Language Policy and Language Acquisition Planning-Maarja Siiner 2018-05-22 In the sociopolitics of language, sometimes yesterday’s solution is tomorrow’s problem. This volume examines the evolving nature of language acquisition planning through a collection of papers that consider how decisions about language learning and teaching are mediated by a confluence of psychological, ideological, and historical forces. The first two parts of the volume feature empirical studies of formal and informal education across the lifespan and around the globe. Case studies map the agents, resources, and attitudes needed for creating moments and spaces for language learning that may, at times, collide with wider beliefs and policies that privilege some languages over others. The third part of the volume is devoted to conceptual contributions that take up theoretical issues related to epistemological and conceptual challenges for language acquisition planning. These contributions reflect on the full spectrum of social and cognitive factors that intersect with the planning of language teaching and learning including ethnic and racial power relations, historically situated political systems, language ideologies, community language socialization, relationships among stakeholders in communities and schools, interpersonal interaction, and intrapersonal development. In all, the volume demonstrates the multifaceted and socially situated nature of language acquisition planning.

500 Words, Phrases, and Idioms for the TOEFL iBT plus Typing Strategies-Bruce Stirling 2021-01-15
HOW IS THIS TOEFL BOOK DIFFERENT? This TOEFL book is different because it uses an integrated vocabulary learning system called recycling. Recycling is simple. Each exercise is divided into four quizzes. Quiz 1, a multiple-choice vocabulary quiz, introduces ten new words. Next, you will do Quiz 2, which is a sentence-completion quiz based on the ten words in Quiz 1. Next, you will do Quiz 3, a spelling quiz. The speaker in the audio will say the same ten words in turn. You will then have ten seconds to spell each word by saying it and typing it. Finally, you will do Quiz 4, which is a 60-word typing test based on the ten new words you have been recycling through Quizzes 1, 2 and 3, plus words, phrases and idioms recycled from previous exercises. BONUS MATERIAL Learn essential rhetorical strategies and a test-proven way to develop opinion-based and fact-based TOEFL essays.

Examining Listening-Ardeshir Geranpayeh 2013-03-27 This volume examines the nature of second language listening proficiency and how it can be assessed. The book highlights the need for test developers to provide a clear explication of the ability constructs which underpin the tests they offer in the public domain. This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical evidence. It operationalises a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components, examining and then analysing Cambridge ESOL listening tasks from the following perspectives: Test Taker; Cognitive Validity; Context Validity; Scoring Validity; Criterion-related Validity; and Consequential Validity.

English Language Proficiency Assessments for Young Learners-Mikyung Kim Wolf 2017-05-25
English Language Proficiency Assessments for Young Learners provides both theoretical and empirical information about assessing the English language proficiency of young learners. Using large-scale standardized English language proficiency assessments developed for international or U.S. contexts as concrete examples, this volume illustrates rigorous processes of developing and
validating assessments with considerations of young learners’ unique characteristics. In this volume, young learners are defined as school-age children from approximately 5 to 13 years old, learning English as a foreign language (EFL) or a second language (ESL). This volume also discusses innovative ways to assess young learners’ English language abilities based on empirical studies, with each chapter offering stimulating ideas for future research and development work to improve English language assessment practices with young learners. English Language Proficiency Assessments for Young Learners is a useful resource for students, test developers, educators, and researchers in the area of language testing and assessment.

Language as a Local Practice-Alastair Pennycook 2010-04-05 Language as a Local Practice addresses the questions of language, locality and practice as a way of moving forward in our understanding of how language operates as an integrated social and spatial activity. By taking each of these three elements - language, locality and practice - and exploring how they relate to each other, Language as a Local Practice opens up new ways of thinking about language. It questions assumptions about languages as systems or as countable entities, and suggests instead that language emerges from the activities it performs. To look at language as a practice is to view language as an activity rather than a structure, as something we do rather than a system we draw on, as a material part of social and cultural life rather than an abstract entity. Language as a Local Practice draws on a variety of contexts of language use, from bank machines to postcards, Indian newspaper articles to fish-naming in the Philippines, urban graffiti to mission statements, suggesting that rather than thinking in terms of language use in context, we need to consider how language, space and place are related, how language creates the contexts where it is used, how languages are the products of socially located activities and how they are part of the action. Language as a Local Practice will be of interest to students on advanced undergraduate and post graduate courses in Applied Linguistics, Language Education, TESOL, Literacy and Cultural Studies.

Testing Lecture Comprehension Through Listening-to-summarize Cloze Tasks-Haiping Wang 2017-09-06 This book explores the effectiveness of listen-to-summarize tasks as a tool to assess lecture comprehension ability. It especially focuses on listen-to-summarize tasks that represent listeners’ meaning building and the discourse construction of the lecture for listening assessment purposes. It discusses in depth the nature of lecture comprehension and introduces the approaches to assessing it. It also presents teachers’ and students’ perceptions of listen-to-summarize task demands and their respective implications. By observing interactions between test-takers’ cognitive
processes and the task itself, the book explores the effectiveness of these tasks. It also examines the discrepancy in cognitive processes between different language competence levels in detail, shedding light upon current research on lecture comprehension assessment and offering insights into listening comprehension instruction.

International Student Transitions-Maureen Snow Andrade 2019-06-07 US higher education institutions host more than a million international students, many of whom speak English as a second language (ESL). As this number is projected to grow, it is vital that new curricular and non-curricular approaches to English language development are considered, including rigorous evaluation processes. This book introduces a framework to guide institutions in examining their views and beliefs regarding language acquisition and current approaches to international student success. It makes a distinction between a philosophy of support and a philosophy of development with a focus on the latter. It provides stakeholders with theoretical and practical foundations from which they can design, develop, and implement new models for students’ linguistic and cultural growth. Application of the framework will encourage institutions to examine support models that have been in place for decades and develop effective processes for generating innovative programming and practices aimed at helping international ESL students achieve their educational goals.

English as a Foreign or Second Language-Mohammed S. Assiri 2015-09-01 This book offers a brief review of the theoretical perspectives and empirical findings that have shaped our understanding of salient facets of English language teaching, learning, and testing. It also communicates my personal views in regard to certain issues in these three domains. The book is divided into five chapters that range in their foci from theory to practice. Chapter one presents the most influential theoretical perspectives that have sought to account for the processes involved in second language acquisition and the roles of the so many variables that affect how a learner acquires a second language. The second chapter discusses several methods and practices commonly used in EL2 (English as a foreign/second language) teaching. Chapter three highlights the differences between Basic Interpersonal Communication Skills and Cognitive Academic Language Proficiency (or BICS vs. CALP) as well as the various categories of language learning and use strategies. In the fourth chapter, the presentation centers on EL2 testing and assessment. Chapter five is wholly devoted to my personal views, including my philosophy of language education, critiques of some scholarly views, and practical recommendations. Such views have had their inspiration and support from my experiences both as a learner and as a teacher.
