Information Communication Technologies: Concepts, Methodologies, Tools, and Applications-Van Slyke, Craig 2008-04-30 The rapid development of information communication technologies (ICTs) is having a profound impact across numerous aspects of social, economic, and cultural activity worldwide, and keeping pace with the associated effects, implications, opportunities, and pitfalls has been challenging to researchers in diverse realms ranging from education to competitive intelligence.

Authenticity-James H. Gilmore 2007-10-18 Contrived. Disingenuous. Phony. Inauthentic. Do your customers use any of these words to describe what you sell—or how you sell it? If so, welcome to the club. Inundated by fakes and sophisticated counterfeiters, people increasingly see the world in terms of real or fake. They would rather buy something real from someone genuine rather than something fake from some phony. When deciding to buy, consumers judge an offering's (and a company's) authenticity as much as—if not more than—price, quality, and availability. In Authenticity, James H. Gilmore and B. Joseph Pine II argue that to trounce rivals companies must grasp, manage, and excel at rendering authenticity. Through examples from a wide array of industries as well as government, nonprofit, education, and religious sectors, the authors show how to manage customers' perception of authenticity by: recognizing how businesses "fake it"; appealing to the five different genres of authenticity; charting how to be "true to sell" and what you say you are; and crafting and implementing business strategies for rendering authenticity. The first to explore what authenticity really means for businesses and how companies can embrace it truly and effectively, this book is a must-read for any organization seeking to fulfill consumers' intensifying demand for the real deal.

Leadership and the E-Learning Organization-Susan Smith Nash 2006 Today's e-learning organization - college, university, school, training unit, or business -- faces unique challenges, and this book of essays and articles is an invaluable resource. In this book by Susan Smith Nash, who has been involved in the development and administration of distance and online courses since the early 1990s, you will find articles on leadership, e-learning, curriculum, e-learning "in extremis," technology (including the theory and effective use of podcasts, blogs, and new popular technology-forward devices), student needs and instructional activities that bring about highly effective learning situations. The articles in this book answer your questions. The solid scholarship and resources for further study help you succeed in the ever-evolving world of e-learning.

Life After the 30-Second Spot-Joseph Jaffe 2005-05-25 The old media strategies advertisers used for decades no longer work. Here's what does! Traditional advertising, in the form of print, radio, and most notably, television, is far less effective than it used to be. Advertising strategies using only those mediums no longer work. Life After the 30-Second Spot explains how savvy marketers and advertisers are responding with new marketing techniques to get their message out, get noticed, engage their audiences—and increase sales! Covering topics such as viral marketing, gaming, on-demand viewing, long-form content, interactive, and more, the book explains the new avenues marketers and advertisers must use to replace traditional print, TV, and radio advertising—and which strategies are most effective. This book is every marketer's road map to "new marketing."
