building of its common identity and personality. The result is that Africans are more remote to each other in their pigeon-hole-nation-states which put more restrictions for African inter-mobility, coupled by education and cultural affiliations, the communication and transportation and trading networks which are still tied more to their colonial masters than among themselves. This book looks into the problem of the new wave of Pan-Africanism and what strategies that can be proposed for a more participatory Pan-Africanism inspired by the everyday realities of African masses at home and in the diaspora. This book is the first book of its kind that gives a comprehensive and multidimensional coverage of Pan-Africanism. It is a very timely and vital compendium.

Time for Africa’s Emergence? - Saarah François Guimatsia 2016-05-30 Where do things stand today in Africa, after some 56 years of independence? Well, the continent is not just a land of crises and hardships; it also has what it takes to become emergent this 21st century – abundant natural resources, a youthful and dynamic population, a great potential for growth, etc. But most wounds inflicted by the colonial and neocolonial systems to date remain unhealed. Africans therefore have three crucial prerequisites to fulfill for their continent’s renaissance: regain their lost cultural balance, put in place a solid economic backbone, and promote a leadership committed to good governance and continental integration. In this illuminating book written from a refreshing African perspective, the author examines the facts and shares his deep conviction – without indulging in angst or finger-pointing– that Africans should build their continent’s emergence on a great sense of patriotism combined with sound preparation and intelligent cooperation, bearing in mind the potent examples set by Nelson Mandela, Thomas Sankara and other world political icons.

We Are Heirs of the World’s Revolutions - Thomas Sankara 2004-06-30 "Our revolution in Burkina Faso draws on the totality of man’s experiences since the first breath of humanity. We wish to be the heirs of all the revolutions of the world, of all the liberation struggles of the peoples of the Third World. We draw the lessons of the American revolution. The French revolution taught us the rights of man. The great October revolution brought victory to the proletariat and made possible the realization of the Paris Commune’s dreams of justice.”-- Thomas Sankara, October 1984 Thomas Sankara led the revolution of 1983 to 1987 in Burkina Faso. In the five speeches contained in this pamphlet, he explains how the peasants and workers of this West African country established a popular revolutionary government and began to fight the hunger, illiteracy and economic backwardness imposed by imperialist domination, and the oppression of women inherited from millennia of class society. In so doing, they have provided an example not only to the workers and small farmers of Africa, but to those of the entire world.
